2026 Blockchain Course With Eduden

Start Your Career in Blockchain

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Blockchain Essentials - Learn & Build Decentralized Systems (45 Days Course)

Course Objective

To help learners understand the core concepts of blockchain technology, the Ethereum ecosystem, and how to build decentralized applications (dApps) using Solidity and smart contracts.

By the end of this course, you'll build and deploy your own smart contract, interact with the blockchain using web3.js or ethers.js, and have a solid foundation in the decentralized future.

Duration: 45 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Beginner to Intermediate

Track: Blockchain Development, Crypto & Web3

Who Can Join

- Developers, computer science students, or tech enthusiasts
- Beginners with interest in crypto, NFTs, Web3, or DeFi
- Entrepreneurs looking to build Web3 startups
- Freelancers and engineers entering the blockchain space

Course Breakdown

Module 1

Blockchain Fundamentals & Cryptography Basics

- What is blockchain? Why does it matter?
- Blocks, hashes, consensus, decentralization
- Public vs private blockchains
- Cryptographic keys, wallets, hashes
- Hands-on: Create a crypto wallet and interact with a blockchain explorer

Module 2

Ethereum & Smart Contract Basics

- Ethereum vs Bitcoin vs others
- Ethereum virtual machine (EVM), gas, transactions
- What are smart contracts and how do they work?
- Hands-on: Write your first smart contract using Solidity

Module 3

Solidity Programming & dApp Development

- Variables, mappings, arrays, modifiers, events
- Functions, access control, inheritance
- Security basics (reentrancy, overflow, etc.)
- Hands-on: Build a basic voting or NFT smart contract

