2026 Cyber Security Course With Eduden

Start Your Career in Cyber Security

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

SOC Analyst – 60 Days Hands-On Training

Course Objective

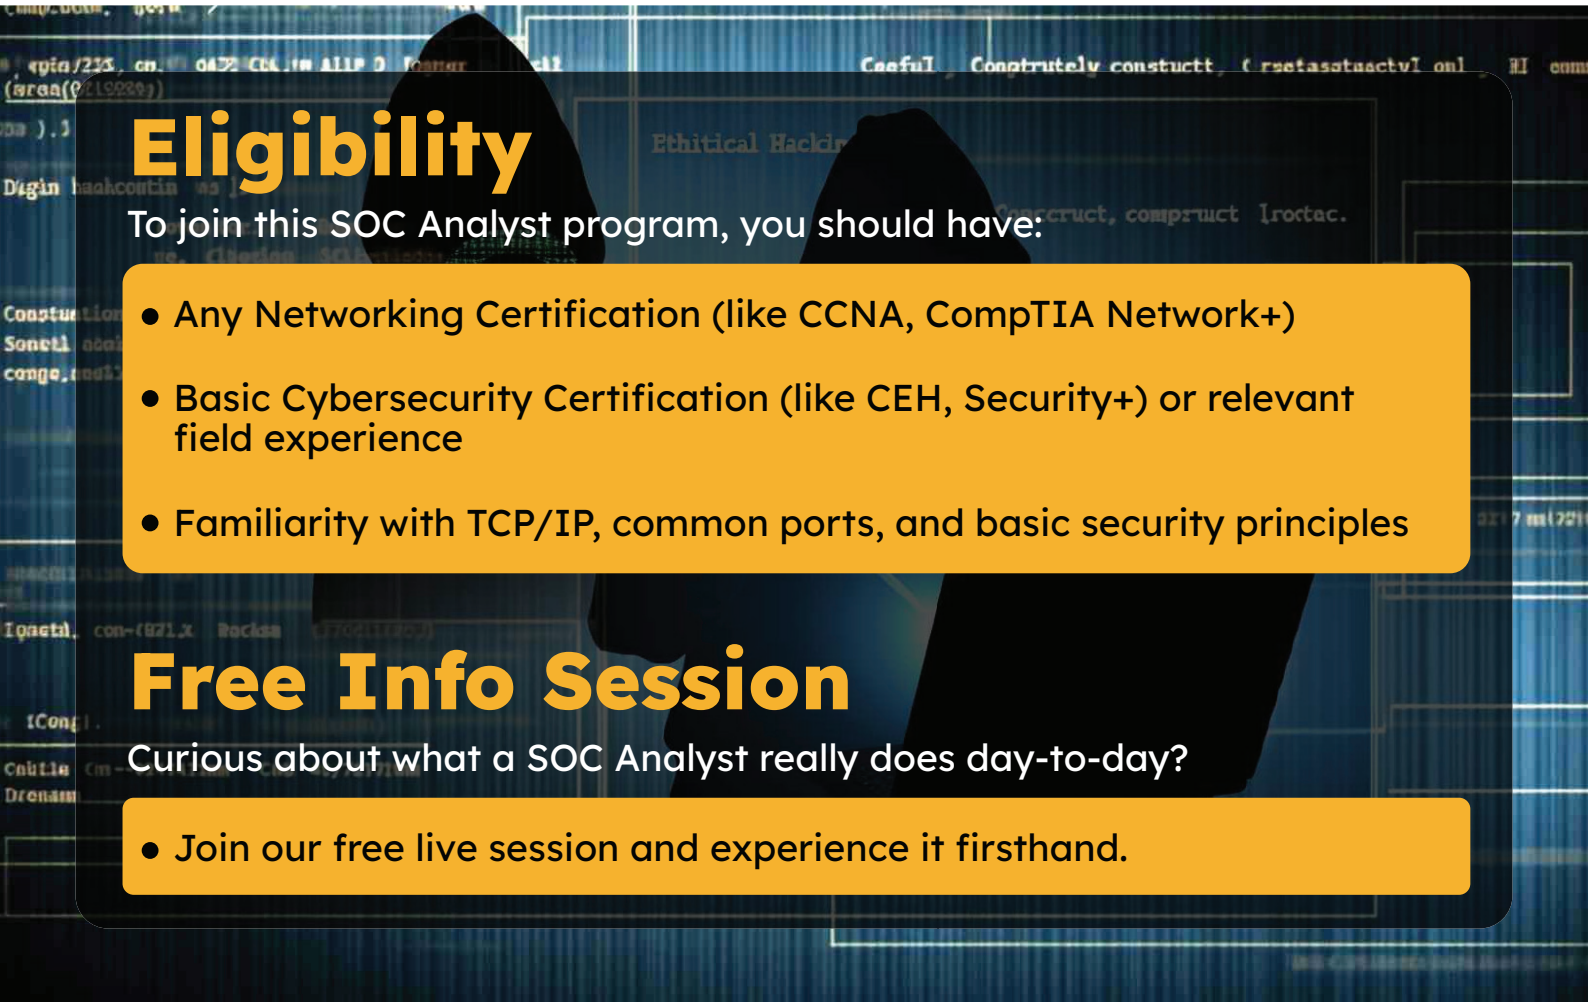

Welcome to the frontline of cyber defense.

