2026 Cloud Computing Course With Eduden

Start Your Career in Cloud Computing

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

CloudOps Pro – DevOps + Cloud Engineering Training (AWS + Azure)

Course Objective

To equip learners with end-to-end DevOps and cloud engineering skills — including provisioning infrastructure, containerizing apps, automating pipelines, and deploying production-ready systems on AWS and Azure.

You'll go beyond theory and learn by building — so you're ready for DevOps, SRE, Cloud Engineer, and Platform Engineer roles from Day 1.

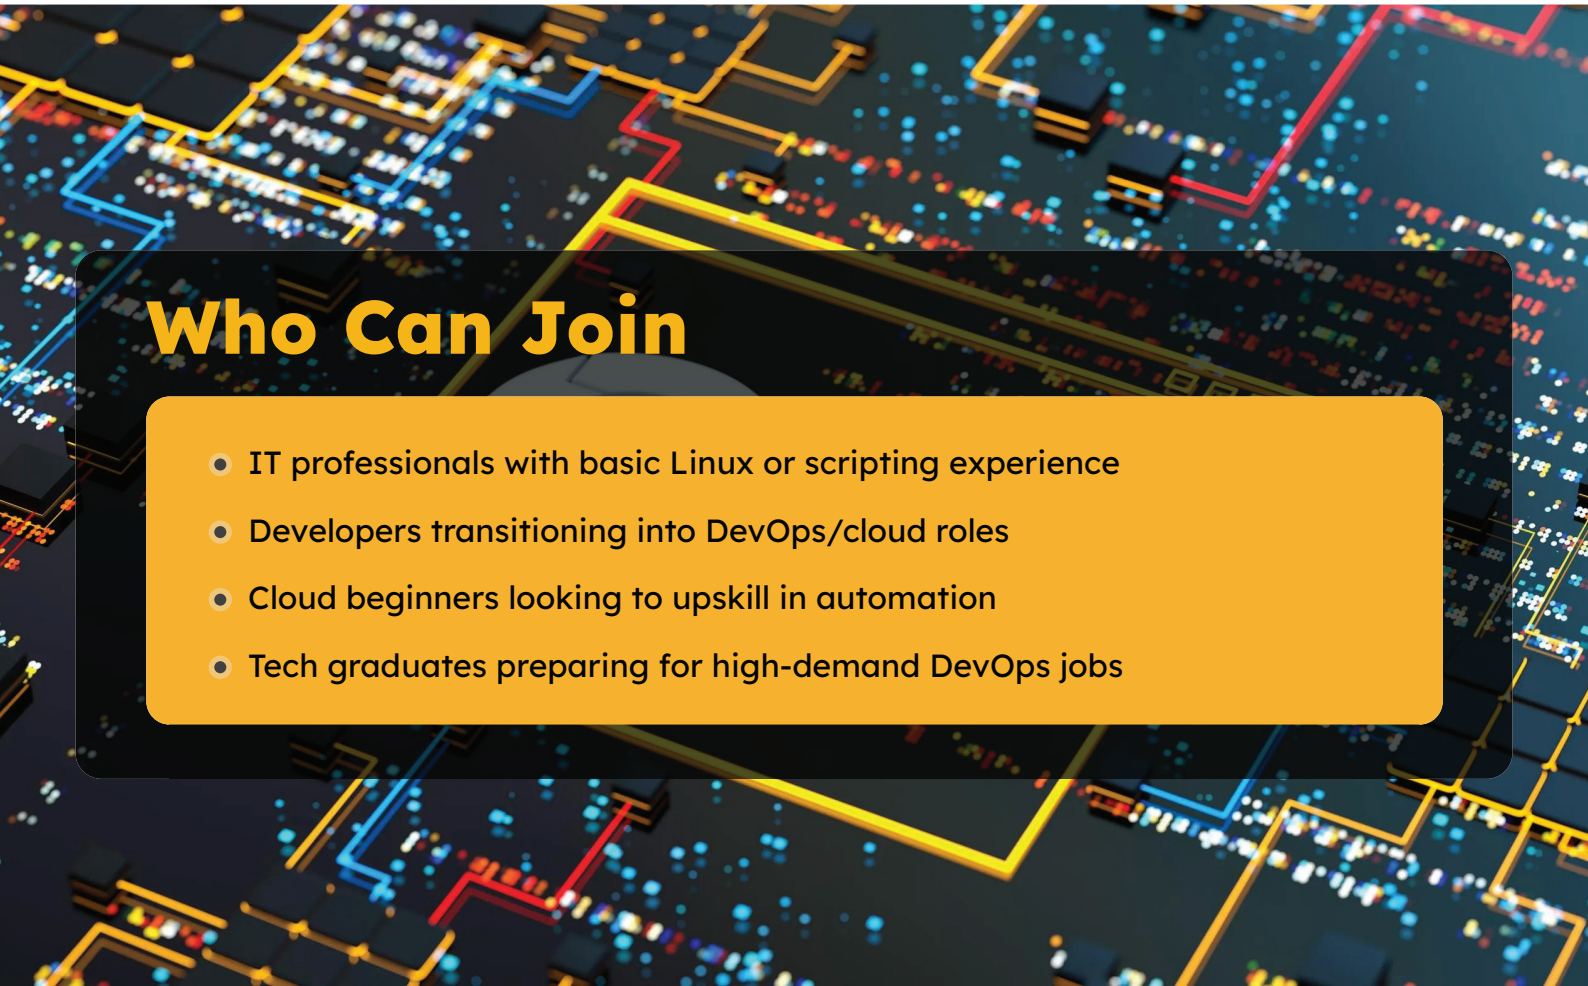

Duration: 90 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Intermediate

Certifications Aligned:

1. AWS Certified DevOps Engineer
2. Microsoft Azure DevOps Engineer Associate
3. CKA (Certified Kubernetes Administrator) [Optional Path]

Who Can Join

- IT professionals with basic Linux or scripting experience
- Developers transitioning into DevOps/cloud roles
- Cloud beginners looking to upskill in automation
- Tech graduates preparing for high-demand DevOps jobs

Course Breakdown

Module 1

DevOps Fundamentals + Linux Mastery

- DevOps lifecycle, Agile + CI/CD culture
- Linux server administration, bash scripting
- Git, GitHub, shell workflows
- Hands-on: Shell script to auto-provision a server

Module 2

AWS Cloud Services for DevOps

- EC2, IAM, VPC, S3, CloudWatch, RDS
- Cloud-native architecture with AWS
- Elastic Load Balancer, Auto Scaling Groups
- Hands-on: Full-stack app deployment on AWS

Module 3

CI/CD with Jenkins & GitHub Actions

- Jenkins pipelines, webhooks, automation
- YAML-based pipelines with GitHub Actions
- CI/CD pipeline for backend + frontend
- Hands-on: Deploy a React + Node app with full CI/CD

