# Graphic Design Course

# Start your journey with Eduden

# About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

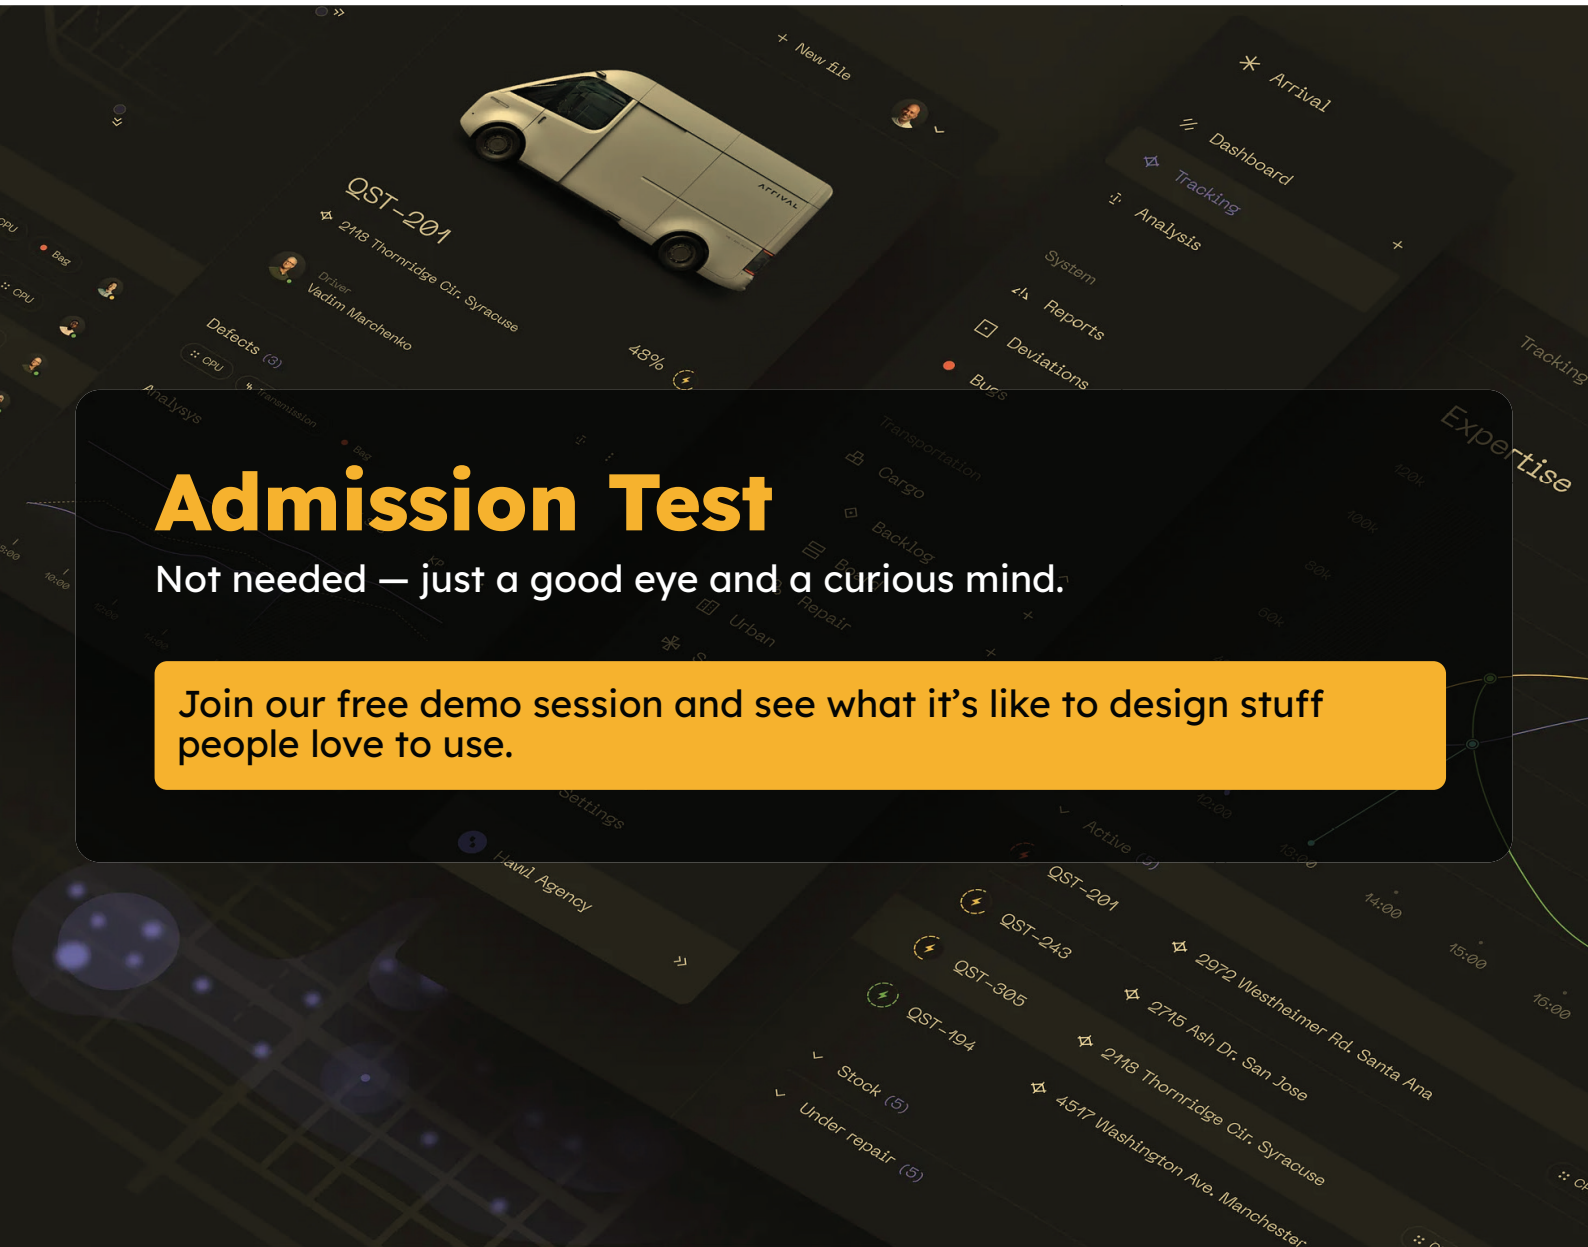

# UI/UX Design – Industry-Ready Hands-On Course

## Course Objective

Ever used an app and thought, “Why is this so confusing?” — or even better, “I can design this better”? That’s exactly where this course comes in. UI/UX isn’t just about making things look pretty — it’s about solving problems, designing smart user journeys, and building interfaces that feel like second nature.

In 90 days, you’ll go from having no design experience to creating real-world projects, building case studies, and presenting your work like a pro. Whether you're aiming for a design job, planning to freelance, or want to design your own app someday — this course is built to make you industry ready.

| Duration 90 Days | Lectures 48 | Projects 6 |
|---|---|---|

# Course Overview

This course is a complete journey into user interface and user experience design — made practical, hands-on, and beginner-friendly. You'll learn how to research, wireframe, design, prototype, and test interfaces across mobile apps and websites.

We'll train you on tools like Figma, Adobe XD, Whimsical, and Notion, and guide you through real-life design challenges that simulate startup or freelance projects. Each module is project-driven, focused on design thinking, usability, aesthetics, and interaction.

By the end, you'll have a portfolio that screams "hire me", and the confidence to walk into interviews or pitch to freelance clients like a pro.

## Assignments

15+ exercises ranging from wireframes to hi-fi UI designs and feedback iterations.

## Quizzes

Topic-based mini challenges to reinforce concepts (no boring theory exams here).

## Live Sessions

Weekly mentor-led design critiques, portfolio reviews, and tool walkthroughs.

# Projects

You'll work on 6 portfolio-worthy projects:

- App Redesign Challenge (based on UX flaws)
- Full Mobile App Concept (Research to Prototype)
- E-commerce Website UI
- Landing Page for a SaaS Product
- Design System for a Brand
- Final Case Study + Pitch Deck

# Course Curriculum & Tools

## Tools You'll Use:

# Curriculum Breakdown

## ✳ UI vs UX – The Big Picture

- What’s the difference? Why does it matter?
- UX Design process (Design Thinking Model)
