Data Science Course With Eduden 2026

Start Your Career in Data Science

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Data Science & Analytics with Python + Power BI - 60 Days Career Track

Learn to Analyze, Visualize, and Present Data Like a Pro – Python, SQL, Power BI, Dashboards, and Real Business Use Cases

This course is built for beginners, analysts, business students, and working professionals who want to enter the world of data-driven decision making. You'll learn how to collect, clean, analyze, and visualize data using Python and Power BI, and translate your insights into powerful business actions.

No prior coding or analytics background? No problem. This course is beginner-friendly and focused on practical applications — not just theory.

Duration: 60 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

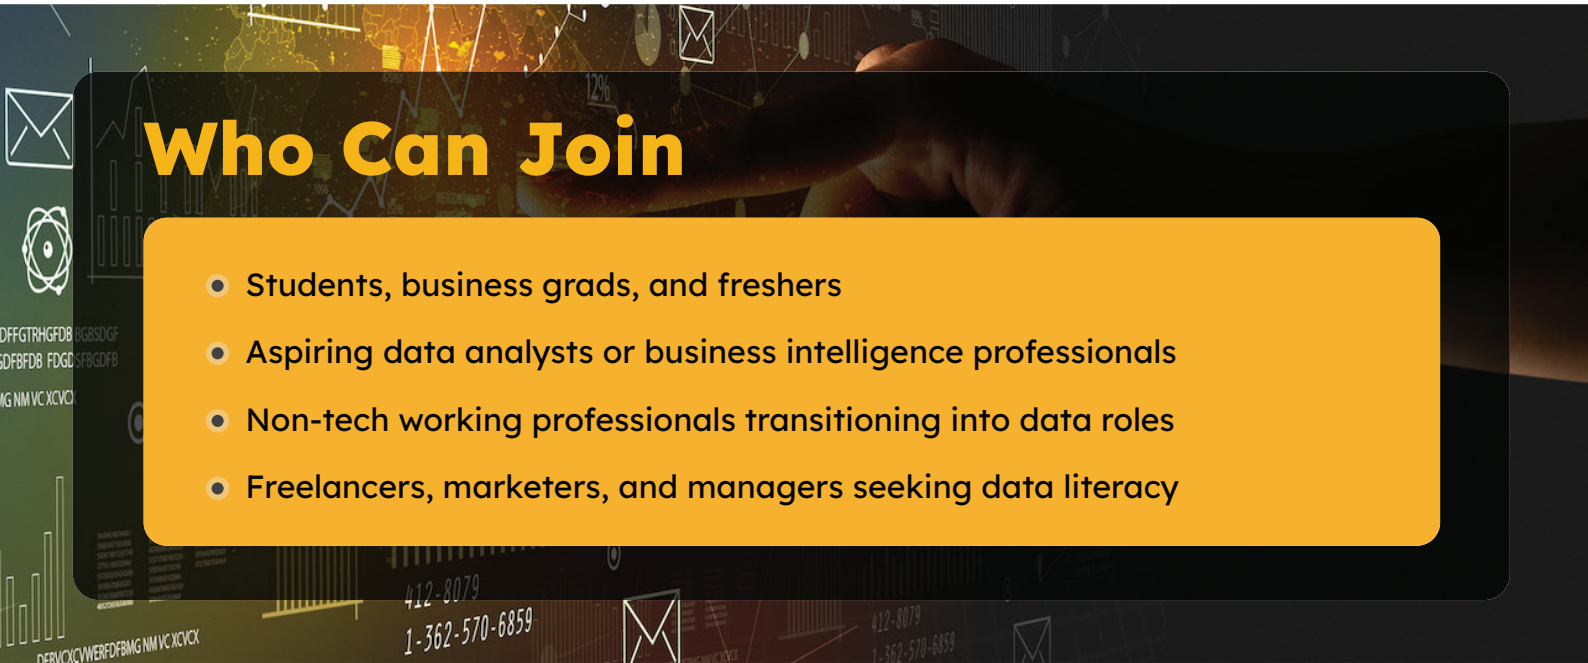

Level: Beginner to Intermediate

Track: Data Analytics, Business Intelligence, Data Science Fundamentals

Tools Covered: Python, Pandas, NumPy, SQL, Power BI, Excel, Matplotlib, Seaborn

Course Objective

To help learners build confidence and capability in working with structured and unstructured data, performing exploratory data analysis (EDA), creating dashboards, and extracting insights that drive business decisions.

Who Can Join

- Students, business grads, and freshers
- Aspiring data analysts or business intelligence professionals
- Non-tech working professionals transitioning into data roles
- Freelancers, marketers, and managers seeking data literacy

Course Curriculum

Module 1

Introduction to Data Science & Analytics

- What is data science? What does a data analyst do?
- Data lifecycle: Collection, Cleaning, Analysis, Visualization
- Business applications of data
- Hands-on: Analyze a basic dataset with Excel or CSV

Module 2

Python for Data Analytics

- Python basics (Jupyter, variables, lists, loops)
- NumPy & Pandas for structured data
- Filtering, grouping, merging datasets
- Hands-on: Clean a messy dataset using Pandas

Module 3

Data Visualization with Python

- Matplotlib, Seaborn, and Plotly (intro)
- Line, bar, scatter, histograms
- Customizing plots for dashboards
- Hands-on: Visualize trends from an e-commerce dataset

Module 4

SQL for Analysts (Structured Query Language)

- SELECT, WHERE, GROUP BY, ORDER BY
- Joins, subqueries, data aggregation
- Importing SQL data into Python
- Hands-on: Query business data using MySQL or SQLite

Module 5

Power BI Dashboards & DAX

- Data import, modeling, filters
- Measures, calculated columns, relationships
- Slicers, KPI cards, trendlines
- Hands-on: Create a business dashboard with sales data

Module 6

Final Project + Reporting

Choose 1 domain:

1. Sales/Marketing
2. HR Analytics
3. E-commerce
4. Healthcare

You'll clean, analyze, visualize, and present your findings in:

- A Python Jupyter Notebook
- A Power BI dashboard
- A PDF/PPT-style business report

Certification

- Eduden Certificate in Data Science & Analytics with Python + Power BI
- Final project submission required
- Bonus: GitHub + PDF Portfolio Setup Guide

Career Roles You'll Be Ready For

- Junior Data Analyst
- Business Analyst
- Data Visualization Specialist
- Reporting & BI Consultant
- Python Data Cleaner & Analyst (freelancer-ready)

Course Highlights

- 60 Days of Real-World Data Analysis Training
- Best Data Analytics Course in India (With Tools & Projects)
- Python, SQL, and Power BI – Taught Together from Scratch
- Certificate from Eduden – India's Practical Tech Institute
- Hybrid Learning – Online or In-Person in Kolkata
- Capstone Project + Dashboard Portfolio
- Ideal for Students, Career Switchers, and Analysts
- Resume, LinkedIn & Interview Readiness Support
