About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Product Management and Digital Business with AI

Opening Course Description

Every app, website, SaaS platform, and digital service needs people who understand users, business goals, product planning, and communication with technology teams.

This course by Eduden is designed for management students, business students, entrepreneurs, and non technical learners who want to work in technology companies without becoming full time developers. Students will learn how digital products are planned, researched, documented, tested, and improved.

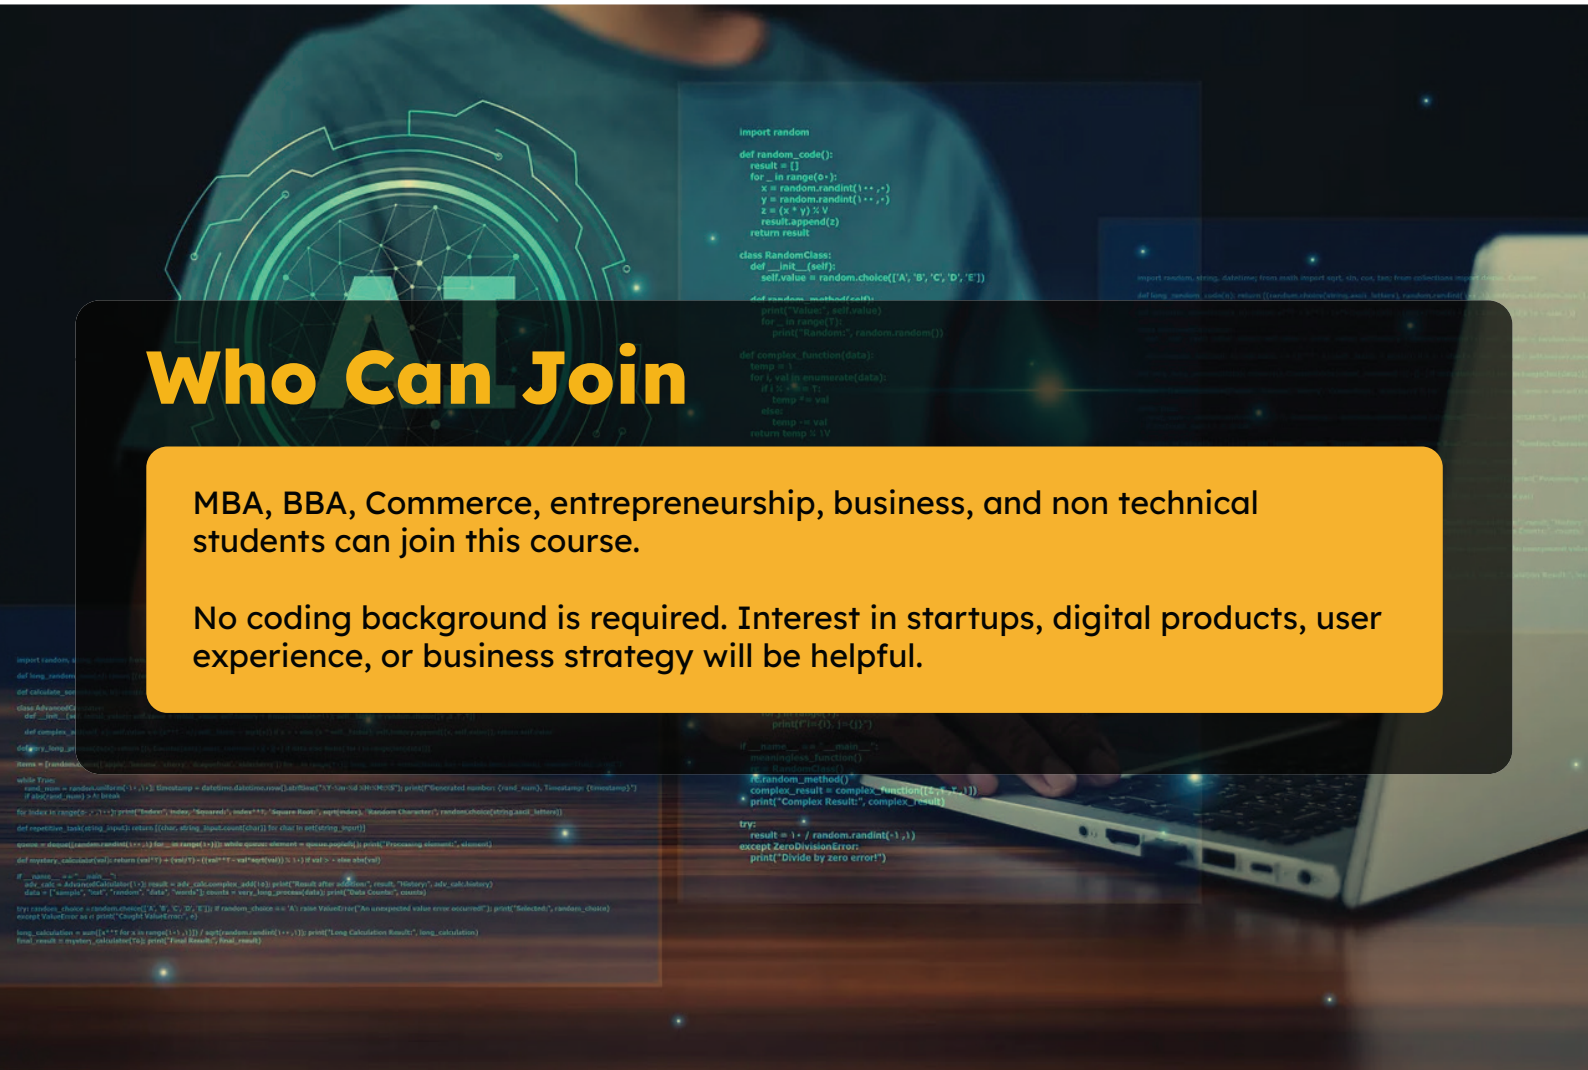

Suggested Category: AI and Tech for Non Technical Careers

Secondary Category: Application Development

Duration: 90 Days

Lecture: 50+

Projects: 5

Who Can Join

MBA, BBA, Commerce, entrepreneurship, business, and non technical students can join this course.

No coding background is required. Interest in startups, digital products, user experience, or business strategy will be helpful.

Course Overview

This course teaches students how to think like product managers. Students will learn user research, competitor analysis, product requirement writing, feature planning, wireframing basics, product metrics, and AI supported documentation.

The course helps students build a strong business technology portfolio. By the end, students will have a complete product plan that can be used during interviews, internships, or startup pitches.

Assignments

Students will complete assignments on user personas, competitor analysis, product requirement documents, user stories, feature planning, and product metrics.

Quizzes

Quizzes will check understanding of product concepts, customer research, user journeys, product metrics, and business strategy.

