2026 Cyber Security Course With Eduden

Start Your Career in Cyber Security

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

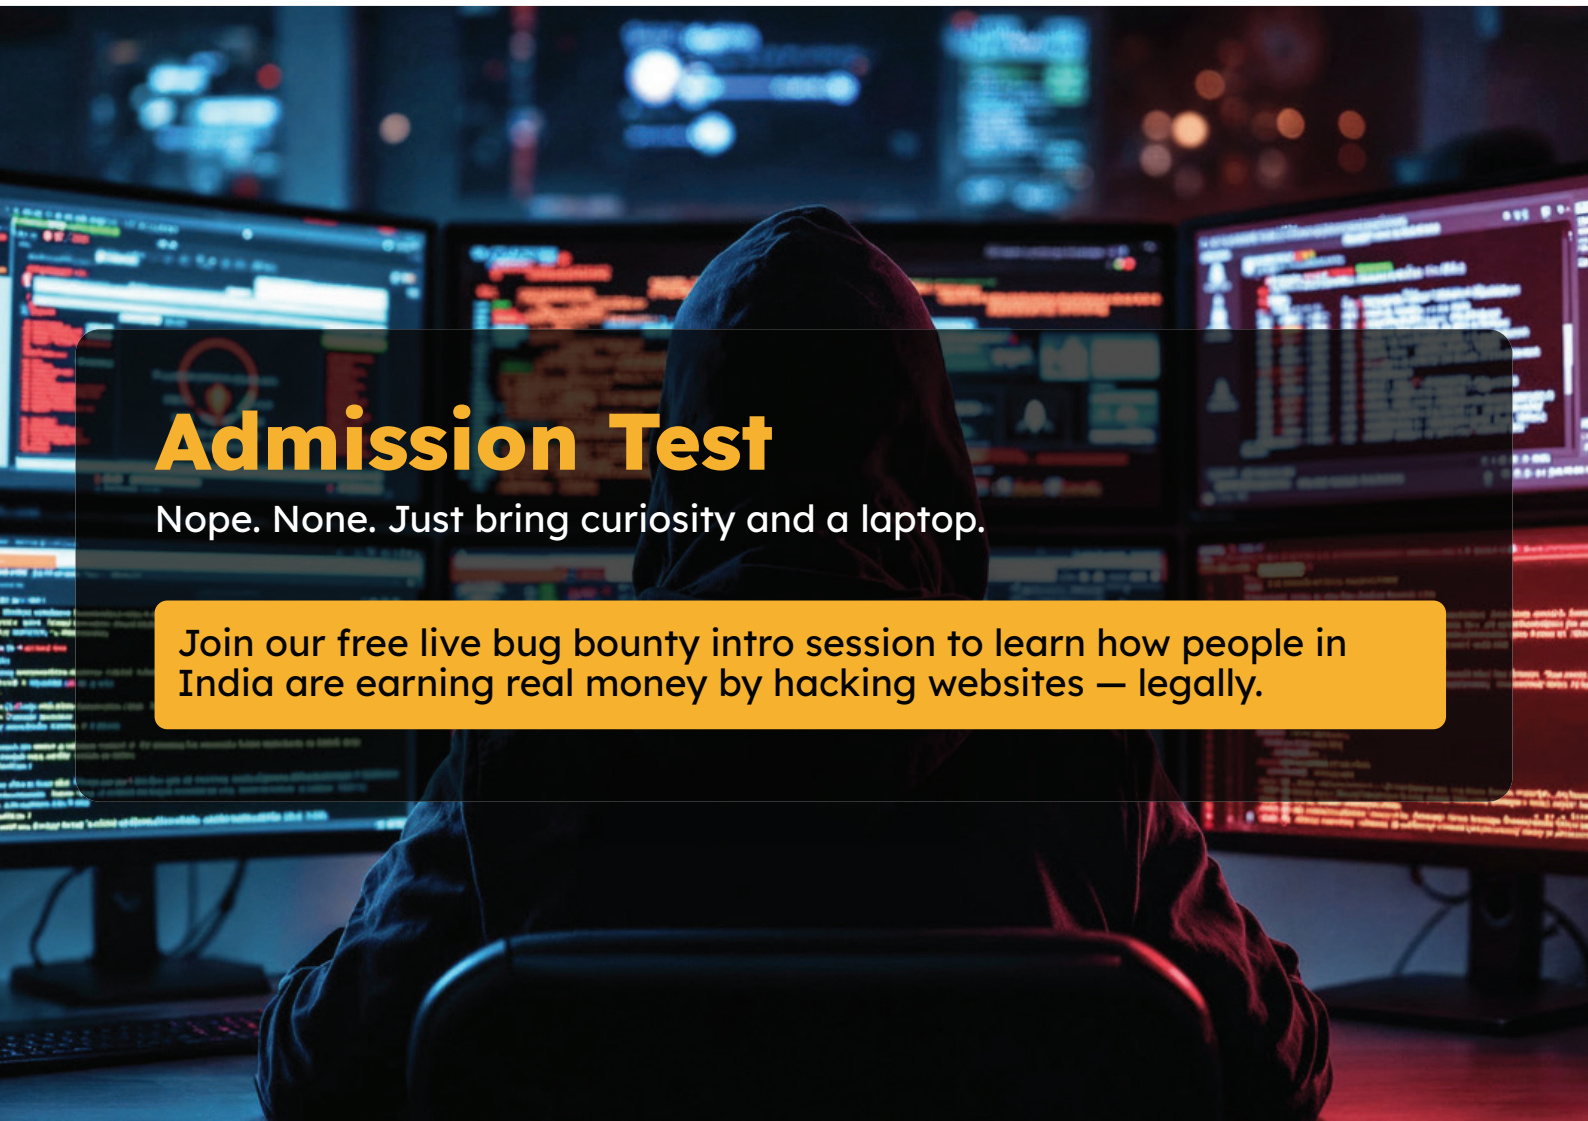

Start Bug Bounty Hunting – 50 Days Hands-On Training

Course Objective

Tired of watching others post screenshots of their HackerOne payouts? Ready to stop lurking and start earning? This course is your no-nonsense gateway into the world of bug bounty hunting — built for beginners, packed with tools, and taught by real bug hunters.

At Eduden, we don't believe in textbook security. We believe in breaking things (legally), finding vulnerabilities, and helping companies fix them — while building your skills and your wallet. If you're looking for the best bug bounty course in India with 100% hands-on training, your search ends here.

Duration 50 Days	Lectures 35	Projects 6

Admission Test

Nope. None. Just bring curiosity and a laptop.

Join our free live bug bounty intro session to learn how people in India are earning real money by hacking websites — legally.

Course Overview

This 50-day hands-on program is the ultimate beginner's course to start your bug bounty journey in India. Whether you want to hunt on HackerOne, Bugcrowd, or Synack, this course will give you a complete roadmap — from recon to reporting — using the same tools used by top hunters worldwide.

You'll learn how to discover and exploit vulnerabilities in web applications, perform recon using automated and manual techniques, write professional reports that get accepted, and set up your own ethical hacking workflow.

If you're serious about earning money through cybersecurity, or landing internships and jobs in penetration testing, this is the best bug bounty training in Kolkata, West Bengal that actually prepares you for real-world targets — not just labs.

Assignments

15+ recon, exploitation, and reporting assignments with feedback through Slack/GitHub.

Quizzes

Quick challenges, protocol knowledge tests, and recon logic rounds to sharpen your bug-hunting brain.

Live Sessions

Live labs, tool walkthroughs, bounty report breakdowns, and Q&A with real bug bounty hunters.