Module 4

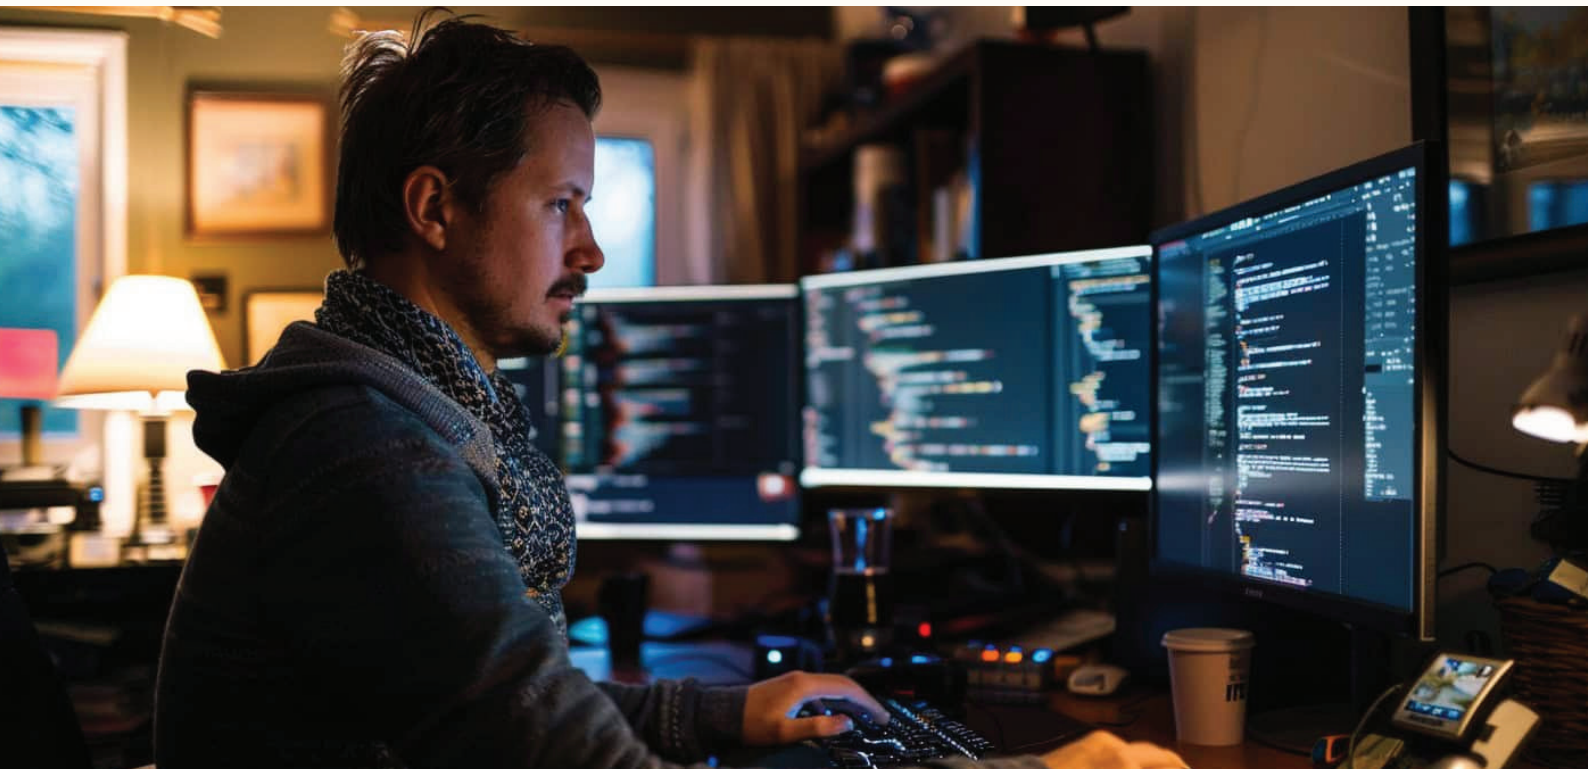

Web3 Integration & Blockchain Frontend

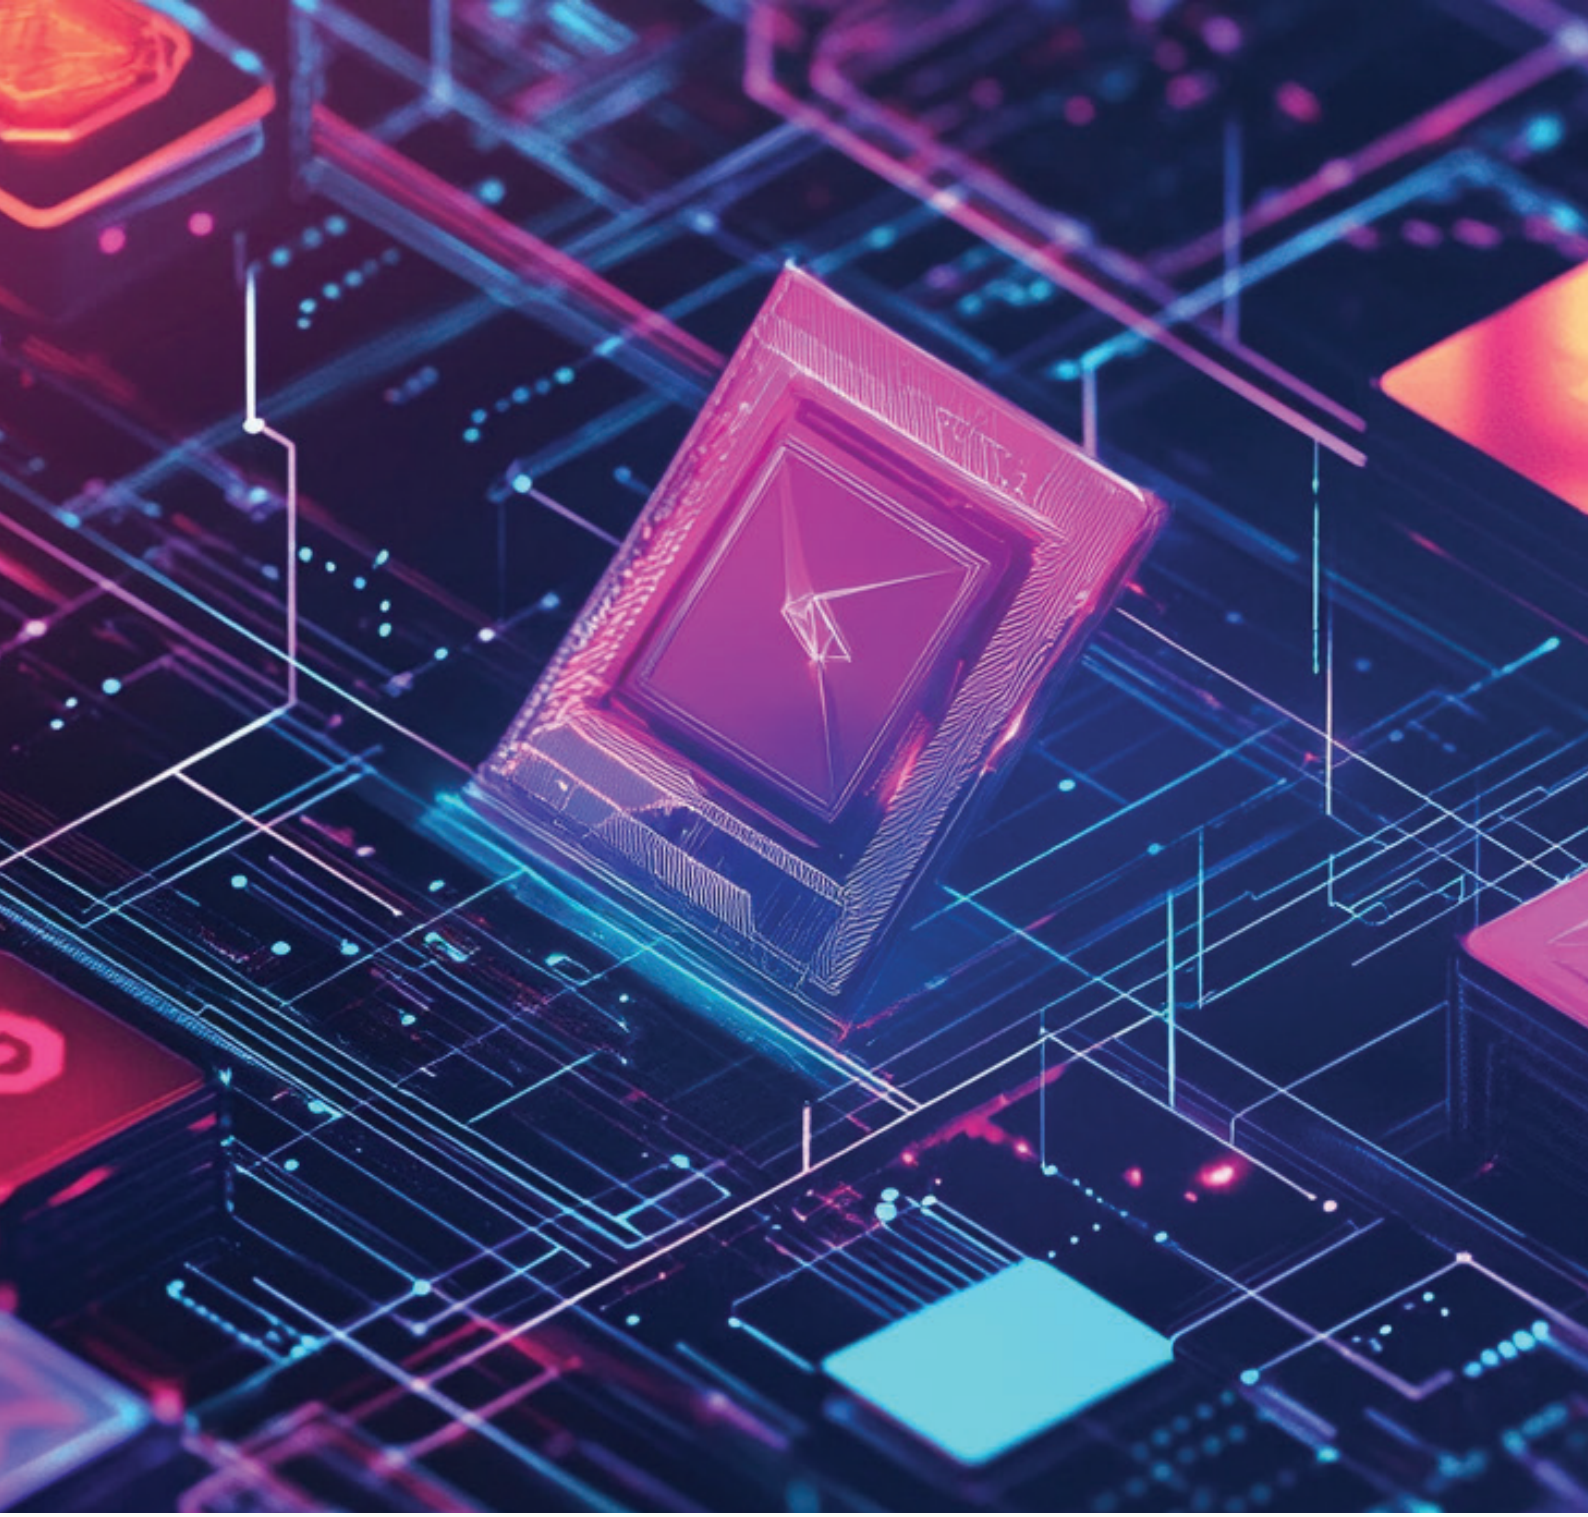

- Using web3.js or ethers.js with HTML/JS
- MetaMask wallet integration
- Reading & writing data to blockchain
- Hands-on: Create a simple frontend to interact with your smart contract

Module 5

Real-World Blockchain Use Cases & Projects

- DeFi, DAOs, NFTs, Token standards (ERC-20, ERC-721)
- Blockchain in supply chain, identity, finance
- Project ideas & structure
- Hands-on: Choose a final project (NFT minting site, DAO voting app, or token swap demo)

Module 6

Final Project + Certification Prep

- Build your own smart contract project
- Deploy on a testnet (Goerli, Sepolia, etc.)
- Project presentation + GitHub submission
- Certification exam with quiz + code review

Projects You'll Build

- Your first Solidity smart contract
- Blockchain-integrated frontend with MetaMask
- NFT smart contract (ERC-721)
- Final project (DAO, token, or NFT app)

Certification

- Eduden Certificate in Blockchain & Web3 Development
- Final project submission + smart contract deployment
- Roadmap for advanced paths (DeFi, DAO, full Web3 dev)

Career Outcomes

- Junior Blockchain Developer
- Web3 Frontend/Backend Engineer
- Smart Contract Auditor (entry level)
- NFT/DeFi Project Builder
- Freelance Web3 Creator

Course Highlights

- 45 Days of Practical Blockchain Training
- Best Blockchain & Web3 Course in India (with Projects)
- Smart Contracts, NFTs, MetaMask, Web3.js – All Covered
- Certificate from Eduden – Tech-First Institute in Kolkata
- Build Real Projects + GitHub Portfolio
- Taught by Web3 Developers with Industry Experience
- Hybrid Format – Online or Offline
- Beginner Friendly, Career Focused