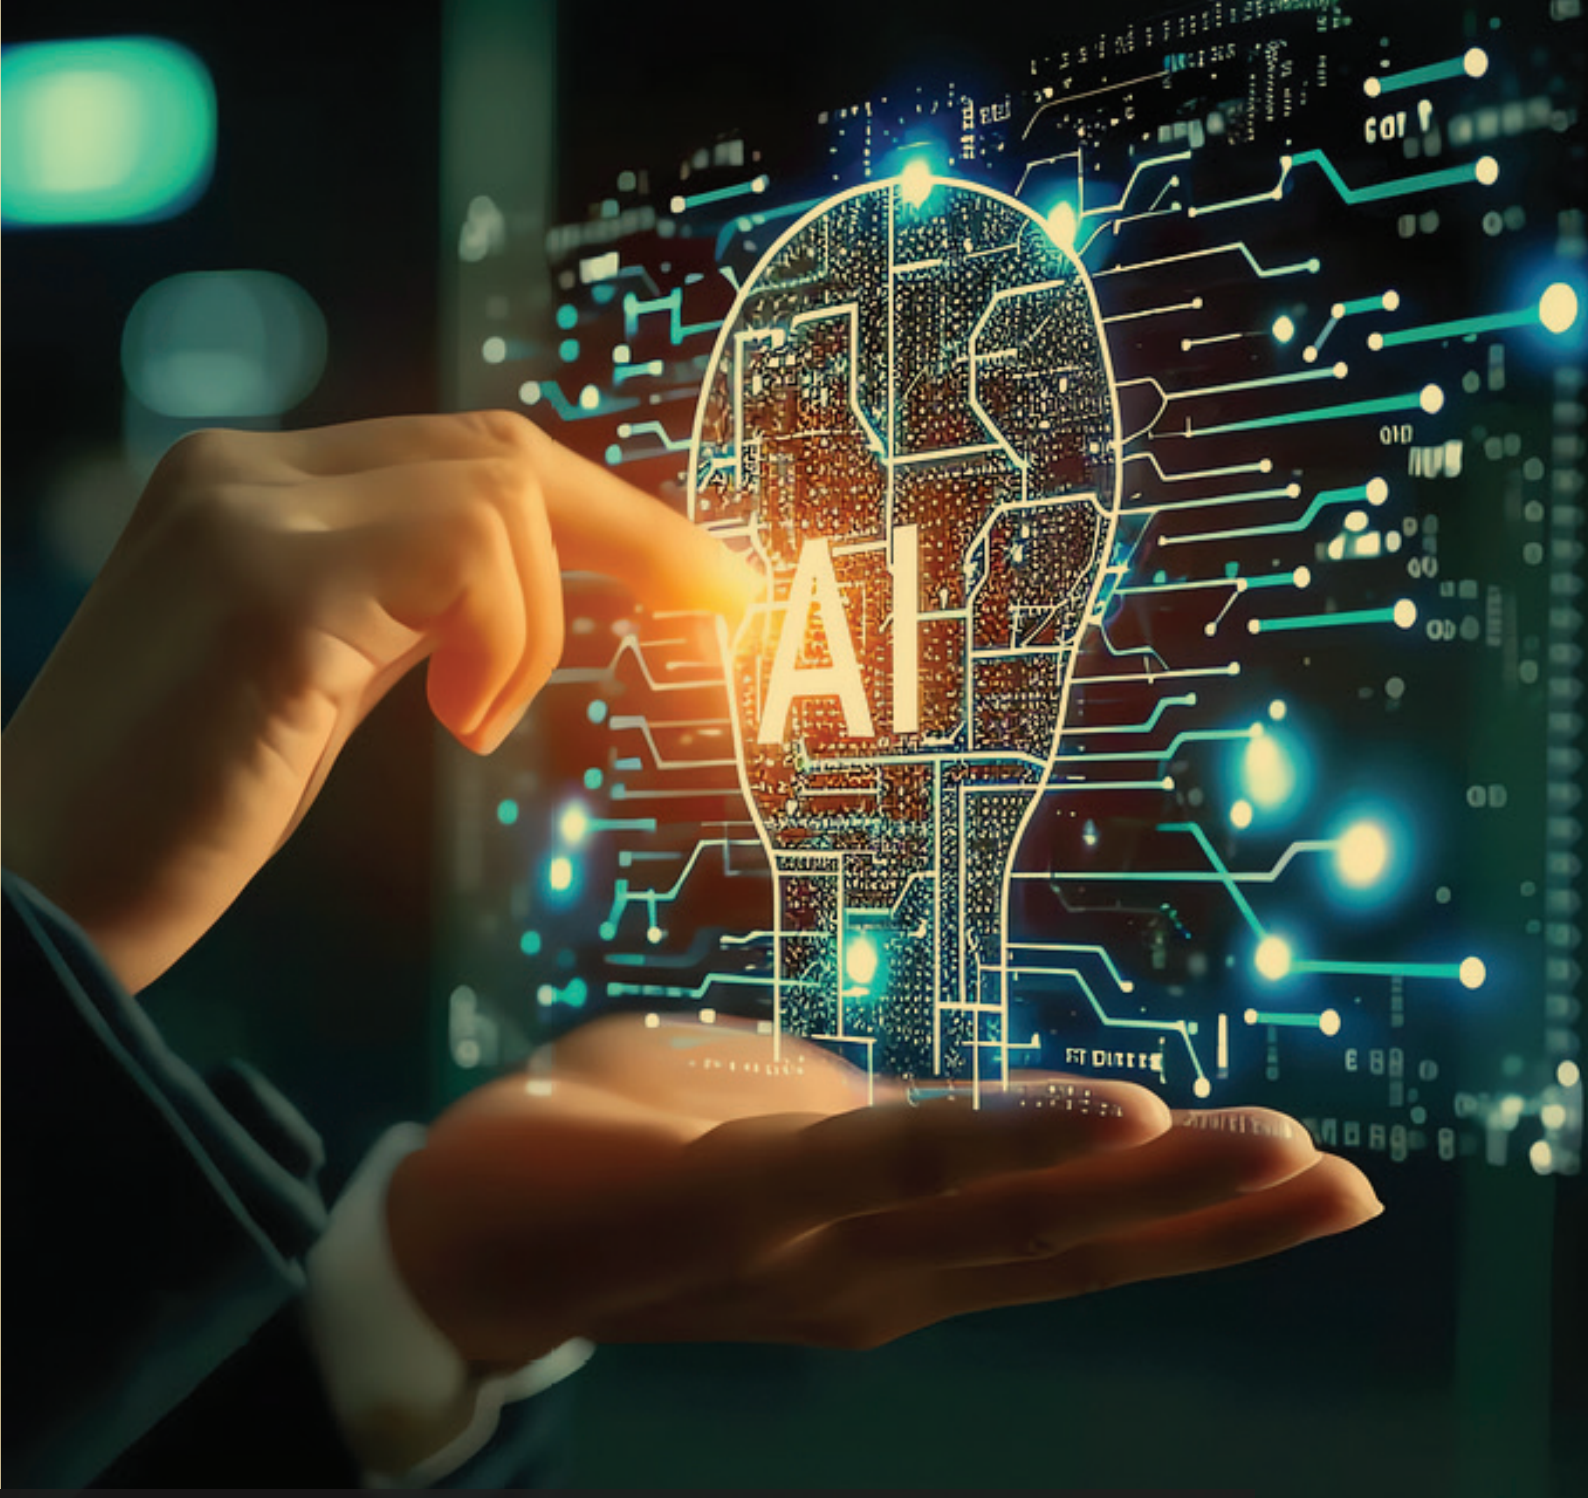

Live Sessions

Live sessions will include product case studies, group discussions, wireframe reviews, and project walkthroughs.

Projects

- Competitor analysis for a digital product
- User persona and customer journey map
- Product requirement document
- Wireframe and feature planning project
- Final capstone: Complete product plan for an app or platform

Course Curriculum & Tools

Tools Covered:

