Get hands-on,
Get hired.

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Digital Business Operations and No Code Automation with AI

Opening Course Description

Modern offices are full of repetitive work. Forms, sheets, emails, reports, follow ups, approvals, task tracking, customer records, and daily updates take a lot of time. AI and no code tools can make this work faster and more organized.

This course by Eduden is designed for non technical students who want to work in business operations, administration, startups, customer success, HR operations, marketing operations, or digital coordination roles.

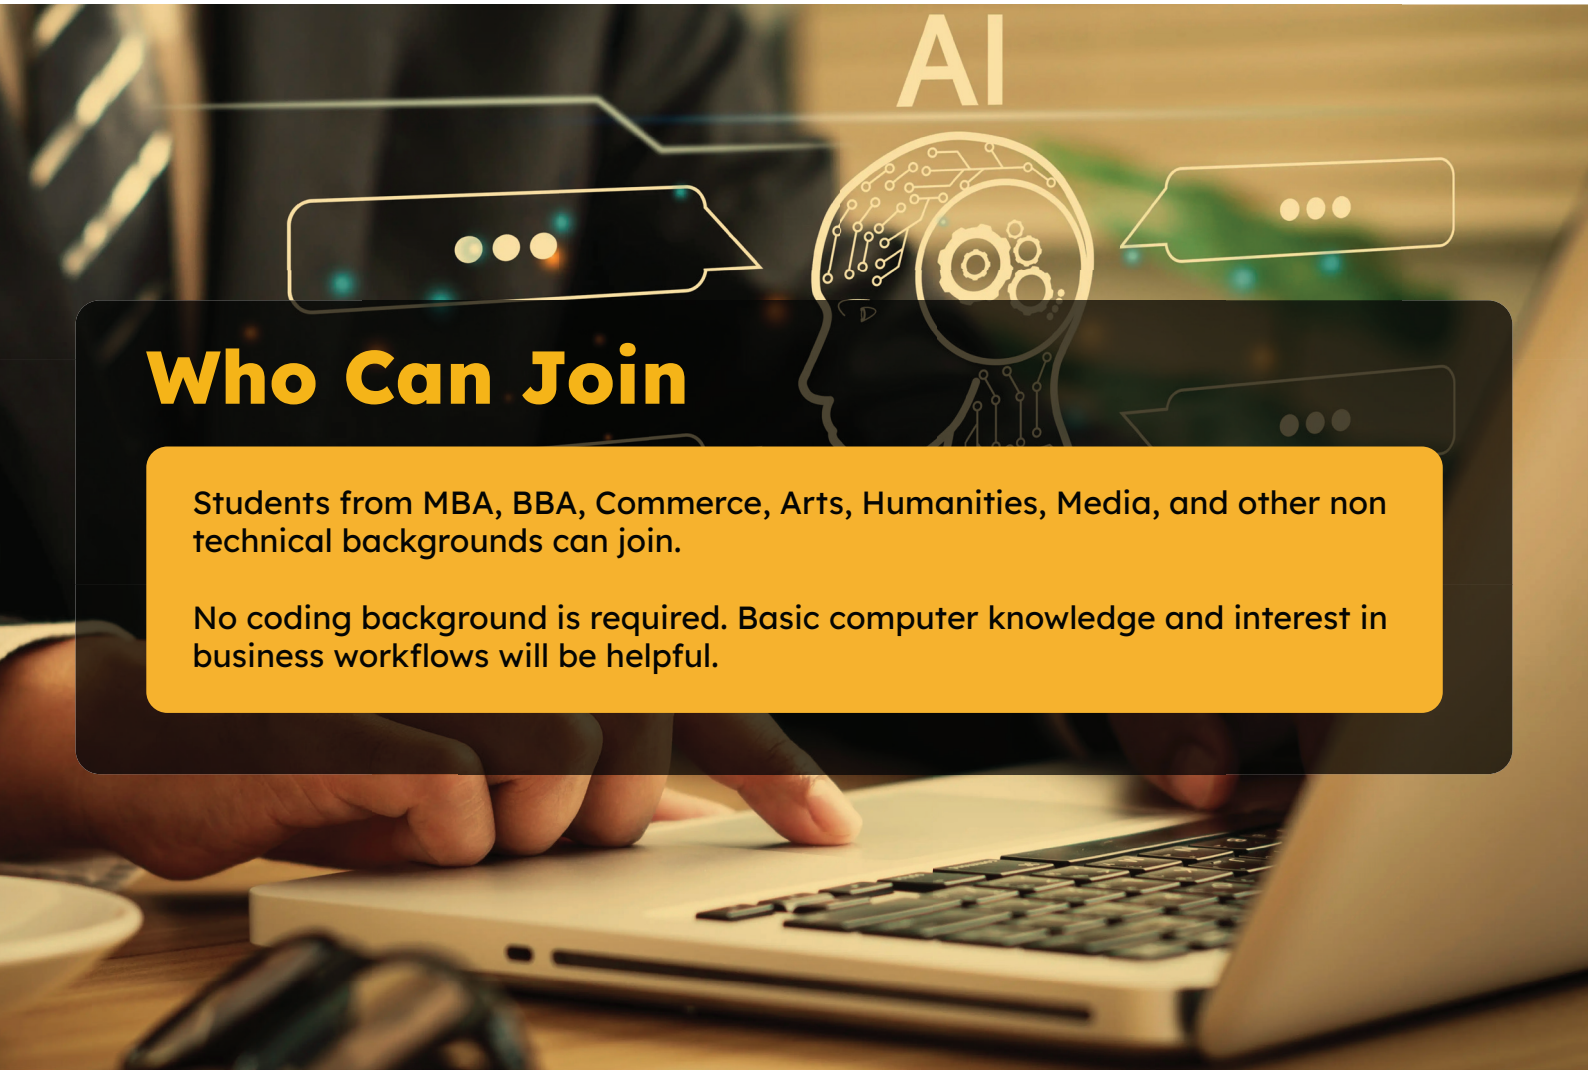

Suggested Category: AI and Tech for Non Technical Careers

Secondary Category: Artificial Intelligence

Duration: 60 Days

Lecture: 36+

Projects: 5

Who Can Join

Students from MBA, BBA, Commerce, Arts, Humanities, Media, and other non technical backgrounds can join.

No coding background is required. Basic computer knowledge and interest in business workflows will be helpful.

Course Overview

This course teaches students how to use AI and no code tools to manage business tasks, automate workflows, organize data, and improve productivity. Students will work with forms, spreadsheets, task boards, AI writing tools, automation platforms, and simple internal systems.

By the end of the course, students will be able to build useful business workflows and show them as practical portfolio projects.

Assignments

Students will complete assignments on forms, spreadsheets, task boards, AI documents, customer tracking sheets, and workflow automation.