Projects

You'll complete 6 real-world styled bug bounty projects:

- Subdomain Enumeration & Recon Automation
- Full Recon on a Public Scope
- Web Application Vulnerability Lab
- Login Bruteforce & Rate Limit Bypass
- XSS, IDOR, and CORS Misconfig Reporting
- Final Project: End-to-End Bug Submission Simulation

Course Curriculum & Tools

Bug Bounty Tools & Platforms You'll Learn:

Curriculum Breakdown

✳ Bug Bounty Basics & Platforms

- How bug bounty works (HackerOne, Bugcrowd, Synack)
- Rules, scopes, payouts & terms
- Setting up your accounts, tools, and workflow
- Passive vs active recon

✳ Web & HTTP Fundamentals

- How web requests actually work
- Methods (GET, POST, PUT, DELETE)
- Cookies, sessions, headers, and tokens
- Intercepting requests in Burp Suite

✳ Recon & Asset Discovery

- Subdomain brute forcing
- Directory fuzzing with FFUF
- Visual recon (EyeWitness, Aquatone)
- Bash automation to find new endpoints
- Hands-on: Recon on a real program (within TOS)

✳ OWASP Top 10 for Bug Bounty Hunters

- XSS (reflected, stored, DOM)
- SQL Injection
- Broken Auth (IDOR, weak session handling)
- SSRF, CORS, Open Redirect
- File Upload Bugs and Misconfigurations
- Real-world examples from HackerOne/PortSwigger

