2026 App Development Course With Eduden

Start Your Career in App Development

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Full Stack Mobile App Development – Flutter (Frontend) + Django (Backend)

Course Objective

To train you to become a complete mobile app developer, capable of designing modern, cross-platform mobile apps using Flutter, while building powerful, secure, and scalable REST APIs using Django.

This full stack mobile track is ideal for learners who want to launch their own apps, freelance full-time, or get placed in backend/frontend mobile developer roles.

Duration: 90Days

Format: Hybrid (Online + Offline at Eduden, Kolkata)

Level: Beginner to Intermediate

Who Can Join

- Beginners with basic programming knowledge
- Python or Flutter learners who want to go full stack
- Freelancers or entrepreneurs building cross-platform apps
- Students and job seekers in mobile or backend development

Course Breakdown

Module 1

Dart & Flutter Fundamentals

- Dart Basics: Variables, Functions, Control Flow
- Flutter Widgets: Column, Row, Container, Image
- App Navigation, Routes, Bottom Tabs
- Hands-on: Build a multi-page personal info app

Module 2

Flutter UI & State Management

- Layout Design with Flexbox & Material UI
- Forms, Inputs, and Validations
- State Management (setState, Provider Intro)
- Theme Customization & Reusability
- Hands-on: Create a product or service listing UI

Module 3

Django Backend & API Development

- Django Project & App Structure
- Models, Admin Panel, Views, URLs
- Django REST Framework (DRF) for API creation
- Token-Based Authentication
- Hands-on: Build a REST API with CRUD + Auth for mobile app

Module 4

Connecting Flutter to Django REST API

- HTTP Requests in Flutter (http, dio)
- Fetching & Posting data from Flutter
- Login, Register, and Protected Routes
- Displaying API data in dynamic widgets
- Hands-on: Login/Register UI + API Integration

Module 5

Final Capstone & Deployment

- Integrating full stack (auth + dashboard + user profile)
- Building and testing APK
- Hosting Django Backend (Render / Railway)
- Final Project: Full Stack App (e.g. Task Manager, Booking App, Ecommerce App)

Projects You'll Build

- Personal Info App with Navigation
- UI for Service or Product Listing
- Django CRUD API with User Auth
- Flutter App Consuming Django API
- Final Full Stack Capstone App

Career Prep & Support

- Resume + GitHub Project Setup
- App Store/Play Store Publishing Walkthrough
- Freelancing & Upwork Profile Tips
- Mock Interviews & Developer Career Planning

Certification

- Eduden Certificate in Full Stack Mobile App Development
- Portfolio Review & Final Project Presentation
- GitHub-hosted frontend + backend source code

Course Highlights

- 90 Days of Full Stack Mobile App Development Training
- Flutter for Frontend + Django REST API for Backend
- Best Django + Flutter Full Stack Course in India
- Designed for Freelancers, Job Seekers & Founders
- Certificate from Eduden – Tech-First Institute in Kolkata
- Hybrid Learning – Attend Online or In-Person
- Build & Launch Real Apps
- Backend Auth, UI State, API Integration, Deployment – All Covered
