2026 Cyber Security Course With Eduden

Start Your Career in Cyber Security

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Digital Forensics – 90 Days Hands -On Training

Course Objective

In today's world, every click leaves a trace — and someone needs to know how to find it. Welcome to Eduden's Digital Forensics course, where you'll learn how to uncover hidden data, trace cybercrimes, and recover digital evidence — all using industry-standard tools and real-world lab simulations.

If you're looking for the best digital forensics course in Kolkata, West Bengal or anywhere in India, this program gives you 90 days of in-depth, hands-on investigation training, built for students and professionals who want to enter the high-demand world of cyber forensics and incident response.

Duration 90 Days	Lectures 48	Projects 6

Eligibility

To enroll, you must have:

- Any basic cybersecurity certification (e.g., CEH, Security+, eJPT) OR
- Relevant work experience in system administration, IT support, cybersecurity, or incident response

Free Seminar Access

Want to see how real-world digital investigations are done?

- Join our free cyber forensics session and explore tools, techniques, and cases with our trainers.

Course Overview

This course covers everything from disk forensics and deleted file recovery to network log analysis and mobile forensics. You'll learn how to use real forensic tools like Autopsy, FTK Imager, Volatility, Wireshark, and Sleuth Kit — and apply them to realistic scenarios involving malware, insider threats, phishing, and digital fraud.

You'll also learn the legal and reporting side of digital forensics, ensuring you can conduct investigations that hold up in a real-world environment — whether it's for a private company, law enforcement, or cyber response team.

If you're planning to become a forensics analyst, incident responder, or even step into cybercrime law, this is the most practical digital forensics training in India to get started.

Assignments

15+ case-based forensic challenges covering memory dumps, disk images, log files, and malware behavior.

Quizzes

Scenario-based tests after each module, focused on forensic tools, evidence chain-of-custody, and investigative procedures.

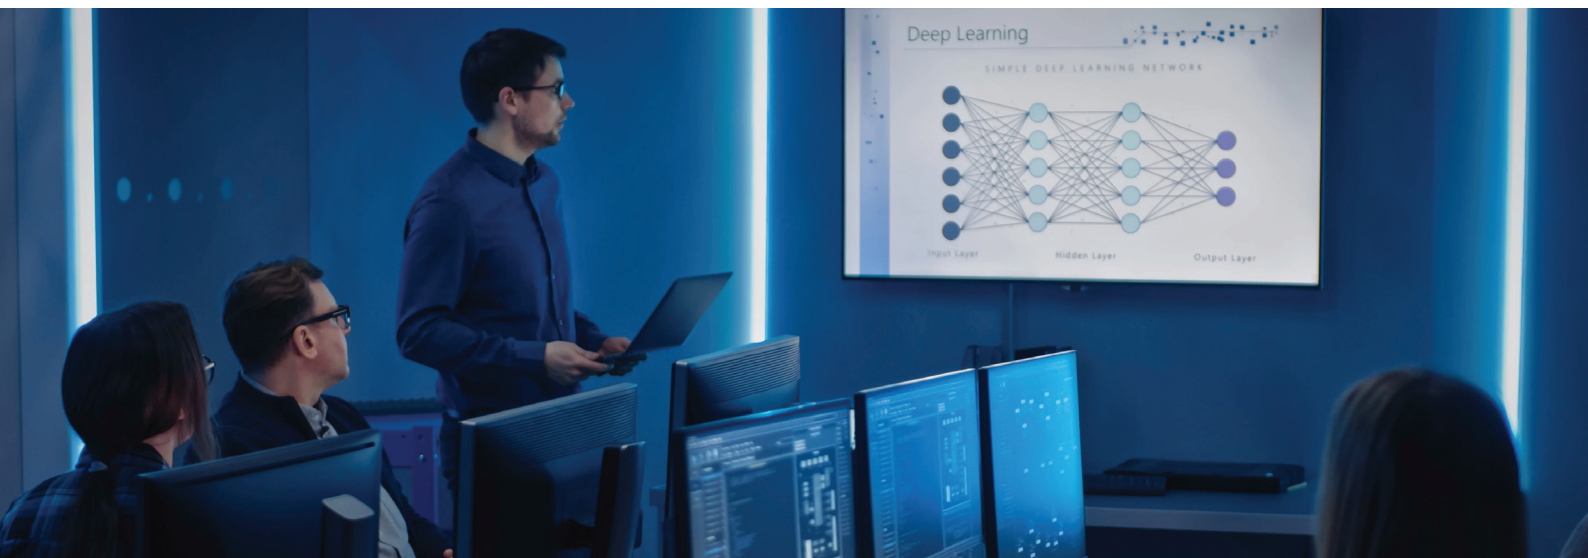

Live Sessions

Weekly walkthroughs of digital crime cases, malware investigations, and open Q&A sessions with industry experts.