Module 4

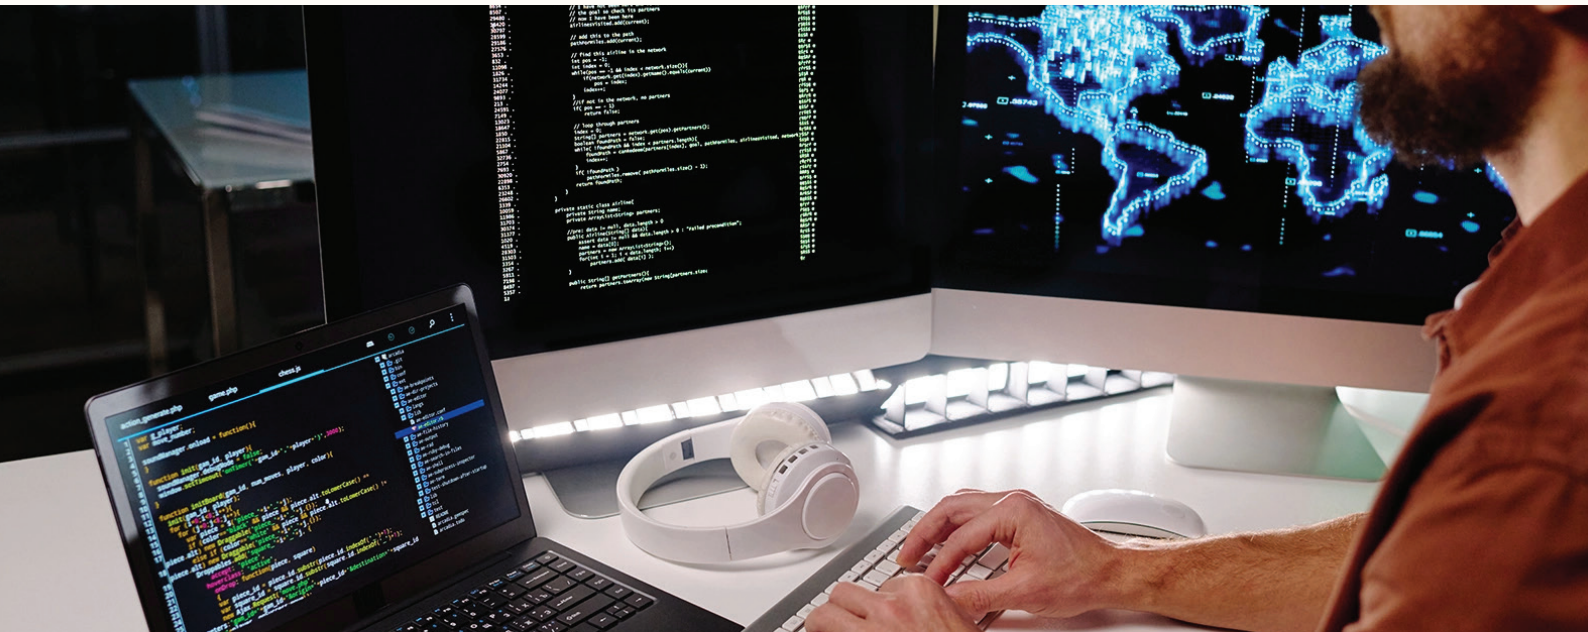

Docker & Kubernetes (AWS + Local)

- Containerization with Docker
- Compose, Volumes, Networking
- Kubernetes architecture (pods, deployments, services)
- Deploy on EKS (AWS) & local Minikube
- Hands-on: Build & deploy a multi-container microservice app

Module 5

Infrastructure as Code (Terraform + CloudFormation)

- Intro to IaC concepts
- Terraform basics: providers, resources, modules
- Provision AWS infra with Terraform
- CloudFormation overview (for AWS-native teams)
- Hands-on: Build and destroy infra with one command

Module 6

DevOps on Azure (Pipelines, Boards, Repos)

- Azure DevOps Services Overview
- Boards + Repos: Agile tracking + source control
- Azure Pipelines for CI/CD
- Infrastructure automation with ARM templates (intro)
- Hands-on: Deploy app on Azure App Service using Azure Pipelines

Module 6

Monitoring, Logging, & Security

- CloudWatch, Prometheus, Grafana
- Log management with ELK stack (intro)
- DevSecOps practices: scanning, secrets, SSH hardening
- Hands-on: Setup alerting + logging for production

Capstone Project

- Build a full DevOps pipeline for a real-world app
- Deploy on AWS & Azure with load balancing, monitoring
- Automate everything with scripts, pipelines, containers
- Submit architecture diagram + code to GitHub

