2026

AI for Business Strategy and Decision Making

Start Your Career in Data Science

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

AI for Business Strategy and Decision Making

Opening Course Description

AI is not only for coders. Today, business teams use AI for market research, competitor analysis, customer understanding, sales planning, HR support, financial summaries, and faster decision making.

This course by Eduden is built for MBA, BBA, Commerce, Economics, and management students who want to understand how AI is used in real business work. The course focuses on practical use, clear thinking, and business outcomes.

Suggested Category: AI and Tech for Non Technical Careers

Secondary Category: Artificial Intelligence

Duration: 60 Days

Lecture: 40+

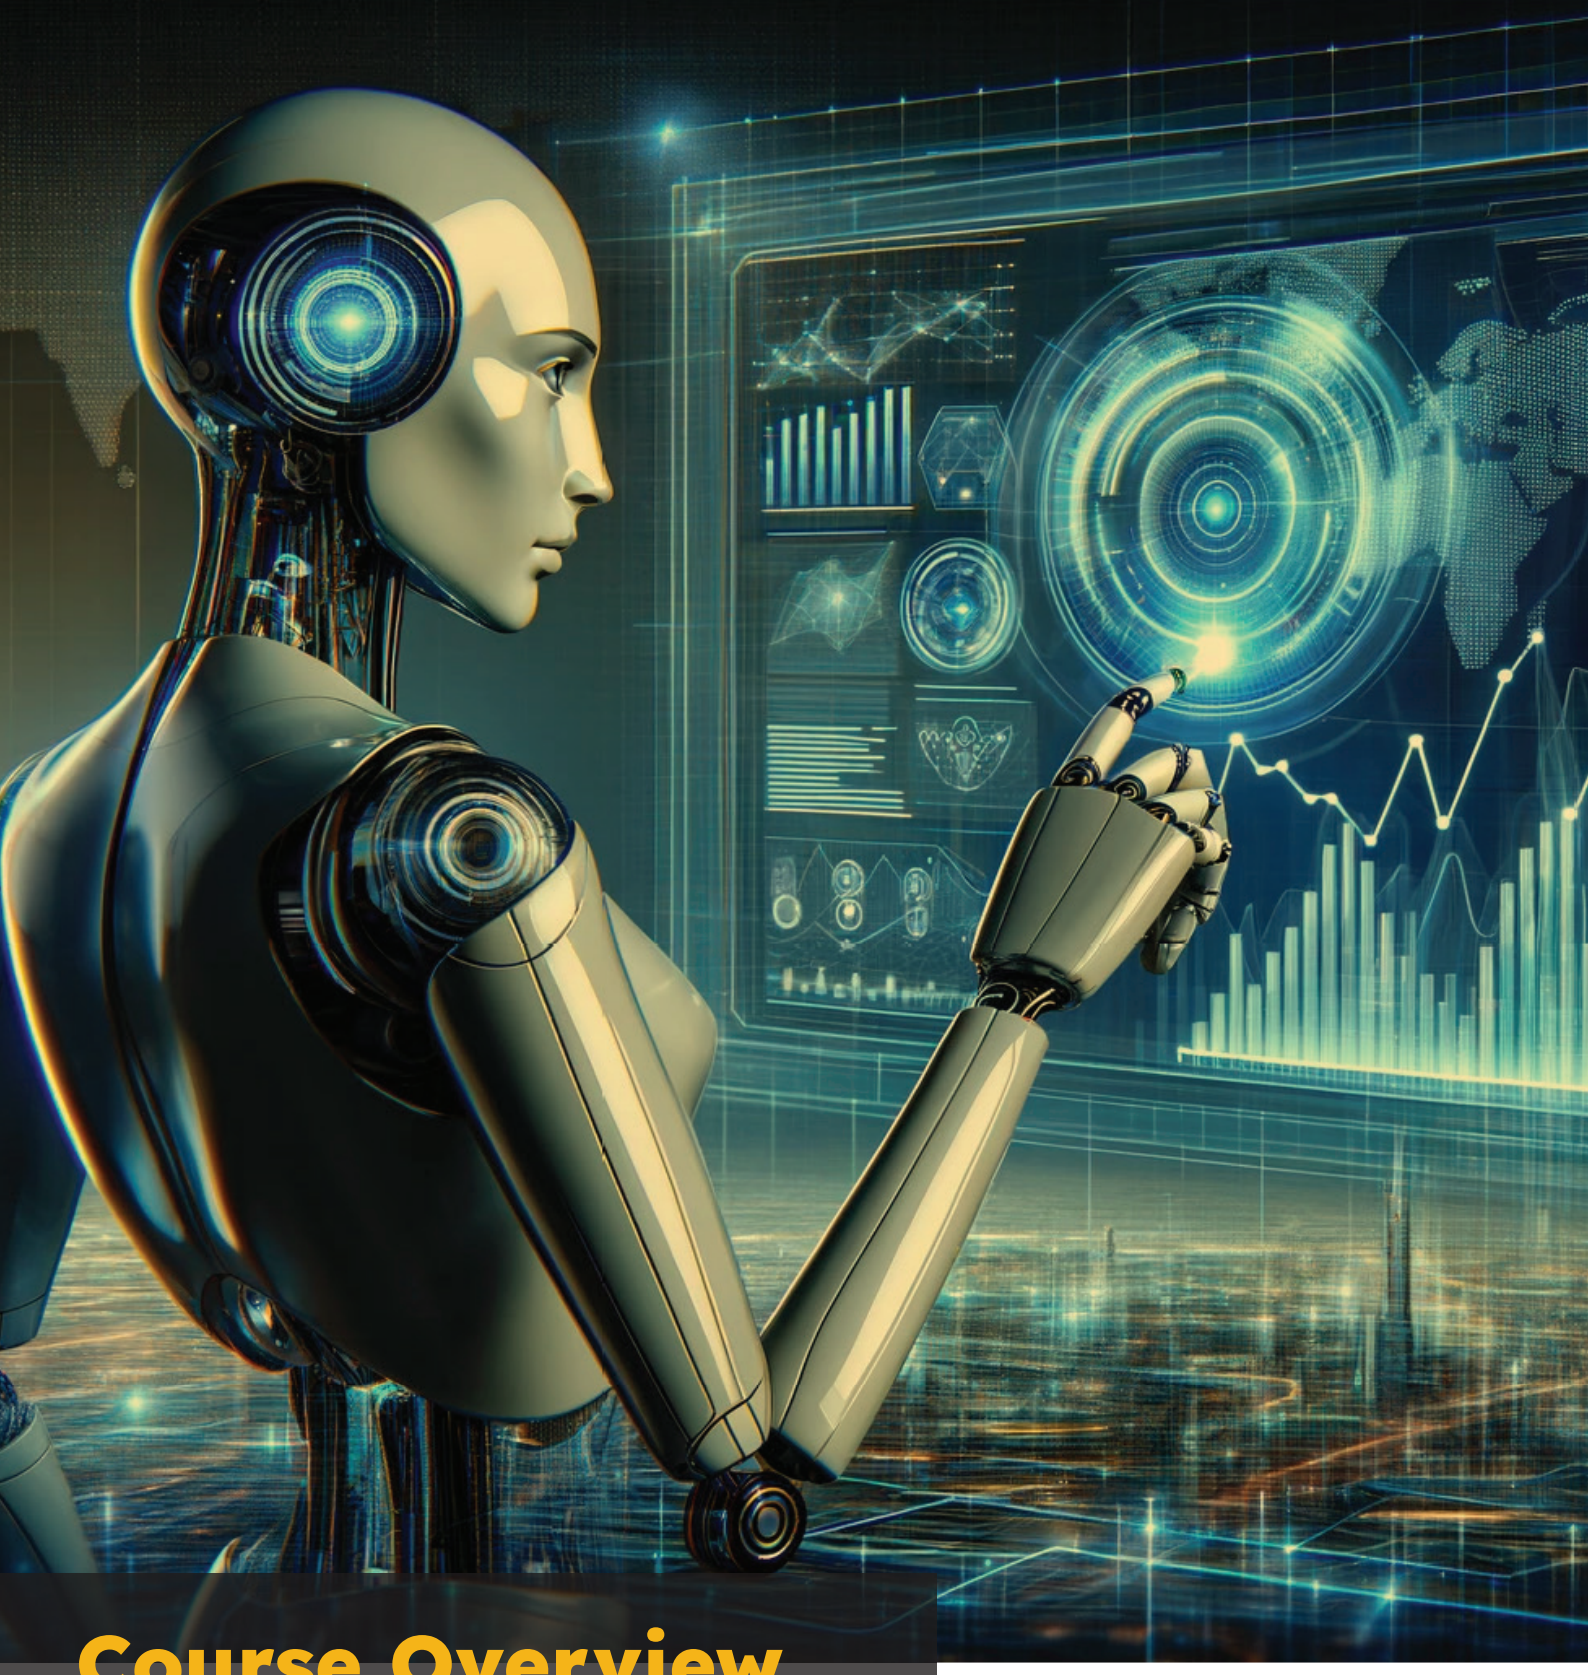

Projects: 5

Who Can Join

MBA, BBA, B.Com, Economics, Commerce, entrepreneurship, and management students can join this course.

No programming background is required. Students should have interest in business, research, strategy, or decision making.

Course Overview

This course teaches students how to use AI tools in business workflows. Students will learn prompt writing, business research, customer analysis, campaign planning, report creation, and decision support.

The course is designed to help students become more useful in modern workplaces where AI tools are slowly becoming part of daily operations. Students will learn how to use AI responsibly and how to turn AI output into practical business documents.

Assignments

Students will complete assignments on business prompts, competitor analysis, customer personas, AI supported reports, and department based use cases.