Projects

You'll complete 6 hands-on forensics projects:

- Analyze a compromised system image for malware
- Recover deleted evidence from a disk clone
- Trace a phishing attack through logs and metadata
- Extract artifacts from browser and registry history
- Analyze a memory dump to detect process injection
- Final Project: Full forensic report and presentation on a simulated cybercrime case

Course Curriculum & Tools

Primary Tools You'll Learn:

Curriculum Breakdown

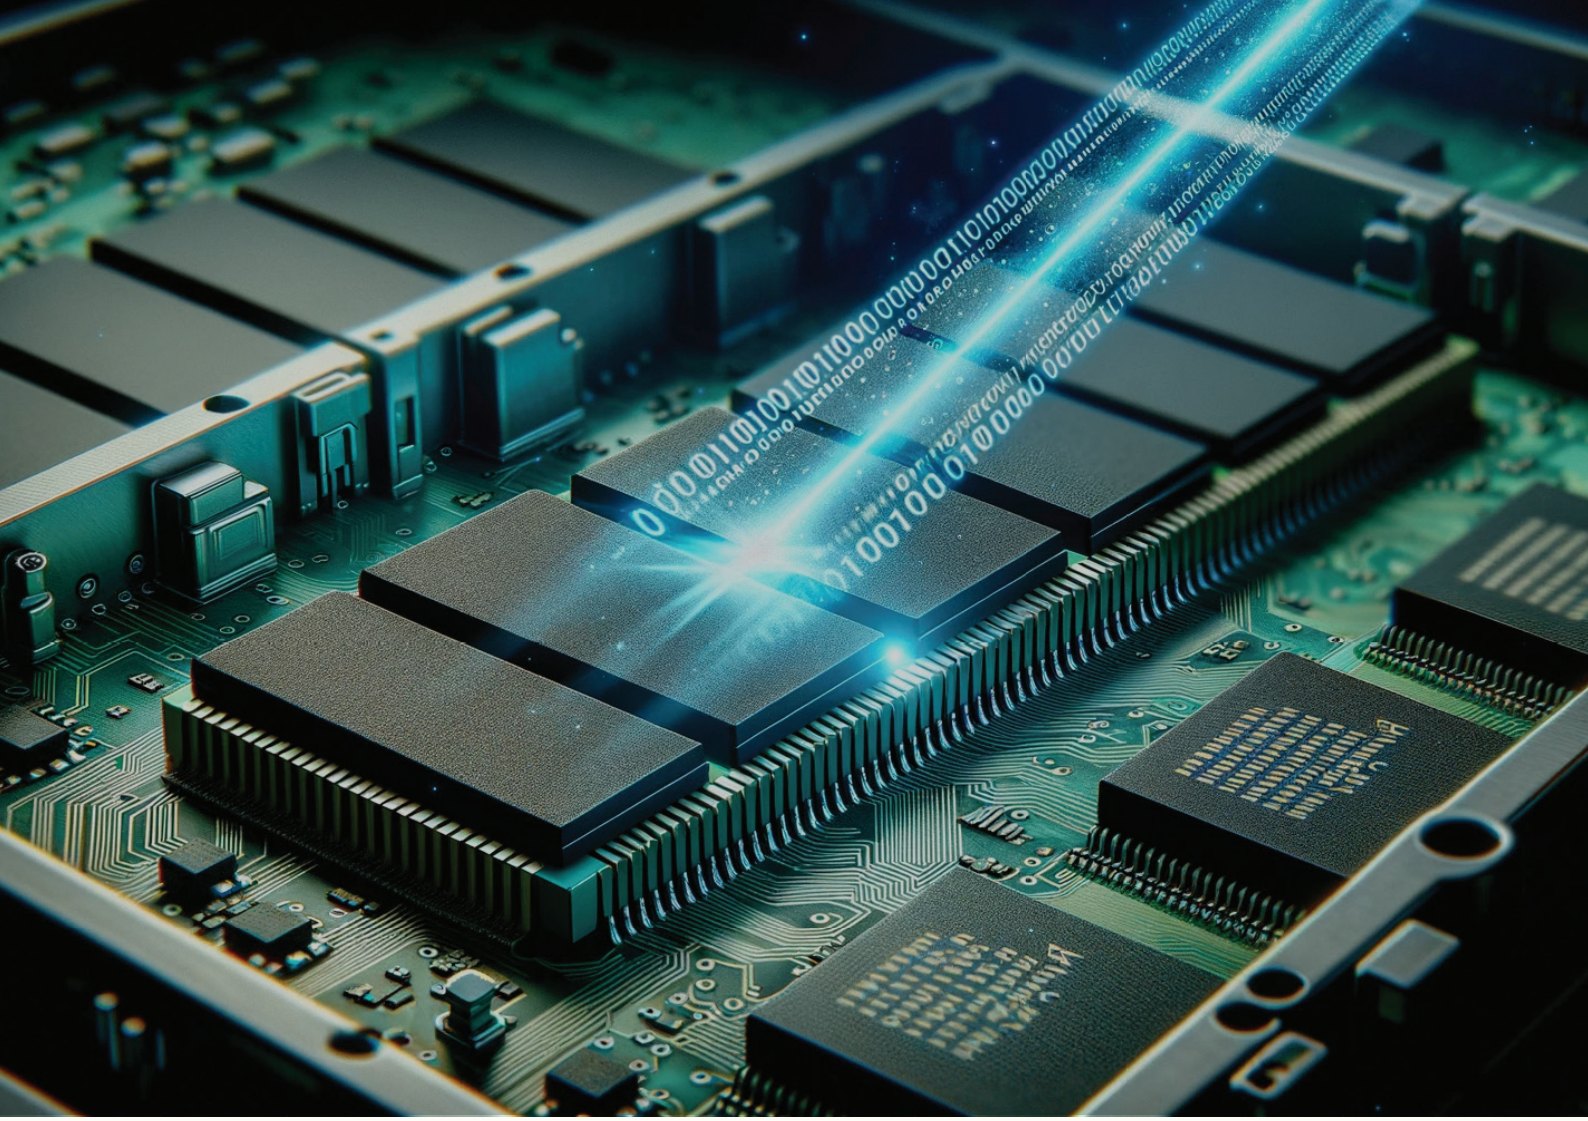

✳ Introduction to Digital Forensics

- What is digital forensics?
- Use cases: criminal investigations, corporate breaches, insider threats
- Role of a forensics analyst in India's legal & IT ecosystem
- Setting up your forensics lab (hardware & software)

✳ Disk & File System Forensics

- FAT, NTFS, and EXT file systems
- Imaging a disk with FTK and analyzing metadata
- File carving and data recovery
- Hidden partitions and slack space
- Hands-on: Recover evidence from a compromised disk

✳ Memory Forensics

- RAM dumps and live analysis
- Detecting hidden processes and injected code
- Volatility deep dive: plugins, automation, case parsing
- Hands-on: Analyze a malware-infected memory dump

✳ Network & Log Analysis

- Network packet capture analysis
- Detecting beaconing, exfiltration, DNS tunneling
- Syslog, Windows Event Logs, and web server logs
- Hands-on: Trace an insider’s digital footprint through logs

✳ Reporting & Chain of Custody

- How to document a forensic investigation
- Legal considerations and admissibility of evidence in India
