Artificial Intelligence Course With Eduden

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Natural Language Processing (NLP) & LLMs with Hugging Face - 60 Days Hands-On Course

Learn to Teach AI How to Read, Write, and Understand Human Language – Master NLP Models, Transformers & Build AI Assistants

This course is designed for developers, data scientists, and AI enthusiasts who want to learn how to process, analyze, and build intelligent systems that understand text and language — from chatbots to translation engines to text summarizers.

You'll go from classic NLP tasks to cutting-edge transformer models and large language models (LLMs) using libraries like spaCy, Hugging Face Transformers, and OpenAI.

Duration: 60 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Intermediate to Advanced

Track: Natural Language Processing, Generative AI, Applied AI

Tools Covered: Python, spaCy, NLTK, Hugging Face Transformers, OpenAI API, TensorFlow/Keras, LangChain, Streamlit

Course Objective

To give learners hands-on experience with processing, analyzing, and generating human language using traditional NLP techniques and modern LLMs, enabling them to build everything from classifiers to chatbots and Q&A systems.

Who Can Join

- AI/ML students or professionals
- Python developers exploring text/AI
- Data scientists breaking into NLP
- Tech entrepreneurs building smart tools

Course Curriculum

Module 1

Fundamentals of NLP

- Text preprocessing: tokenization, stemming, lemmatization
- Stopwords, POS tagging, N-grams
- Vectorization: Bag of Words, TF-IDF
- Hands-on: Build a spam classifier with Scikit-learn

