2026

Business Analytics and MIS Reporting with Excel, SQL and Power BI

Start Your Career in Business Analytics

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Business Analytics and MIS Reporting with Excel, SQL and Power BI

Opening Course Description

Every company runs on reports. Sales reports, finance reports, HR reports, operations dashboards, marketing performance, customer data, and management summaries are used every day to make decisions.
This course by Eduden is designed for students from MBA, BBA, Commerce, Economics, Arts, and other non computer backgrounds who want to build strong reporting and analytics skills. You will learn Excel, SQL, and Power BI in a practical classroom environment and build dashboards that can be shown in interviews, internships, and placements.

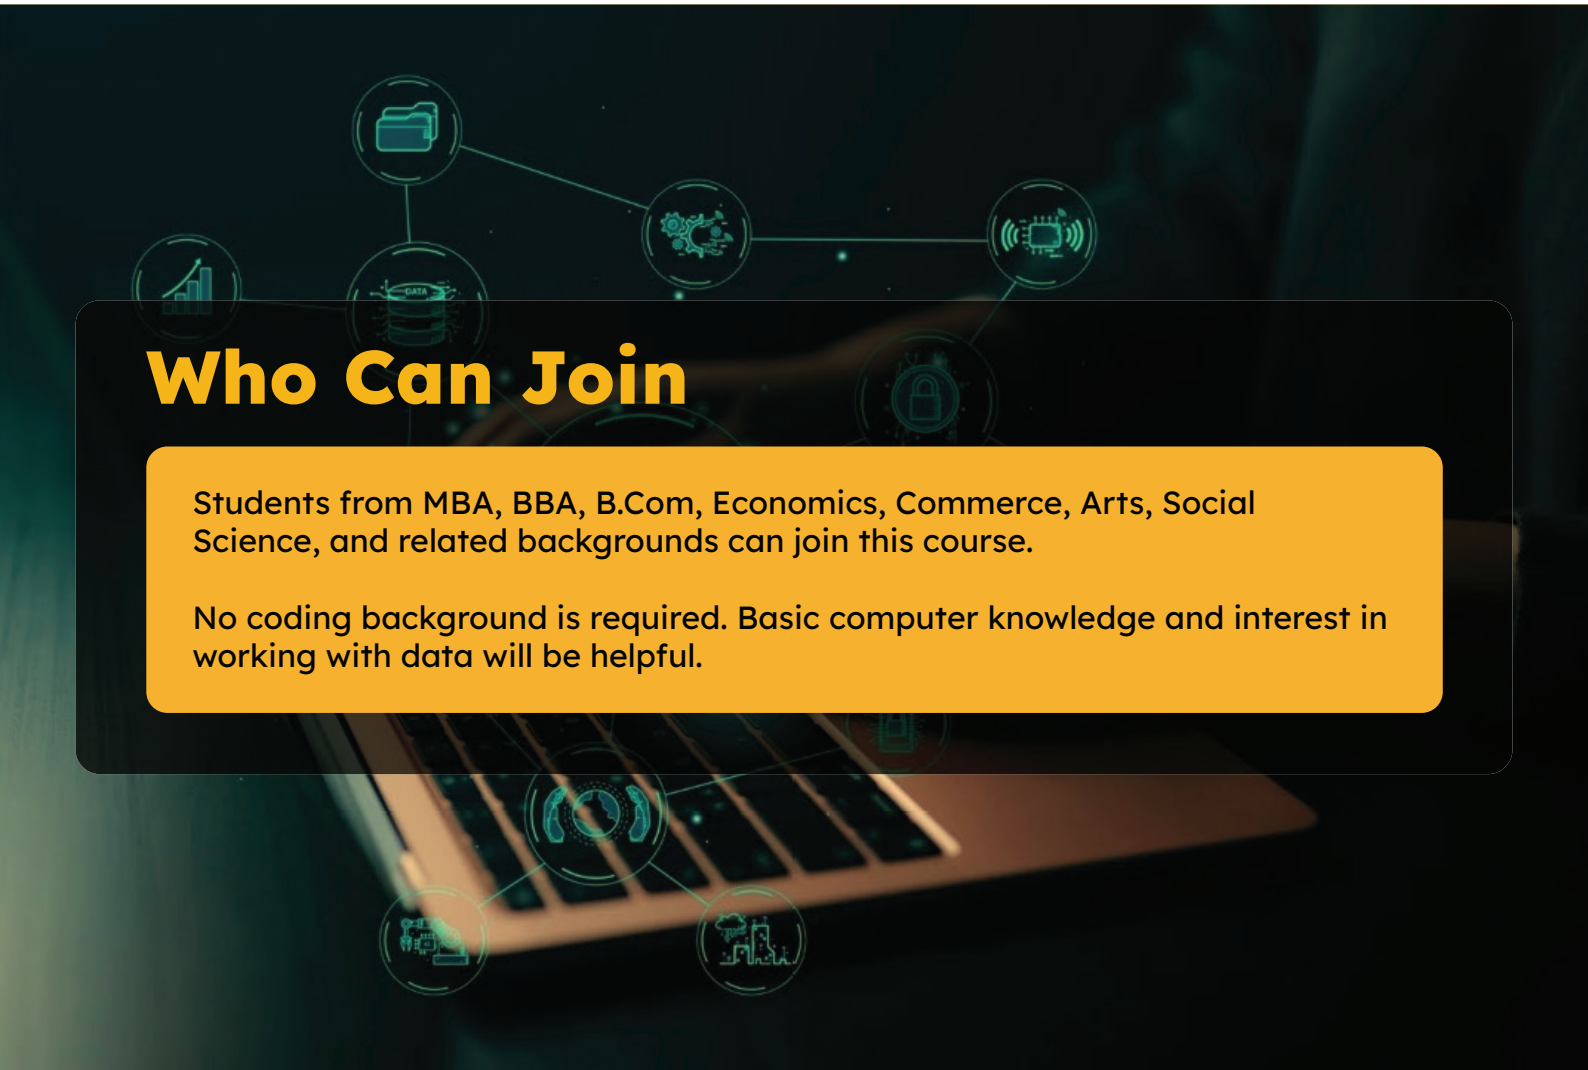

Suggested Category: AI and Tech for Non Technical Careers

Secondary Category: Data Science

Duration: 90 Days

Lecture: 50+

Projects: 6

Who Can Join

Students from MBA, BBA, B.Com, Economics, Commerce, Arts, Social Science, and related backgrounds can join this course.

No coding background is required. Basic computer knowledge and interest in working with data will be helpful.

Course Overview

This course focuses on practical analytics skills that are useful across industries. Students will learn how to clean data, create reports, write basic SQL queries, build dashboards, and present insights clearly.

The goal is not to make students heavy programmers. The goal is to help them become confident with data, reporting, and business decision support. By the end of the course, students will have dashboard projects, SQL practice files, and reporting samples that can add real value to their CV.

Assignments

Students will complete assignments on Excel formulas, data cleaning, pivot tables, SQL queries, dashboard building, and report writing.

Quizzes

Short quizzes will test understanding of business metrics, Excel logic, SQL basics, dashboard elements, and report interpretation.

Live Sessions

Live classroom sessions will include tool demonstrations, guided practice, doubt clearing, dashboard reviews, and project discussions.

Projects

- Sales performance dashboard
- HR attendance and employee report
- Customer data analysis using SQL
- Finance summary dashboard
- Marketing campaign reporting sheet
- Final MIS dashboard with written business insights

Course Curriculum & Tools

Top Tools Covered in This Graphic Design Course:

- Excel
- Google Sheets
- SQL
- Power BI
- Canva or PowerPoint