- Forensics report structure and checklist
- Final capstone: End-to-end case documentation + presentation

✳ Mobile & Cloud Forensics (Intro)

- Basics of mobile OS forensics (Android focus)
- Application artifact extraction (WhatsApp, Browser, Call logs)
- Basics of cloud storage analysis (Google Drive, Dropbox)
- Hands-on: Extract and analyze user data from a rooted emulator

What You'll Get After Completing the Course

Certificate of Completion

Earn your Digital Forensics Certification from Eduden, recognized by cybersecurity firms, law enforcement departments, and tech recruiters across India.

Full Course Access for 90 Days

Access all labs, tools, case files, recordings, and forensic templates throughout your learning journey.

Get Ready for the Real World

This course prepares you for roles such as:

- Digital Forensics Analyst
- SOC Analyst (Level 2)
- Cybercrime Investigator
- Incident Responder
- Threat Intelligence Analyst

Perfect for students preparing for GCFA, CHFI, or EnCE certifications.

Course Highlights

- 90 Days of Real-World Digital Investigation Training
- Best Digital Forensics Course in Kolkata & West Bengal
- Hands-On with Memory, Disk, and Network Forensics
- Learn Tools like Autopsy, FTK, Volatility & Wireshark
- Forensic Reporting & Legal Readiness
- Certificate from Eduden – India's Leading Cybersecurity School
- Designed for Beginners with Basic Cybersec Knowledge
- Hybrid Format – Attend Online or In-Person in Kolkata
- Resume, Report, and Interview Prep Included
- Taught by Real Investigators & Digital Crime Experts