Course Curriculum

✳ Introduction to Product Management

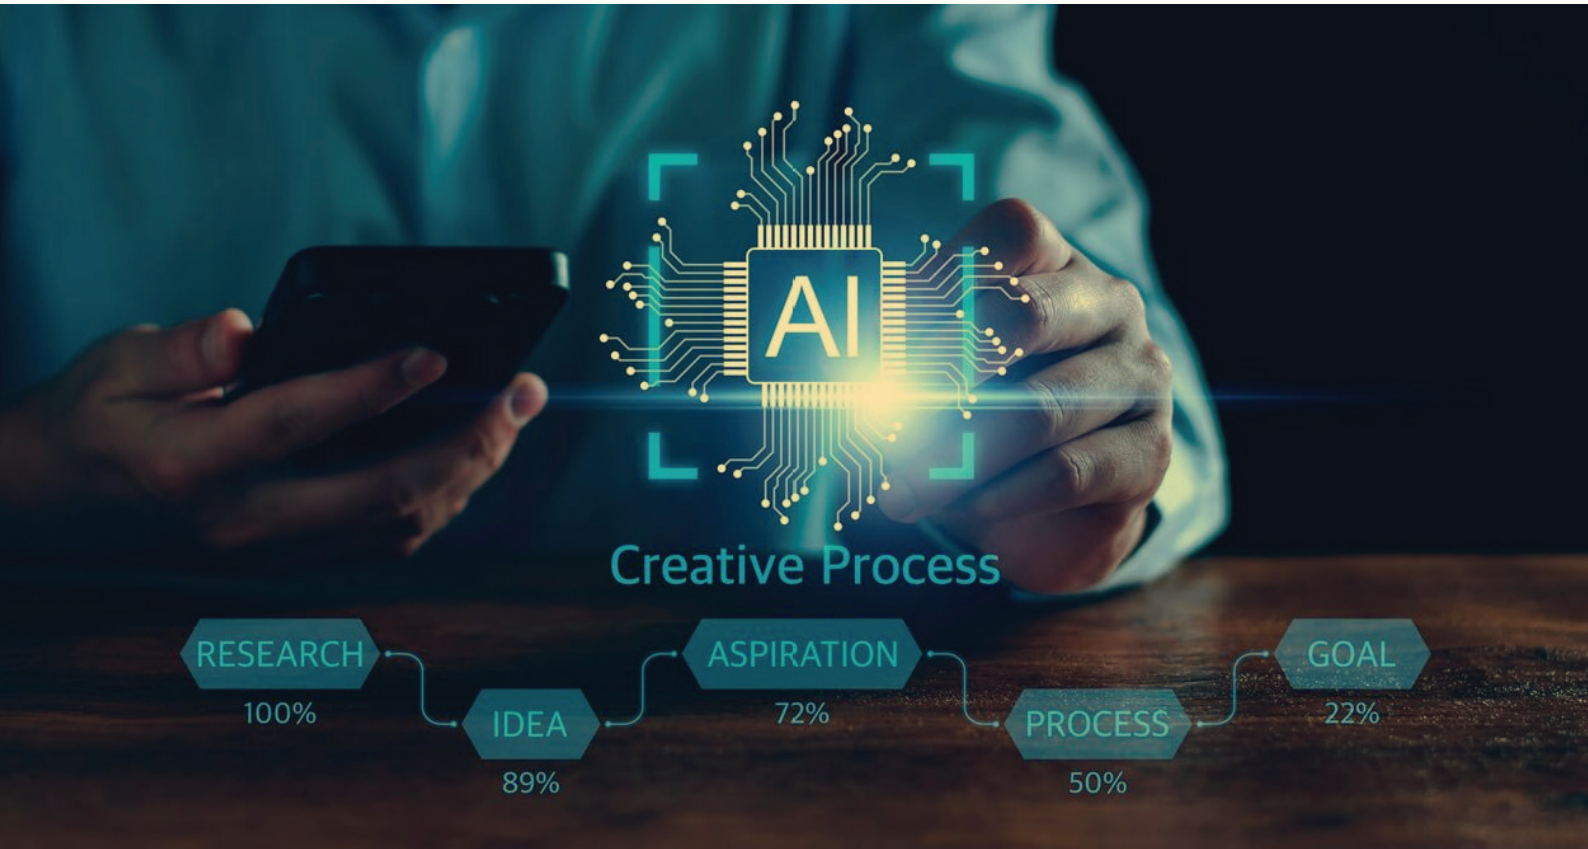

- Students learn what product managers do and how product roles connect business, design, and technology.

✳ User and Market Research

- Students learn customer interviews, surveys, competitor study, user personas, and problem statements.

✳ Product Planning and Documentation

- Students learn product requirement documents, user stories, feature lists, and product roadmaps.

✳ UX Basics for Product Managers

- Students learn user journeys, wireframes, usability basics, and how to work with designers.

✳ AI for Product Work

- Students learn how AI can support research, feature ideas, documentation, feedback summaries, and presentation writing.

✳ Product Metrics and Growth Thinking

- Students learn basic product metrics such as activation, retention, engagement, conversion, and user feedback.

✳ Final Capstone Project

- Students create a complete product plan for a mobile app, website, or SaaS product.

What Benefits You Will Gain From the Course

Course Certificate

Students receive an Eduden certificate after completing assignments and the capstone project.

Practical Product Experience

Students work on documents and deliverables used in startups and product teams.

Portfolio Development

Students build a product portfolio with PRDs, user journeys, wireframes, competitor analysis, and launch plans.

Ready for Interviews

Students learn how to explain product thinking, user problems, business value, and feature decisions.

Career Path After This Course

This course helps business students enter digital product and technology aligned roles.

Possible Career Roles

- Product Management Trainee
- Business Analyst
- Product Analyst Trainee
- Project Coordinator
- Startup Operations Associate
- Business Strategy Associate
- Digital Product Executive
- Customer Success Associate

How It Helps in CV Building

Students can add a complete product case study to their CV. This helps them stand out for internships and jobs where companies want people who understand both business and digital products.

Next Learning Step

Students can continue into UI UX Design, Business Analytics, AI for Business Strategy, or Full Stack Product Understanding.