- UI basics: visual design principles, patterns, and trends

## ✳ Research & User Personas

- Conducting surveys, interviews, and usability reviews
- Creating personas and empathy maps
- Defining goals, behaviors, and user pain points
- Hands-on: Build a full persona + journey map

## ⁕ Wireframing & Structure

- Sketching interfaces (on paper + digitally)
- Lo-fi wireframes using Figma & Whimsical
- Structuring screens and task flows
- Hands-on: Wireframe a 3-screen mobile app

## ⁕ UI Design in Figma

- Grids, spacing, layout consistency
- Color theory, accessibility, and typography
- Working with components, variants, and auto-layout
- Designing for mobile and web breakpoints

## ⁕ Design Systems & Prototyping

- Creating a design system from scratch
- Button states, components, icons, and branding
- Making interactive prototypes in Figma
- Clickable flows, transitions, and animations
- Hands-on: Create a design system + prototype a live project

## ✳ Usability Testing & Iteration

- How to conduct feedback sessions
- A/B testing and iteration cycles
- Improving UX based on user behavior
- Hands-on: Test your app with real users (peers or beta group)

## ✳ Final Project & Portfolio

- Case Study & Portfolio Building
- How to present your work like a designer (not a decorator)
- Writing a case study: intro, problem, solution, process, results
- Hands-on: Final project showcase + case study writing

# What You'll Get After Completing the Course

## Certificate of Completion

Complete all assignments, participate in live reviews, and submit your final case study to get certified by Eduden.

## Full Access, No Strings

Get access to all lessons, templates, live recordings, and downloadable assets for the entire 90-day duration.

## Portfolio + Career Ready

This course sets you up for UI/UX internships, junior roles, and freelance gigs. With an active Behance portfolio and real feedback-based projects, you'll stand out — not just apply.

# Course Highlights

- 90-Day Hybrid Format (Offline + Online Access)
- Learn UI/UX From Scratch
- Figma & Adobe XD Mastery
- 6 Real Projects + Final Case Study
- Weekly Feedback & Mentorship
- Research to Prototype Flow
- Certificate of Completion
- Job Assistance + Freelance Setup Help
- Portfolio-Driven Learning
- International Mentors & Design Review Sessions