Quizzes

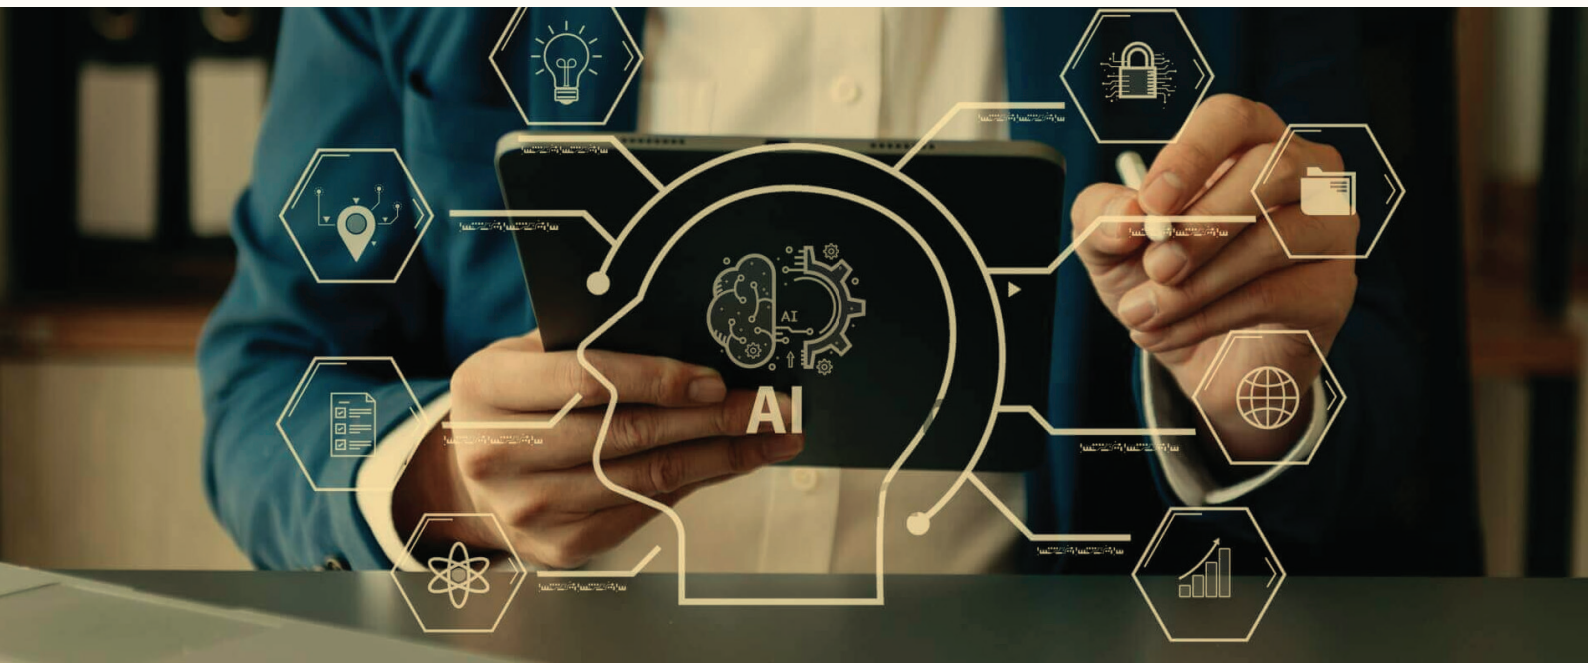

Short quizzes will test AI concepts, prompt quality, business use cases, ethical usage, and decision making logic.

