2026 Cyber Security Course With Eduden

Start Your Career in Cyber Security

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Cybersecurity Advanced - Red Team /Blue Team Career Track

Course Objective

To provide learners with a deep, hands-on understanding of offensive and defensive security — including network penetration testing, web app exploits, SIEM-based defense, and incident response. You'll be able to simulate attacks, build defense mechanisms, and respond like a pro in real-world scenarios.

Duration: 90 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Intermediate to Advanced

Track: Ethical Hacking, Penetration Testing, SOC, Incident Response

Tools Covered: Burp Suite, Metasploit, Wireshark, Nmap, Kali Linux, Splunk, SIEMs, OSINT tools, Suricata

Who Can Join

- Ethical hacking/basic cybersecurity course graduates
- IT professionals (Linux/Networking/Security roles)
- Cybersecurity students preparing for advanced certifications
- Individuals aiming for Red Team / Blue Team job roles

Course Curriculum

Red Team Track (Offensive Security)

Module 1

Advanced Reconnaissance & OSINT

- Passive/Active recon, Shodan, theHarvester, Maltego
- Subdomain enumeration, asset discovery
- Social engineering vectors (phishing simulations)
- Hands-on: Target profiling + asset discovery lab

Module 2

Vulnerability Analysis & Exploitation

- Advanced Nmap, Nikto, Nessus scans
- CVE enumeration, privilege escalation
- Exploiting Linux & Windows targets manually
- Hands-on: Exploit vulnerable machines (TryHackMe/Local Lab)

Module 3

Web Application Hacking

- OWASP Top 10 (XSS, SQLi, RCE, IDOR, etc.)
- Manual testing + Burp Suite Pro
- Bypassing WAFs & filters
- Hands-on: Hack a vulnerable web app, extract data, create report

Module 4

Exploiting Active Directory & Post-Exploitation

- Kerberoasting, Golden Ticket attacks
- Lateral movement techniques
- Hashdumping, session hijacking
- Hands-on: Simulate a domain breach in local AD lab

Blue Team Track (Defensive Security)

Module 5

Log Analysis & Threat Detection

- Log formats, Sysmon, OS logs, and web logs
- Building detections in SIEMs (Splunk/Security Onion)
- Indicators of compromise (IOCs), behavioral patterns
- Hands-on: Analyze attack logs and build detections

Module 6

Incident Response & Threat Hunting

- NIST IR lifecycle
- Memory forensics (Volatility), timeline analysis
- Threat hunting playbooks
- Hands-on: Respond to an injected malware incident

Module 7

Network Security Monitoring

- Suricata, Zeek, Wireshark
- Detecting C2, DNS tunneling, MITM
- Rule tuning & alerting
- Hands-on: Monitor simulated attack traffic + generate alerts

Module 8

Blue Team Labs & SOC Simulation

- Live Red Team attacks (you defend)
- SOC dashboard (Splunk, Wazuh or Elastic SIEM)
- Threat Intelligence integration
- Hands-on: Defend against staged attacks and write an IR report

Capstone Project

- Red Team: Plan and execute a simulated full kill chain attack
- Blue Team: Detect, respond, and document the breach
- Submit tools used, attack chain, logs, screenshots, mitigation steps
- GitHub/Notion link + PDF for recruiter-ready submission

Certification

- Eduden Certificate: Cybersecurity Advanced – Red & Blue Team Track
- Completion of labs + capstone
- Prepares for certifications like:
    1. OSCP (Offensive Security Certified Professional)
    2. CompTIA CySA+ / Pentest+
    3. CEH Master

Career Roles You'll BeReady For

- Penetration Tester (Red Team)
- SOC Analyst (Blue Team)
- Incident Responder / Digital Forensics Associate
- Cybersecurity Analyst (Offensive/Defensive)
- Security Operations Center Engineer
- Vulnerability Assessment Specialist

Course Highlights

- 90 Days of Real Red Team & Blue Team Training
- Best Advanced Cybersecurity Course in India
- Simulated Attacks, Incident Response, Live Defense Labs
- Certificate from Eduden – Top Tech Security Training Institute
- Hybrid Format – Learn Online or In-Person at Eduden Kolkata
- Portfolio-Ready Capstone Project
- Interview Prep for Security Analyst & Pentesting Jobs
- Built by Ethical Hackers, for Future Professionals