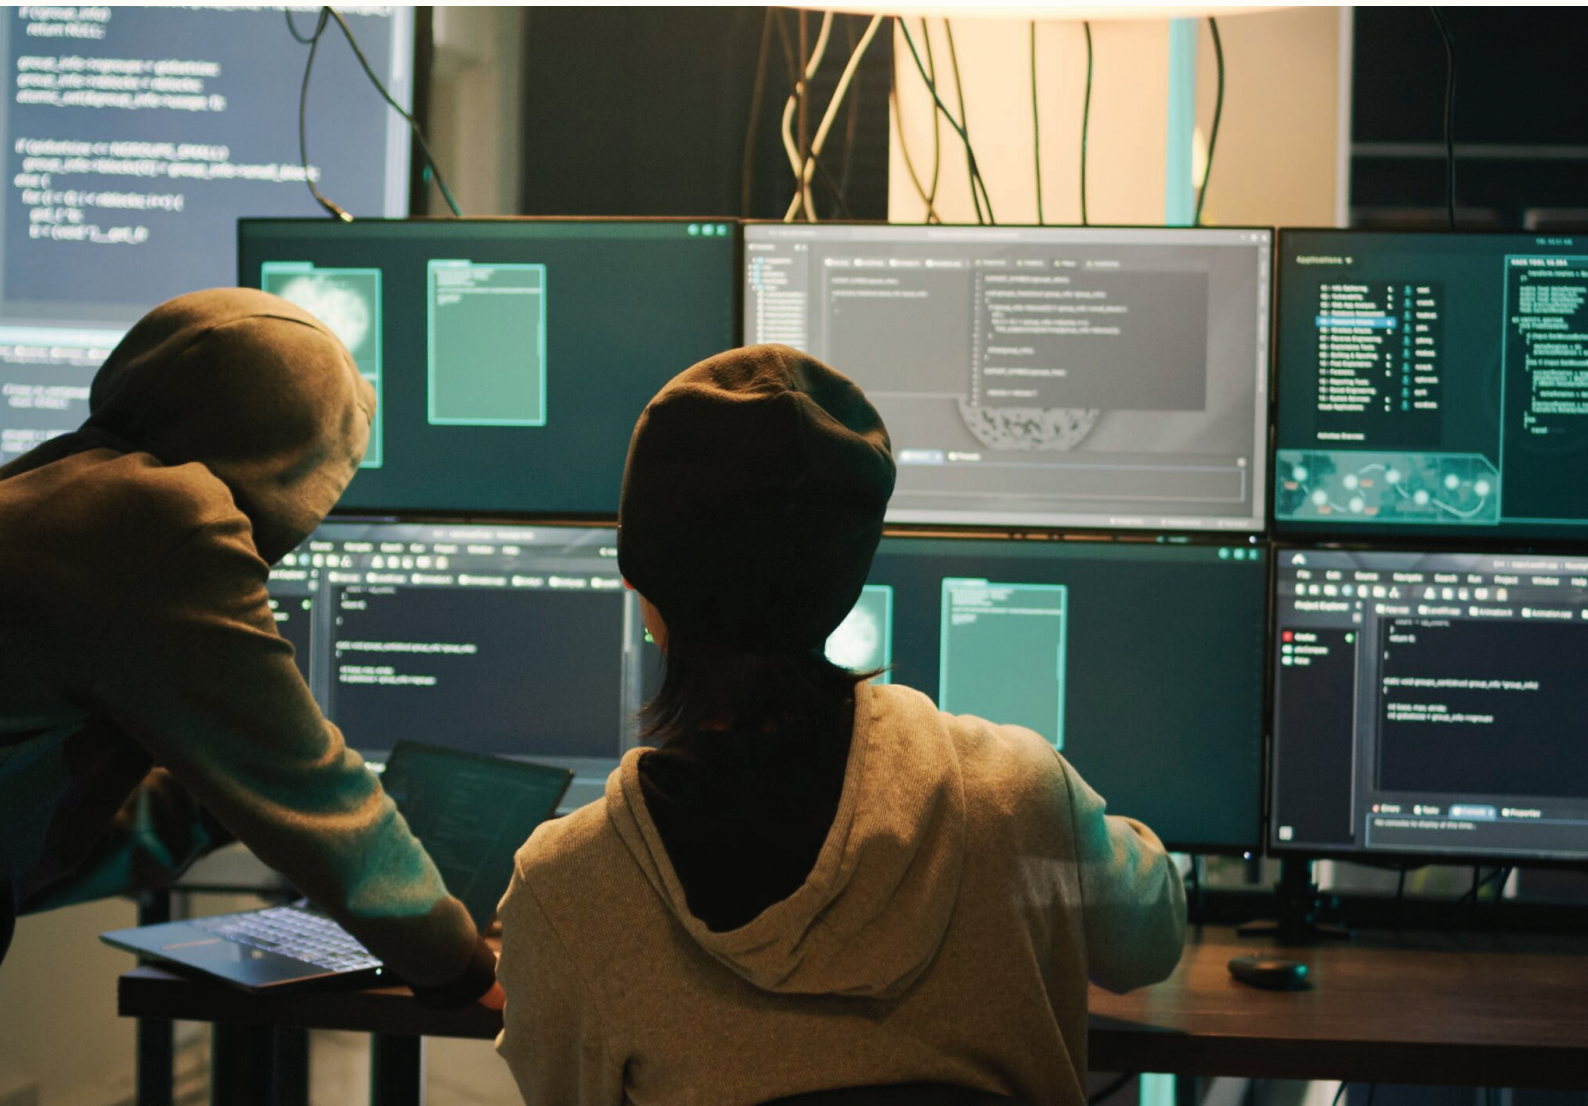

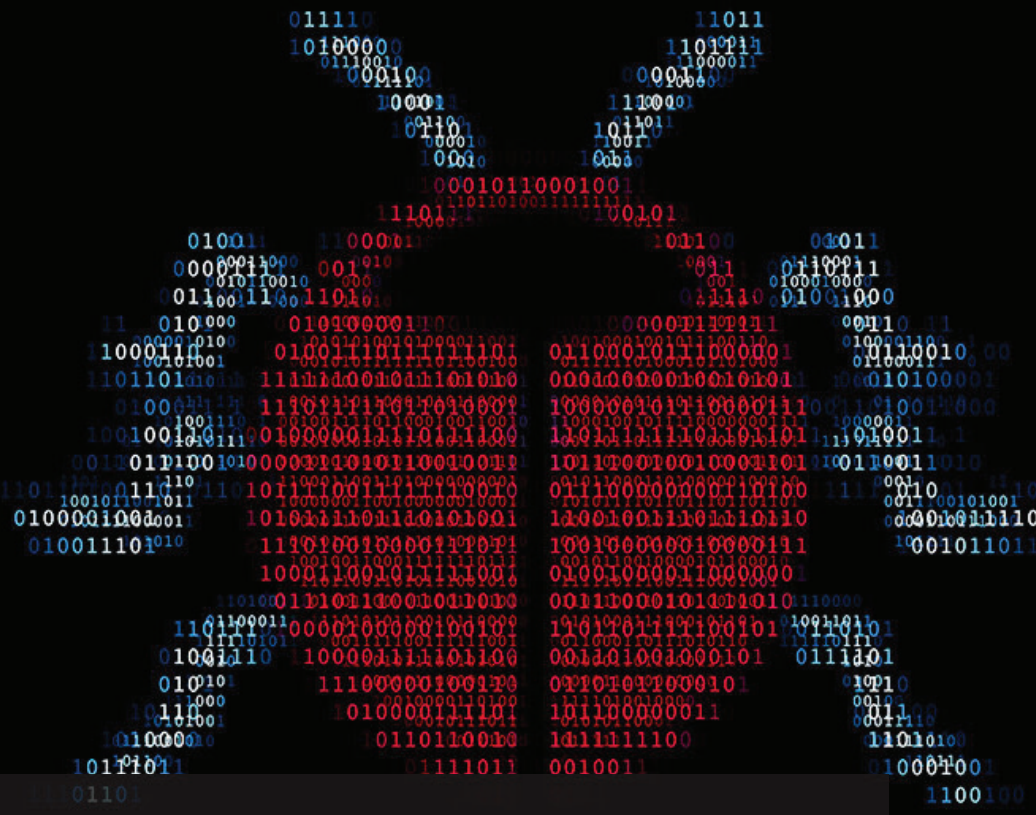

✳ Burp Suite Mastery

- Using Repeater, Intruder, Logger++, Collaborator
- Extending Burp with active/passive scanners
- Crafting payloads for real-world attack scenarios
- Hands-on: Automating login bypass and CSRF tests

✳ Reporting, PoCs & Career Building

- Writing proper vulnerability reports (format, tone, evidence)
- Creating Proof of Concept videos and screenshots
- Understanding CVSS, program rules, and triage behavior
- Tips to avoid duplicates and rejections
- Portfolio creation, bug report template, resume for security jobs in India

What You'll Get After Completing the Course

Certificate of Completion

Receive a verified digital certificate from Eduden — one of the top bug bounty and cybersecurity institutes in India — after completing all tasks, quizzes, and the final reporting project.

Full Course Access for 90 Days

Enjoy complete access to tools, templates, walkthroughs, project kits, live recordings, and assignments throughout the course.

Launch Your Bounty or Cybersecurity Career

Whether you want to earn on HackerOne, build a career in vulnerability assessment, or become a freelance web app tester — this course gives you the real, project-based experience employers and bounty programs love.

Course Highlights

- 50 Days of 100% Practical Bug Bounty Training
- Learn From Real Bug Hunters & Cybersecurity Pros
- Master Tools Like Burp Suite, FFUF, Nmap & More
- 6 Real Bug Simulation Projects + Final Report
- Best Bug Bounty Course for Beginners in India
- Hybrid Format: Attend Online or Offline from Kolkata
- International Mentor Support + Portfolio Guidance
- Certificate from Eduden — Bug Bounty Experts in West Bengal
- Includes Tips for HackerOne, Bugcrowd, Synack
- Pathway to Jobs in Web App Security & Pen Testing
