2026

Economics, Policy and Development Analytics with AI

Start Your Career in Data Science

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Economics, Policy and Development Analytics with AI

Opening Course Description

Economics, policy, and social science are built around real questions. What is changing? Who is affected? What does the data show? What action should be taken next?

This course by Eduden is designed for Economics, Political Science, Public Policy, Commerce, Sociology, and Social Science students who want to use data and AI tools for research, reports, dashboards, and policy analysis.

Suggested Category: AI and Tech for Non Technical Careers

Secondary Category: Data Science

Duration: 60 Days

Lecture: 36+

Projects: 4

Who Can Join

Students from Economics, Political Science, Public Policy, Commerce, Sociology, Social Science, and related academic backgrounds can join.

No coding background is required. Interest in research, data, society, development, and policy will be helpful.

Course Overview

This course teaches students how to work with public datasets, economic indicators, survey data, and research reports. Students will learn how to clean data, create charts, compare regions, identify trends, and prepare policy style reports with AI support.

By the end of the course, students will have a research analytics portfolio that can support internships, academic projects, research roles, and policy related opportunities.

Assignments

Students will complete assignments on public data analysis, chart creation, indicator comparison, AI assisted research summaries, and policy note writing.

Quizzes

Quizzes will check understanding of data interpretation, public indicators, chart selection, research logic, and report structure.

Live Sessions

Live sessions will include public dataset walkthroughs, research discussions, report feedback, and presentation practice.

Projects

- Economic indicator comparison report
- Public dataset visualization project
- AI assisted policy brief
- Final capstone: Research analytics report with presentation

Course Curriculum & Tools

Tools Covered:

- Excel
- Google Sheets
- Power BI basics
- World Bank Data
- Government datasets
- ChatGPT
- Perplexity
- Canva or PowerPoint

Course Curriculum

✳ Research and Data Basics

- Students learn what research data is, how public datasets work, and how to frame research questions.

✳ Economic and Policy Data

- Students work with indicators such as inflation, unemployment, population, education, health, GDP, and development data.

✳ Excel and Dashboard Basics for Research

- Students learn data cleaning, chart creation, comparison reports, and simple dashboard building.

✳ AI for Research Support

- Students learn how to summarize reports, prepare literature notes, draft policy briefs, and organize research points.

✳ Data Storytelling

- Students learn how to turn data into clear explanations and presentation ready insights.

✳ Final Capstone Project

- Students prepare a complete policy or economics report with data, visuals, and recommendations.

What Benefits You Will Gain From the Course

Course Certificate

Students receive an Eduden certificate after completing assignments and the final research project.

Practical Research Experience

Students work with public datasets and research style reports instead of only reading theory.

Portfolio Development

Students build a portfolio with dashboards, policy briefs, charts, and research reports.

Ready for Interviews

Students learn how to explain research findings, data sources, and recommendations clearly.

Career Path After This Course

This course supports students who want roles in research, development, consulting, public policy, and analytics.

Possible Career Roles

- Research Analyst Trainee
- Policy Research Assistant
- Economic Analyst Trainee
- Data Reporting Assistant
- Development Sector Analyst
- Public Policy Intern
- Survey Data Assistant

How It Helps in CV Building

Students can add research reports, public data dashboards, policy briefs, and data backed presentations to their CV. This is useful for internships in research firms, think tanks, NGOs, and consulting organizations.

Next Learning Step

Students can continue into Data Analytics, Business Intelligence, AI for Business Strategy, Public Policy Analytics, or GIS and Location Intelligence.