Module 2

NLP with spaCy & NLTK

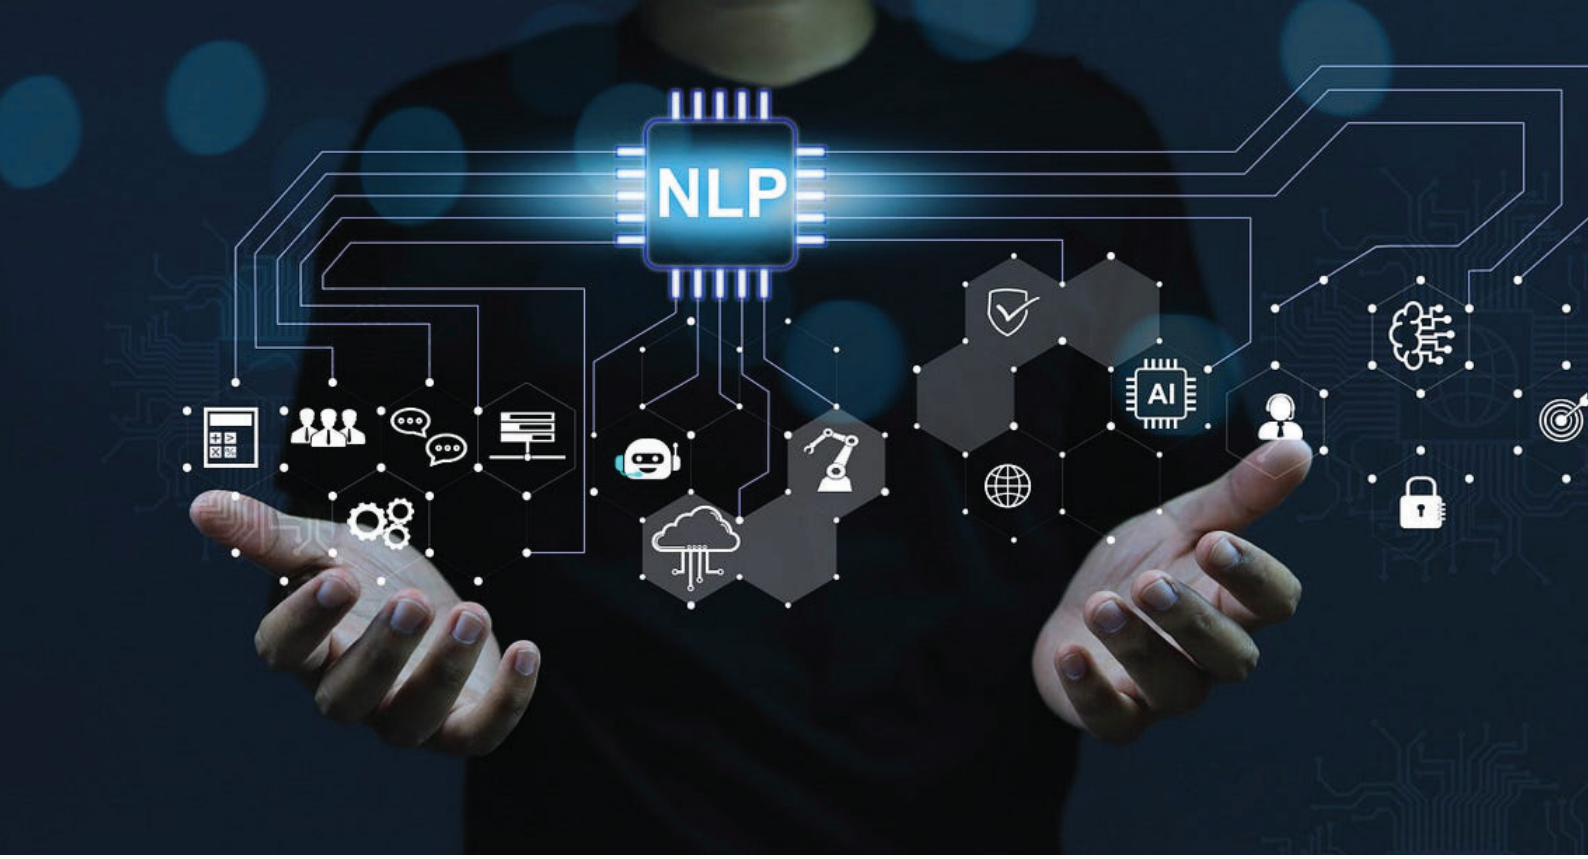

- Named Entity Recognition (NER)
- Dependency parsing
- Text summarization & sentiment analysis
- Hands-on: Create a text summarizer using spaCy

Module 3

Deep Learning for NLP

- Word embeddings (Word2Vec, GloVe)
- RNNs, GRUs, and LSTMs
- Sentiment analysis using Keras
- Hands-on: Build a movie review sentiment classifier

Module 4

Transformers & Hugging Face

- Intro to transformers (BERT, RoBERTa, T5)
- Tokenizers, attention, fine-tuning
- Hugging Face pipelines: text classification, summarization, translation
- Hands-on: Fine-tune BERT for a custom classification task

Module 5

Working with LLMs & ChatGPT APIs

- Chat-based apps using GPT APIs
- Prompt design and message structuring
- OpenAI, Cohere, Claude API basics
- Hands-on: Build a chatbot using GPT-4 and LangChain