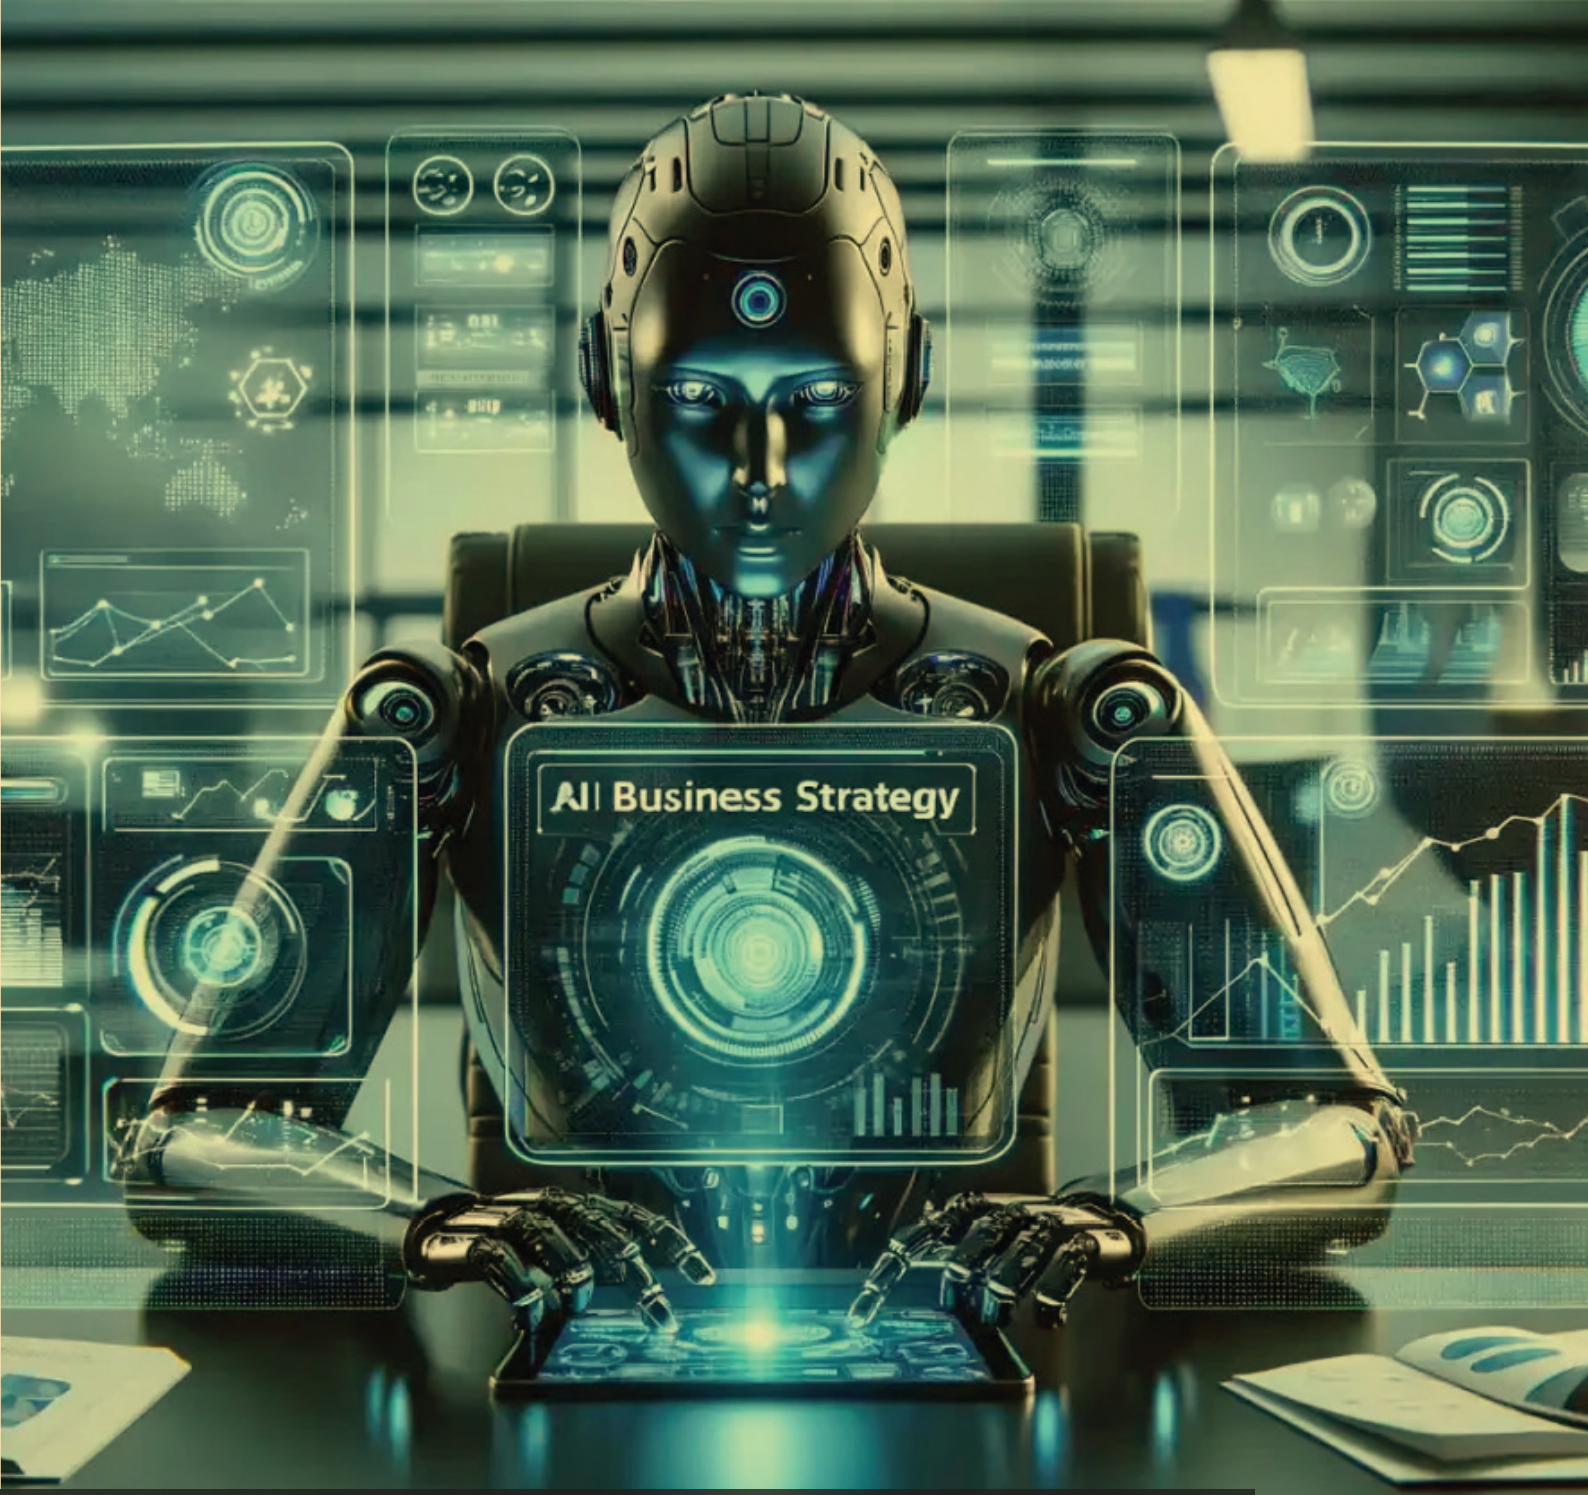

Live Sessions

Live sessions will include tool demonstrations, case discussions, business prompt practice, and project feedback.

Projects

- AI supported competitor analysis
- Market research report using AI tools
- Customer persona and campaign idea project
- Department wise AI use case plan
- Final business strategy project using AI

Course Curriculum & Tools

Tools Covered:

