Get hands-on,
Get hired.

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

DevOps for Beginners - Foundation Track

Course Objective

To provide you with a strong foundation in the DevOps ecosystem, including essential tools like Linux, Git, GitHub, and Bash scripting, along with an understanding of the DevOps mindset, workflow, and pipelines.

You'll walk away with real confidence and a set of practical skills that lead straight into Docker, CI/CD, Kubernetes, or Cloud DevOps roles.

Duration: 30 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Complete Beginner

Outcome: Ready to move into core DevOps tools like Docker, Jenkins, AWS & Kubernetes

Who Can Join

- Freshers and students (no tech background needed)
- System Admins, Developers, or Testers upskilling for DevOps
- Tech enthusiasts, freelancers, or job-switchers
- Anyone curious about automation, pipelines, and modern IT workflows

Course Breakdown

Module 1

What is DevOps?

- DevOps lifecycle: Plan, Build, Test, Release
- Agile, Continuous Integration, Continuous Delivery (CI/CD)
- Waterfall vs Agile vs DevOps
- DevOps job roles & salary trends

Module 2

Linux Essentials for DevOps

- Shell navigation, file management
- File permissions, services, process management
- Basic bash scripting
- Hands-on: Create a startup script for an app

Module 3

Git & GitHub Version Control

- Git workflow: init, commit, branch, merge
- GitHub repo creation, pull requests
- Handling merge conflicts, .gitignore, SSH keys
- Hands-on: Push a real project to GitHub

Module 4

Shell Scripting for Automation

- Writing basic shell scripts
- Variables, loops, conditionals, functions
- Scheduling tasks with cron
- Hands-on: Automate a file backup script

Module 5

DevOps Toolchain Overview

- Overview of tools: Docker, Jenkins, Ansible, Terraform, AWS
- What's next after this course?
- Building your DevOps roadmap
- Hands-on: Demo CI/CD pipeline walkthrough

Final Project

- Automate a simple DevOps task (e.g., deploy a webpage, script a backup, track a change with Git)
- Submit to GitHub as your first DevOps project

Certification

- Eduden Certificate: DevOps for Beginners – Foundation Track
- Project-based certification + GitHub link
- Roadmap for next-level DevOps courses

Career Outcomes

- Prepare for junior DevOps, cloud, or sysadmin roles
- Gain core skills needed for Docker, AWS, Kubernetes
- Build your GitHub profile + resume with confidence
- Freelancing DevOps gigs for automation setup

Course Highlights

- 30 Days of Hands-On DevOps Fundamentals
- Best DevOps Beginner Course in India
- Linux + Git + Shell Scripting = Solid Base
- Certificate from Eduden – India's Skill-Based Tech Institute
- Learn Online or In-Person at Eduden, Kolkata
- Start from Zero & Get DevOps-Ready Fast
