2026 Bigdata Course With Eduden

Start Your Career in Bigdata

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Big Data Engineering - Hadoop, Spark, Kafka Career Track

Course Objective

To give learners the knowledge, tools, and real-world experience to work with large-scale datasets, build ETL pipelines, process real-time data streams, and prepare for roles like Big Data Engineer, Data Pipeline Developer, or DataOps Specialist.

You'll go from foundational data concepts to building real pipelines with Hadoop, Spark, Kafka, and Airflow — all with hands-on projects, cloud integration, and GitHub-ready portfolio building.

Duration: 90 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Beginner to Intermediate

Track: Data Engineering, Big Data Infrastructure

Capstone Project: End-to-end Data Pipeline Deployment

Who Can Join

- Beginners with basic Python or SQL knowledge
- Computer science students or recent graduates
- Developers and system engineers transitioning to data
- Professionals aiming for roles in data engineering, analytics, or ML ops

Course Breakdown

Module 1

Big Data Foundations & Ecosystem Overview

- What is Big Data? 5 Vs of Big Data
- Batch vs Stream processing
- Hadoop ecosystem components overview
- Real-world use cases (e-commerce, finance, healthcare, telecom)
- Hands-on: Explore a large dataset & plan a pipeline

Module 2

Hadoop & HDFS

- HDFS architecture: NameNode, DataNode
- File distribution & replication
- Writing & reading data into HDFS
- Using hdfs dfs CLI
- Hands-on: Load and query large datasets using HDFS

Module 3

Apache Hive, Pig & MapReduce

- HiveQL & table creation
- Partitioning, bucketing, optimization
- MapReduce overview & writing custom jobs (Java intro)
- Hands-on: Create Hive table & run analytical queries

Module 4

Apache Spark – Batch & Real-Time Processing

- RDDs vs DataFrames vs Datasets
- Spark SQL & transformation pipelines
- PySpark hands-on labs
- Spark Streaming intro
- Hands-on: Build an ETL pipeline using PySpark

Module 5

Apache Kafka – Real-Time Data Streaming

- Kafka architecture (brokers, topics, partitions)
- Producers, consumers, offset management
- Kafka Connect & schema registry
- Hands-on: Stream logs from a simulated source to Kafka topic

Module 6

Orchestration with Apache Airflow

- DAGs, operators, scheduling
- Integrating Airflow with Spark/Kafka
- Logging, retries, task dependencies
- Hands-on: Automate your data pipeline with Airflow

Module 7

NoSQL & File Formats for Big Data

- File formats: Avro, Parquet, ORC
- Intro to HBase & Cassandra
- Understanding CAP theorem
- Hands-on: Read/write Parquet datasets in Spark

Module 8

Cloud-Based Big Data Tools (AWS Focus)

- AWS S3 as data lake
- AWS EMR overview (Hadoop/Spark in cloud)
- Redshift & Athena (Intro)
- Hands-on: Process HDFS-style data using Spark on EMR

Module 9

Final Capstone Project

- Build an end-to-end pipeline using:
    1. Kafka (ingestion)
    2. Spark (processing)
    3. Hive (storage/analytics)
    4. Airflow (orchestration)
- Deploy to cloud/local infra
- Submit GitHub + documentation

Certification

- Eduden Certificate in Big Data Engineering
- Capstone Project Review + GitHub Portfolio Submission
- Optional roadmap to certifications:
    1. CCA Spark & Hadoop Developer
    2. AWS Big Data Specialty
    3. Google Data Engineer Certification

Career Roles You'll Be Ready For

- Big Data Engineer
- Data Pipeline Developer
- Kafka/Spark Developer
- DataOps Engineer
- Junior Data Architect
- Cloud Data Engineer

Course Highlights

- 90 Days of Real Big Data Engineering Practice
- Best Big Data Training in India with Projects
- Tools Covered: Hadoop, Hive, Spark, Kafka, Airflow, PySpark
- Deploy on Local + AWS Cloud Environment
- Certificate from Eduden – India's Skill-Focused Tech Institute
- Hybrid Mode: Online & Offline Options in Kolkata
- Resume, GitHub & Interview Support
- Portfolio-Driven Capstone Project