Curriculum Breakdown

✳ Introduction to AI in Business

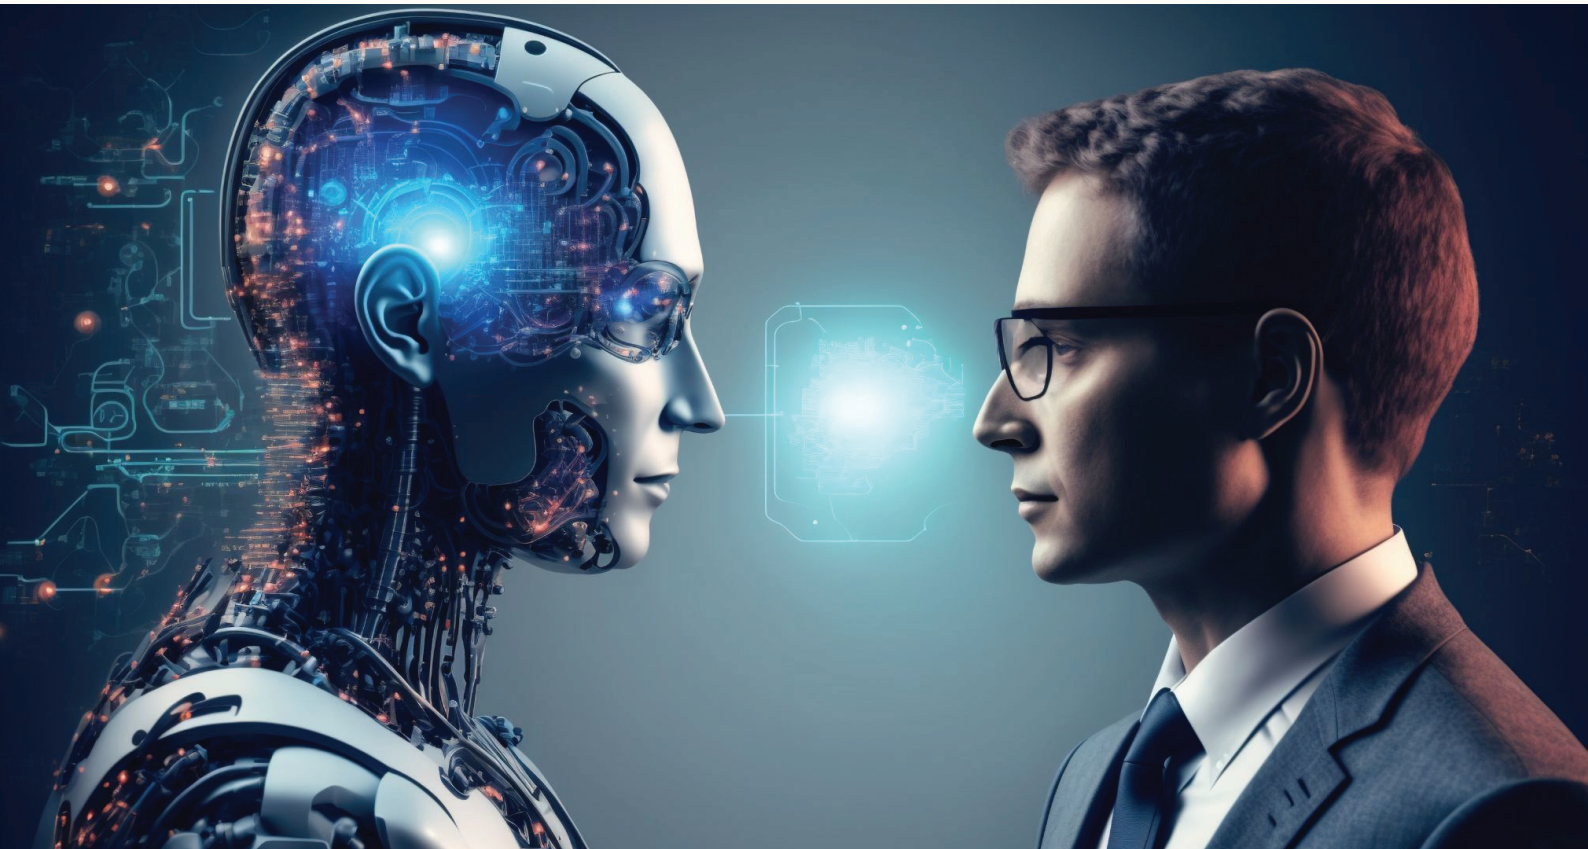

- Students learn what AI is and how companies use it in marketing, finance, HR, sales, operations, and research.

✳ Prompt Engineering for Business Work

- Students learn how to write prompts for research, emails, reports, presentations, and business planning.

✳ AI for Market and Competitor Research

- Students learn how to study markets, compare competitors, and prepare structured research notes.

✳ AI for Customer and Sales Strategy

- Students learn customer persona creation, customer pain point analysis, sales pitch support, and lead planning.

✳ AI for Internal Business Functions

- Students learn how AI can support HR, finance, operations, admin, and customer service tasks.

✳ AI Ethics and Responsible Use

- Students learn accuracy checking, privacy awareness, bias, and responsible AI usage in business.

✳ Final Capstone Project

- Students create an AI supported business improvement plan for a company or department.

What Benefits You Will Gain From the Course

Course Certificate

Students will receive an Eduden certificate after completing assignments and the final project.

Practical Business Use Cases

Students will learn how to apply AI to real business problems instead of only learning definitions.

Portfolio Development

Students will build a portfolio with business reports, AI prompts, research documents, and presentations.

Ready for Interviews

Students will be able to explain how AI can improve business workflows, reporting, customer analysis, and decision making.

Career Path After This Course

This course helps students prepare for business roles where AI awareness and practical tool usage are becoming valuable.

Possible Career Roles

- Business Analyst Trainee
- Management Trainee
- AI Business Support Executive
- Marketing Analyst
- Operations Analyst
- Research Assistant
- Sales Strategy Assistant
- Business Development Executive
- Startup Operations Associate

How It Helps in CV Building

Students can show AI assisted business research, competitor analysis, prompt libraries, and strategy reports in their CV or portfolio. This gives them an advantage in interviews for business and management roles.

Next Learning Step

Students can continue into Business Analytics, Product Management with AI, Digital Business Operations, or Advanced Data Analytics.