Certification

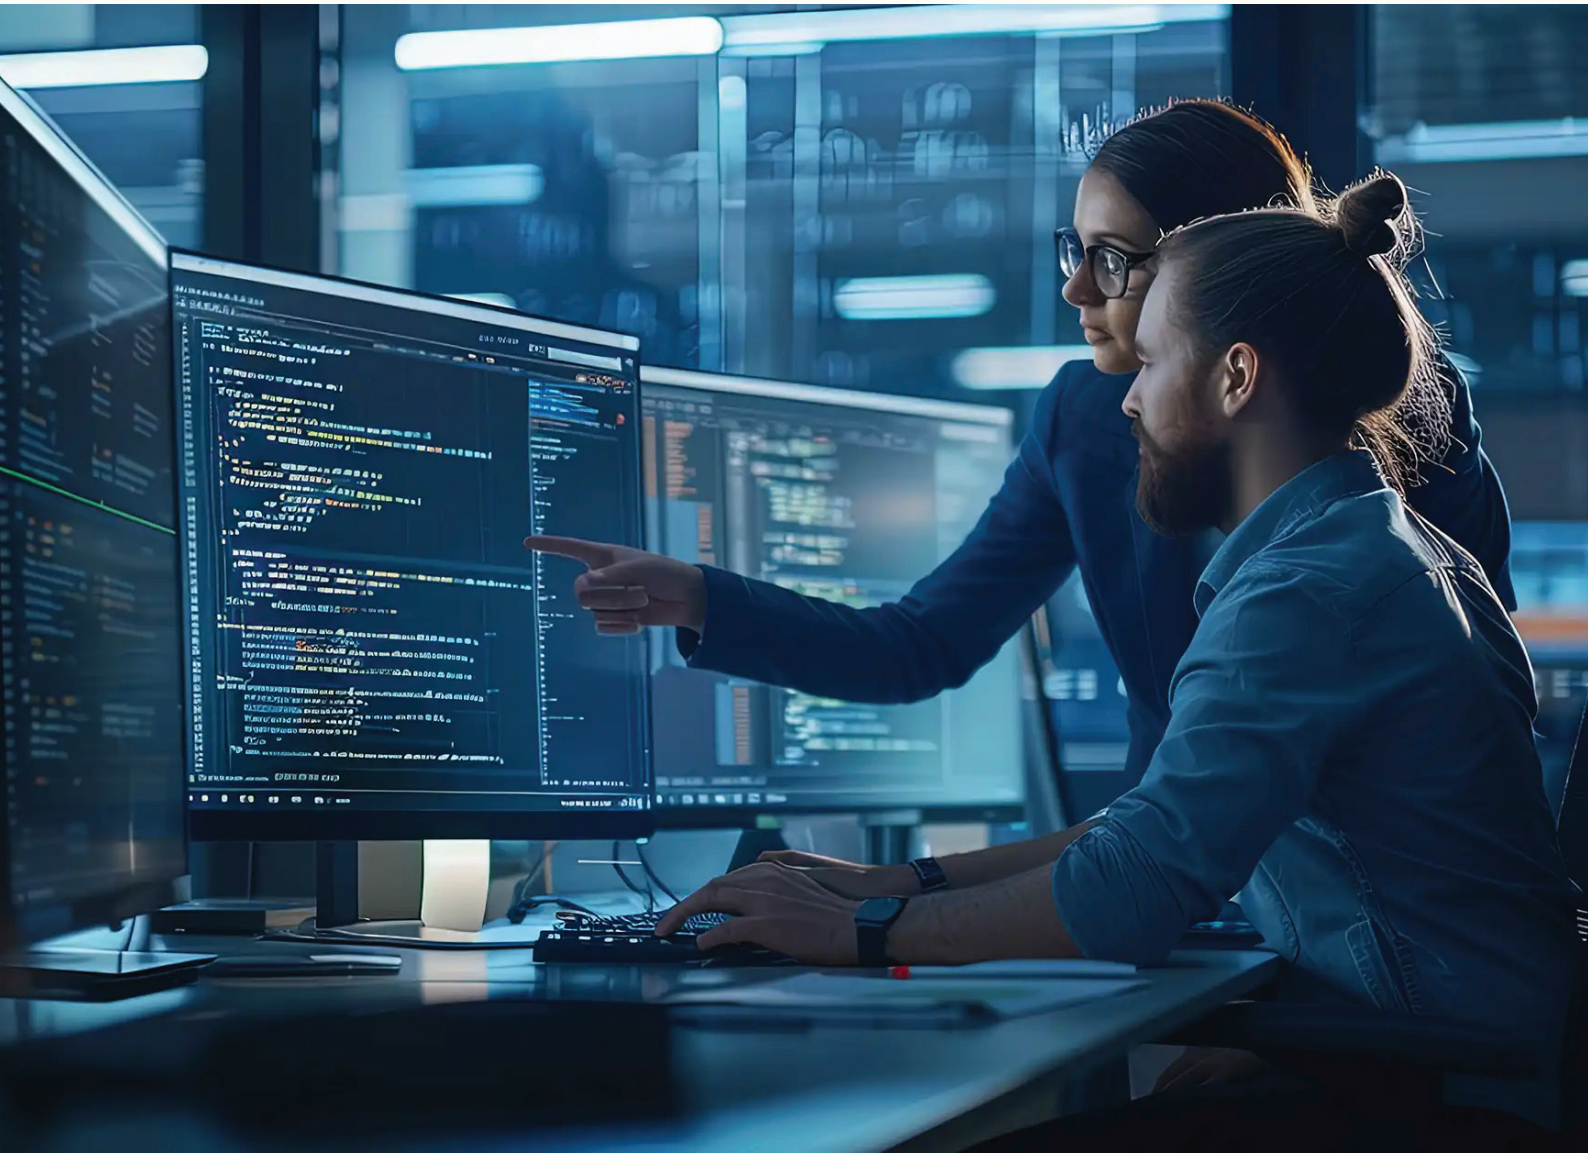

- Eduden Certificate: CloudOps Pro – DevOps + Cloud Engineering
- GitHub-hosted project portfolio
- AWS/Azure certification guidance (exam prep + mock sessions)

Career Roles You'll Be Ready For

- DevOps Engineer
- Cloud Support/Cloud Engineer
- SRE (Site Reliability Engineer)
- Platform Engineer
- Junior DevOps Architect
- Kubernetes/Docker Specialist

Course Highlights

- 90 Days of Hands-On Cloud + DevOps Training
- Best DevOps & Cloud Engineering Course in India
- Covers AWS, Azure, Docker, Kubernetes, Terraform, Jenkins
- Built for Job Seekers, Freelancers & Cloud Teams
- Real Projects + Resume + GitHub Portfolio Support
- Taught by Industry Trainers with Real Deployments
- Hybrid Format – Online or In-Person at Eduden Kolkata
- High-Impact Capstone Project
- Ready for Certifications + Real Interviews