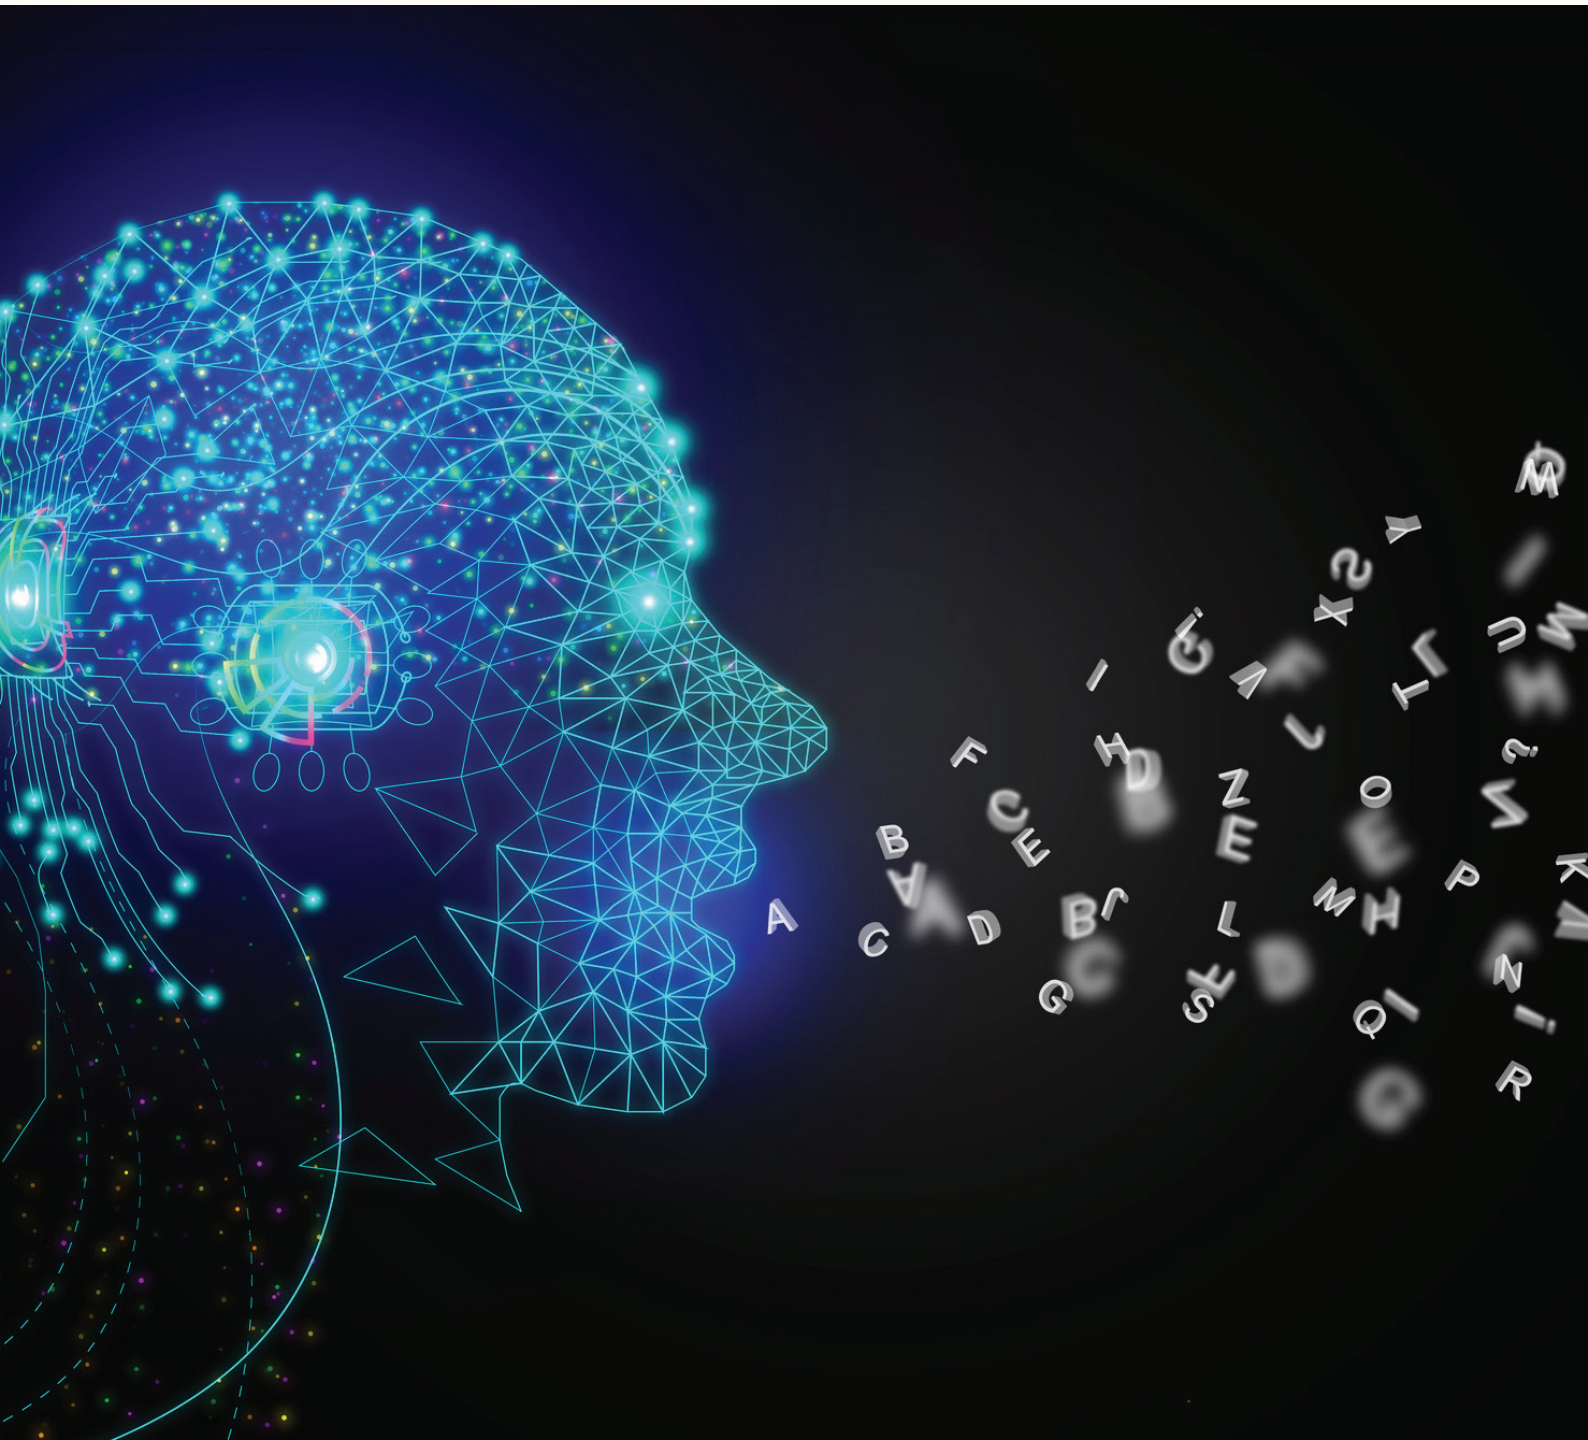

Module 6

Final Capstone Project

Choose from:

- AI Resume Screener
- Legal/NLP Document Classifier
- Custom GPT-based Chat Assistant
- Real-time Sentiment Dashboard

Deliverables: Streamlit demo + GitHub repo + PDF report

Certification

- Eduden Certificate in NLP & LLMs (Hugging Face + GPT)
- Final project + notebook submission required
- Bonus: GitHub + deployment tips for chatbot hosting

Career Roles You'll Be Ready For

- NLP Engineer
- AI Assistant Developer
- ML Engineer – NLP Track
- LLM Integrator / API Developer
- Text Mining/Data Analyst
- Prompt Engineer (Advanced)

Course Highlights

- 60 Days of NLP & LLM Training with Hugging Face and GPT
- Best NLP + AI Assistant Course in India
- Build Your Own Chatbot & Language Classifier
- Certificate from Eduden – AI-Driven Skill Institute
- Hybrid Format – Online or In-Person at Eduden, Kolkata
- Projects with BERT, GPT, LangChain & spaCy
- Portfolio-Ready Project + Resume Tips for NLP Careers
- Great for Students, Developers & Freelancers