Quizzes

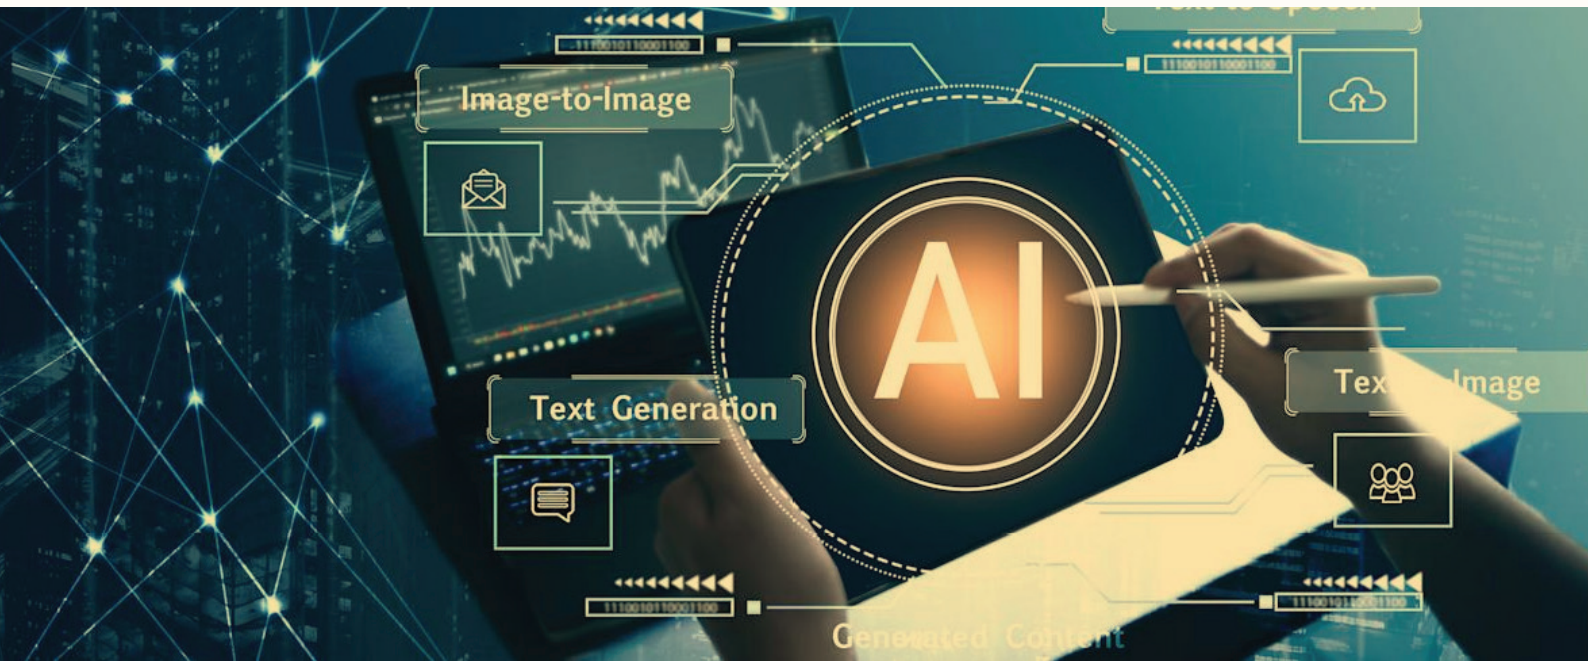

Quizzes will test understanding of workflow logic, automation basics, AI tool usage, and business process mapping.

Live Sessions

Live sessions will include tool walkthroughs, workflow building, doubt clearing, and project reviews.

Projects

- AI powered document and email workflow
- Lead collection and follow up tracker
- Task management system for a team
- Automated form to sheet workflow
- Final capstone: Digital operations system for a small business

Course Curriculum & Tools

Tools Covered:

Course Curriculum

✳ Introduction to Digital Business Operations

- Students learn how modern teams manage tasks, data, communication, and reporting.

✳ AI for Office Productivity

- Students learn how to use AI for emails, summaries, reports, presentations, and documentation.

✳ No Code Workspaces

- Students learn how to organize information using Notion, Airtable, task boards, and shared documents.

✳ Forms, Sheets, and Data Collection

- Students learn how to collect leads, feedback, registrations, and internal updates using forms and spreadsheets.

✳ Workflow Automation Basics

- Students learn how to connect tools, automate notifications, update sheets, and reduce manual work.

✳ Business Process Mapping

- Students learn how to understand a process, identify delays, and design a better workflow.

✳ Final Capstone Project

- Students build a working digital operations system for a small business, department, or college activity.

What Benefits You Will Gain From the Course

Course Certificate

Students receive an Eduden certificate after completing assignments and the final project.

Practical Workflow Experience

Students learn how to build systems that are useful in real offices and startups.

Portfolio Development

Students build a portfolio with workflow maps, automation screenshots, templates, and project documentation.

Ready for Interviews

Students learn how to explain business workflows, automation logic, AI use cases, and productivity improvements.

Career Path After This Course

This course supports students who want to work in operations, coordination, administration, marketing support, HR operations, or startup teams.

Possible Career Roles

- Business Operations Executive
- Operations Coordinator
- Digital Operations Assistant
- Customer Success Associate
- Marketing Operations Assistant
- HR Operations Assistant
- No Code Automation Assistant
- Startup Coordinator

How It Helps in CV Building

Students can show real workflow projects, automation systems, AI templates, and no code dashboards in their portfolio. This helps them stand out for roles where companies need organized and tool friendly candidates.

Next Learning Step

Students can continue into Product Management, Business Analytics, AI for Business Strategy, Digital Marketing, or Data Analytics.