Eduden's SOC Analyst course is your fast-track entry into the world of real-time cyber threat monitoring, alert analysis, and incident response. Built for those who want to land their first cybersecurity job or pivot into the booming Security Operations Center (SOC) industry, this course teaches you how to detect, analyze, and respond to live cyber threats.

From SIEM tools like Splunk and ELK Stack to log correlation, threat hunting, and alert triage — this is a job-ready SOC analyst certification course in India that goes beyond theory. You'll monitor real logs, investigate real attacks, and simulate daily SOC activities with professional tools and blue team workflows.

If you're looking for the best SOC analyst training in Kolkata or anywhere in India, you're

Duration 60 Days	Lectures 40	Projects 6

Eligibility

To join this SOC Analyst program, you should have:

- Any Networking Certification (like CCNA, CompTIA Network+)
- Basic Cybersecurity Certification (like CEH, Security+) or relevant field experience
- Familiarity with TCP/IP, common ports, and basic security principles

Free Info Session

Curious about what a SOC Analyst really does day-to-day?

- Join our free live session and experience it firsthand.

Course Overview

This course is designed to make you SOC floor-ready — teaching you everything from the basics of threat intelligence to advanced SIEM queries, log correlation, and real-time alert handling.

You'll use tools like Splunk, Wazuh, Kibana, and Wireshark to simulate real-world attacks and defense strategies. Every module includes lab-based scenarios, helping you understand how threats behave, how alerts are triggered, and how incidents are managed in live SOC environments.

If you're serious about getting your first job in cybersecurity as a SOC Analyst in India, this course is your best launchpad.

Assignments

Log analysis, alert triage, and correlation assignments reviewed via GitHub or LMS portal.

Quizzes

Threat detection, IOC recognition, and investigation scenario-based quizzes after each module.

Live Sessions

Weekly interactive labs, case study breakdowns, threat analysis Q&As, and SIEM query deep-dives.

Projects

You'll complete 6 key SOC analyst projects:

- Simulate Brute Force and Analyze Alerts
- Configure a Mini-SIEM with Wazuh or ELK
- Detect Malware and Phishing Logs in Syslog
- Build and Correlate Use Cases in Splunk
- SOC Report Creation from Incident Analysis
- Final Project: Complete Threat Lifecycle Walkthrough (Detection - Response)

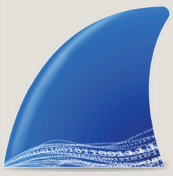

Course Curriculum & Tools

Key Tools You'll Use in the SOC Analyst Course:

splunk>

MITRE ATT&CK

TCPDUMP

Curriculum Breakdown

✳ SOC Basics & Cyber Defense Essentials

- What is a SOC? Roles, Tiers, and Workflow
- Blue Team vs Red Team
- MITRE ATT&CK & Cyber Kill Chain Overview
- Log sources & event types
- Understanding real-world SOC job descriptions

✳ Networking for SOC Analysts

- TCP/IP Review, Ports & Protocols
- Packet inspection basics
- Log formats: syslog, event viewer, PCAP
- DNS, HTTP, FTP traffic patterns
- Hands-on: Analyze PCAPs for suspicious behavior

⁕ SIEM Tools & Log Management

- Introduction to SIEM
- Splunk Setup & Basic Queries
- ELK & Wazuh for Open Source Monitoring
- Log parsing and filtering
- Creating dashboards and alerts
- Hands-on: Build your own mini SIEM setup

⁕ Alert Triage & Incident Analysis

- Understanding false positives and tuning
- Alert correlation logic
- Investigating Brute Force, Malware, Phishing, and Insider Threats
- IOC extraction and reputation checks
- Hands-on: Analyze a full incident from alert to escalation

✳ Threat Hunting & Use Case Development

- How to proactively hunt threats
- Using MITRE ATT&CK to guide searches
- Writing use cases and detection rules
- SIEM search queries and correlation rules
- Hands-on: Build and deploy a threat hunting use case in Splunk

✳ Reporting, Documentation & Career Prep

- Writing an incident report
- Daily logs, escalation templates, and dashboards
- Resume building for SOC roles in India
- Final Interview Prep (technical questions + case scenarios)

What You'll Get After Completing the Course

Certificate of Completion

Students completing all modules, projects, and quizzes will receive a digital SOC Analyst Certificate by Eduden, recognized by recruiters across India.

Full Access for 60 Days

Unlimited access to videos, SIEM labs, datasets, and downloadable configs for the entire course period.

Get Hired as a SOC Analyst

This course prepares you for Level 1 & 2 SOC roles, Cybersecurity Analyst roles, and SIEM monitoring jobs in India's growing cyber defense sector. You'll graduate with a portfolio, hands-on lab experience, and the tools recruiters want to see.

Course Highlights

- 60 Days of Hardcore SOC Analyst Training
- Best SOC Analyst Course in Kolkata, West Bengal
- Hands-On Training with Splunk, Wazuh & ELK Stack
- Real-Time Threat Simulations & Log Analysis
- Based on Actual SOC Job Roles & Tier-1 Alerts
- Covers MITRE ATT&CK, SIEM Use Cases & More
- Resume & Career Guidance for Indian Cybersecurity Job Market
- 6 Industry-Relevant Projects
- Certificate from Eduden – Top Cybersecurity Institute in India
- Hybrid Format – Attend Online or Offline in Kolkata
