2026 Cyber Security Course With Eduden

Start Your Career in Cyber Security

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Cloud Security – 60 Days Hands -On Training

Course Objective

Clouds aren't just in the sky — they're running the world.

From startups to banks, every modern company is on the cloud — and someone has to secure it. That's where you come in. This Cloud Security course by Eduden is your hands-on entry into the fast-growing field of cloud infrastructure protection.

Whether you're aiming to work with AWS, Microsoft Azure, or Google Cloud, this course covers the core security services, common misconfigurations, compliance standards, and attack-defense techniques used in modern cloud environments. If you're searching for the best cloud security course in India, especially in Kolkata or West Bengal, you're in the right place.

Duration 60 Days	Lectures 38	Projects 5

Eligibility

To join this course, you should have:

- Basic knowledge of Networking & Linux
- Familiarity with any one cloud platform (AWS, Azure, or GCP)
- Prior knowledge of cybersecurity fundamentals (preferred but not mandatory)

Want to learn how to secure real cloud environments?

- Join our free Cloud Security seminar and discover how the cloud is changing cybersecurity forever.

Course Overview

This 60-day hands-on course takes you through the entire lifecycle of securing cloud infrastructure — from IAM policies and network security groups to real-world vulnerabilities, threat detection, DevSecOps, and compliance.

You'll work inside actual AWS, Azure, and GCP environments, simulating attacks, writing policies, implementing security controls, and using tools like CloudTrail, GuardDuty, Azure Defender, and GCP Security Command Center.

It's one of the most comprehensive cloud security certification courses in India — designed to make you job-ready for roles like Cloud Security Engineer, DevSecOps Analyst, or SOC+Cloud Hybrid roles.

Assignments

15+ tasks including IAM configuration, bucket hardening, serverless protection, and log monitoring.

Quizzes

Security scenarios, misconfig hunting, and compliance challenges after every section.

Live Sessions

Weekly labs with cloud trainers + walkthroughs of real CVEs & security breaches from the cloud world.

Projects

You'll complete 5 hands-on projects:

- AWS S3 Misconfiguration & Privilege Escalation Lab
- Azure Network Security Rules Simulation
- Cloud IAM Exploitation & Defense with GCP
- Building a Secure Serverless App Deployment Pipeline
- Final Project: Audit & Secure a Multi-Cloud Architecture (with reporting)

Course Curriculum & Tools

Cloud Platforms Covered or Tools & Frameworks:

Curriculum Breakdown

✳ Cloud Fundamentals & Shared Responsibility

- What is cloud security?
- IaaS, PaaS, SaaS Security differences
- Cloud-native threats vs on-prem threats
- Shared Responsibility Model across AWS, Azure, and GCP

✳ Identity & Access Management in the Cloud

- IAM policies, roles, and misconfigurations
- Least privilege and RBAC implementation
- Hands-on: Privilege escalation and mitigation in AWS IAM

✳ Network Security & Firewall Rules

- Virtual Private Clouds (VPCs)
- Security Groups, Network ACLs, Route Tables
- Azure NSGs, GCP Firewall Rules
- Hands-on: Simulate and block lateral movement in cloud networks

✳ Data Protection & Storage Security

- Encrypting data at rest and in transit
- S3 Bucket ACL issues, blob container misconfigs
- Hands-on: Locking down public storage in AWS, Azure, GCP

✳ Threat Detection & Monitoring

- CloudTrail, GuardDuty, Azure Defender, GCP Audit Logs
- Centralized logging and SIEM integration
- Incident response on cloud-native alerts
- Hands-on: Detect brute force and privilege escalation attempts

✳ DevSecOps & Automation (Intro)

- Secure CI/CD pipeline practices
- Static & dynamic security scanning (SAST/DAST)
- Integrating security into Terraform/CloudFormation
- Hands-on: Deploy and secure a serverless app

✳ Compliance & Reporting

- Compliance standards: CIS, NIST, ISO 27001
- Auditing and documentation
- Building a risk-based cloud security report

What You'll Get After Completing the Course

Certificate of Completion

Receive an industry-recognized cloud security certificate from Eduden, trusted by employers across India.

Full Course Access

All videos, labs, cloud labs, and case studies available for the entire 60-day duration. No hidden fees. Just full access to learn & build.

Launch Your Career in Cloud Security

This course prepares you for roles like:

- Cloud Security Engineer
- DevSecOps Analyst
- Cloud Infrastructure Security Specialist
- SOC + Cloud Hybrid Roles And positions you perfectly for certifications like AWS Security Specialty, Azure SC-100, and GCP Professional Cloud Security Engineer.

Course Highlights

- 60 Days of Pure Cloud Security Hands-On Training
- AWS + Azure + GCP – All in One Course
- Best Cloud Security Course in Kolkata, India
- Industry Projects Based on Real Cloud Breaches
- Build Secure Infrastructure from Day One
- Certificate from Eduden – India's Fastest-Growing Cybersecurity Institute
- Resume, LinkedIn, and Interview Guidance
- Weekly Mentor Support from Cloud Professionals
- Hybrid Format – Attend Online or Offline from Kolkata
- Learn What Companies Are Actually Hiring For