- Basic AI tools for report explanation

Curriculum Breakdown

✳ Introduction to Business Analytics and MIS

- Students learn how companies use data and reports in daily decision making.

✳ Excel for Data Cleaning and Reporting

- Students work with formulas, sorting, filtering, pivot tables, charts, conditional formatting, and report layouts.

✳ SQL for Business Data

- Students learn SELECT, WHERE, GROUP BY, ORDER BY, joins, and simple business query writing.

✳ Power BI Dashboarding

- Students learn data import, charts, slicers, cards, filters, and dashboard design.

✳ Business Metrics and KPI Reporting

- Students learn how to track sales, finance, HR, marketing, and operations metrics.

✳ Data Storytelling and Presentation

- Students learn how to explain dashboards and write short management summaries.

✳ Final Capstone Project

- Students prepare a full MIS dashboard and present business insights.

✳ Photoshop Basics for Designers

- Cropping, background removal, basic retouching
- Layering and masking for marketing content
- Creating mockups to showcase your work

✳ Final Project & Portfolio

- Design and present a full brand identity project
- Prepare a portfolio-ready presentation (PDF or Behance)
- Project review and feedback session

What Benefits You Will Gain From the Course

Certificate of Completion

Students who complete the assignments and final project will receive an Eduden certificate of completion.

Practical Project Experience

Students will work on reports and dashboards similar to what companies use in real roles.

Portfolio Development

Students will build a portfolio with Excel files, SQL queries, Power BI dashboards, and project summaries.

Ready for Interviews

Students will be able to explain data projects confidently during internship and placement interviews.

Career Path After This Course

This course helps students apply for roles where reporting, data handling, and dashboard skills are required.

Possible Career Roles

- MIS Executive
- Business Analyst Trainee
- Data Analyst Intern
- Reporting Analyst
- Operations Analyst
- Marketing Analyst
- HR Analytics Assistant
- Power BI Dashboard Assistant
- Research Analyst

How It Helps in CV Building

Students can add dashboard projects, SQL query work, Excel reports, and final capstone work to their CV. This gives recruiters proof that the student can handle business data and not just speak about analytics theoretically.

Next Learning Step

Students can continue into AI for Business Strategy, Advanced Business Analytics, Data Science with Python, or Product Management.
