About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Linux Essentials - RHCE-Based Fundamentals

Course Objective

To provide learners with a strong command over Linux fundamentals, including working with the terminal, managing files, users, services, and configuring basic server tasks. This course lays the foundation for DevOps, system administration, cloud engineering, and Red Hat certifications.

Duration: 30 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Beginner

Certifications Aligned: RHCSA (EX200), RHCE (EX294)

Who Can Join

- Students and freshers with no prior Linux experience
- DevOps, cloud, and cybersecurity aspirants
- Junior system administrators & support engineers
- Professionals preparing for RHCSA or RHCE

Course Breakdown

Module 1

Introduction to Linux

- What is Linux? Why is it everywhere?
- Linux distributions: RHEL, CentOS, Ubuntu
- Linux file system structure
- Terminal vs GUI
- Hands-on: Access your first Linux shell

Module 2

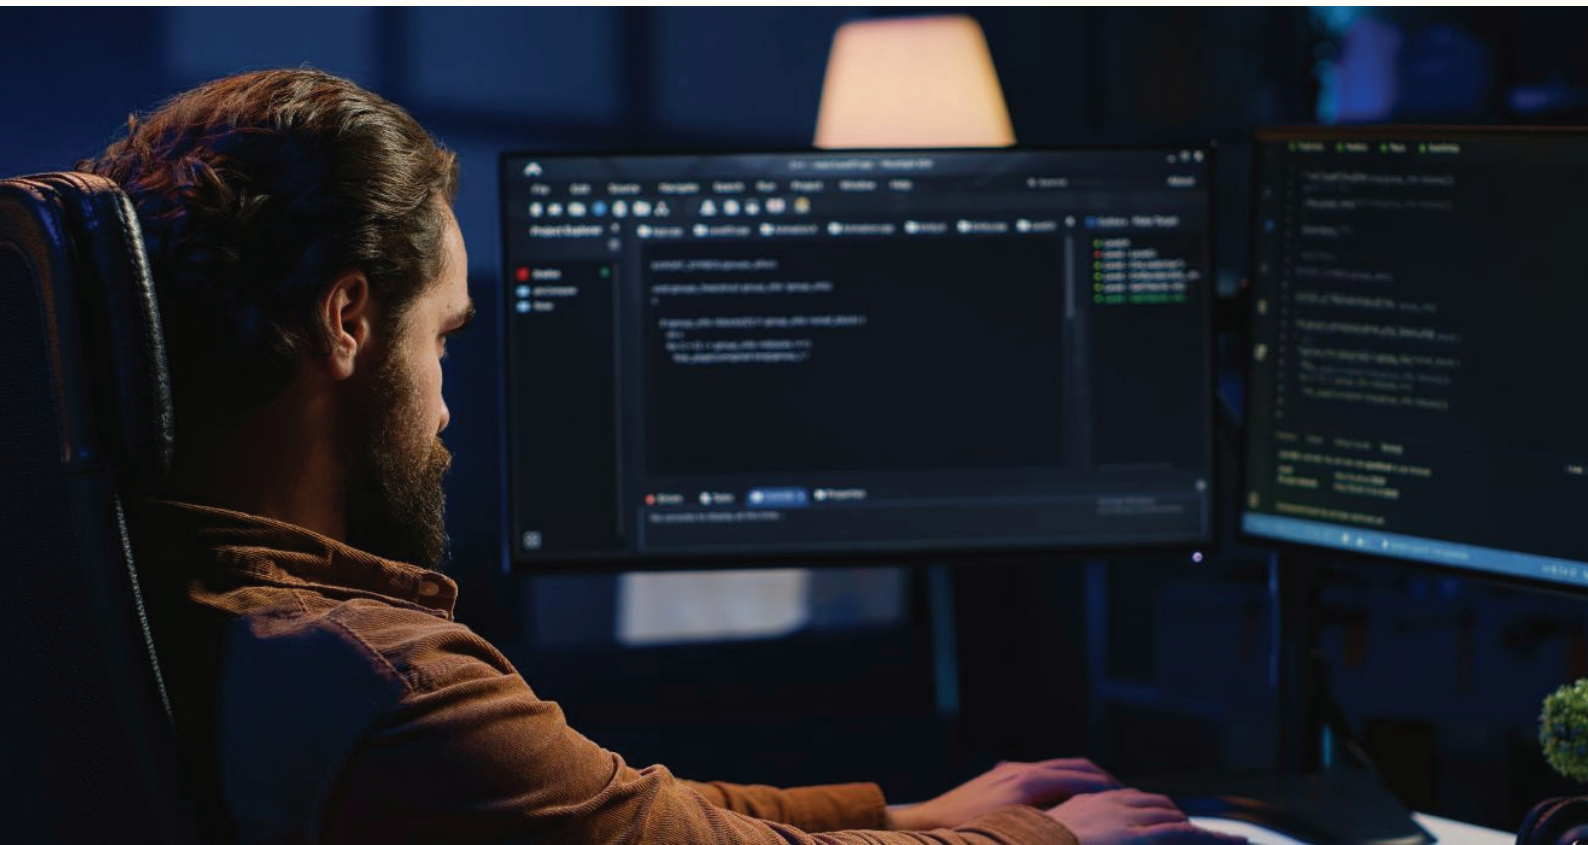

Command Line Mastery

- Navigating directories (cd, ls, pwd)
- File management: cp, mv, rm, touch, nano, cat
- File permissions: chmod, chown, umask
- Hands-on: File & directory manipulation lab

Module 3

User & Group Management

- Creating users & groups
- Password policies & user security
- sudo privileges & permission delegation
- Hands-on: Create a user access system with roles

Module 4

Package Management & System Services

- Using yum, dnf, and rpm (Red Hat-based)
- Installing and managing software
- Starting, stopping, enabling services (systemctl)
- Hands-on: Install and configure a basic service (Apache or Nginx)

Module 5

Networking & Firewalls (RHCSA Scope)

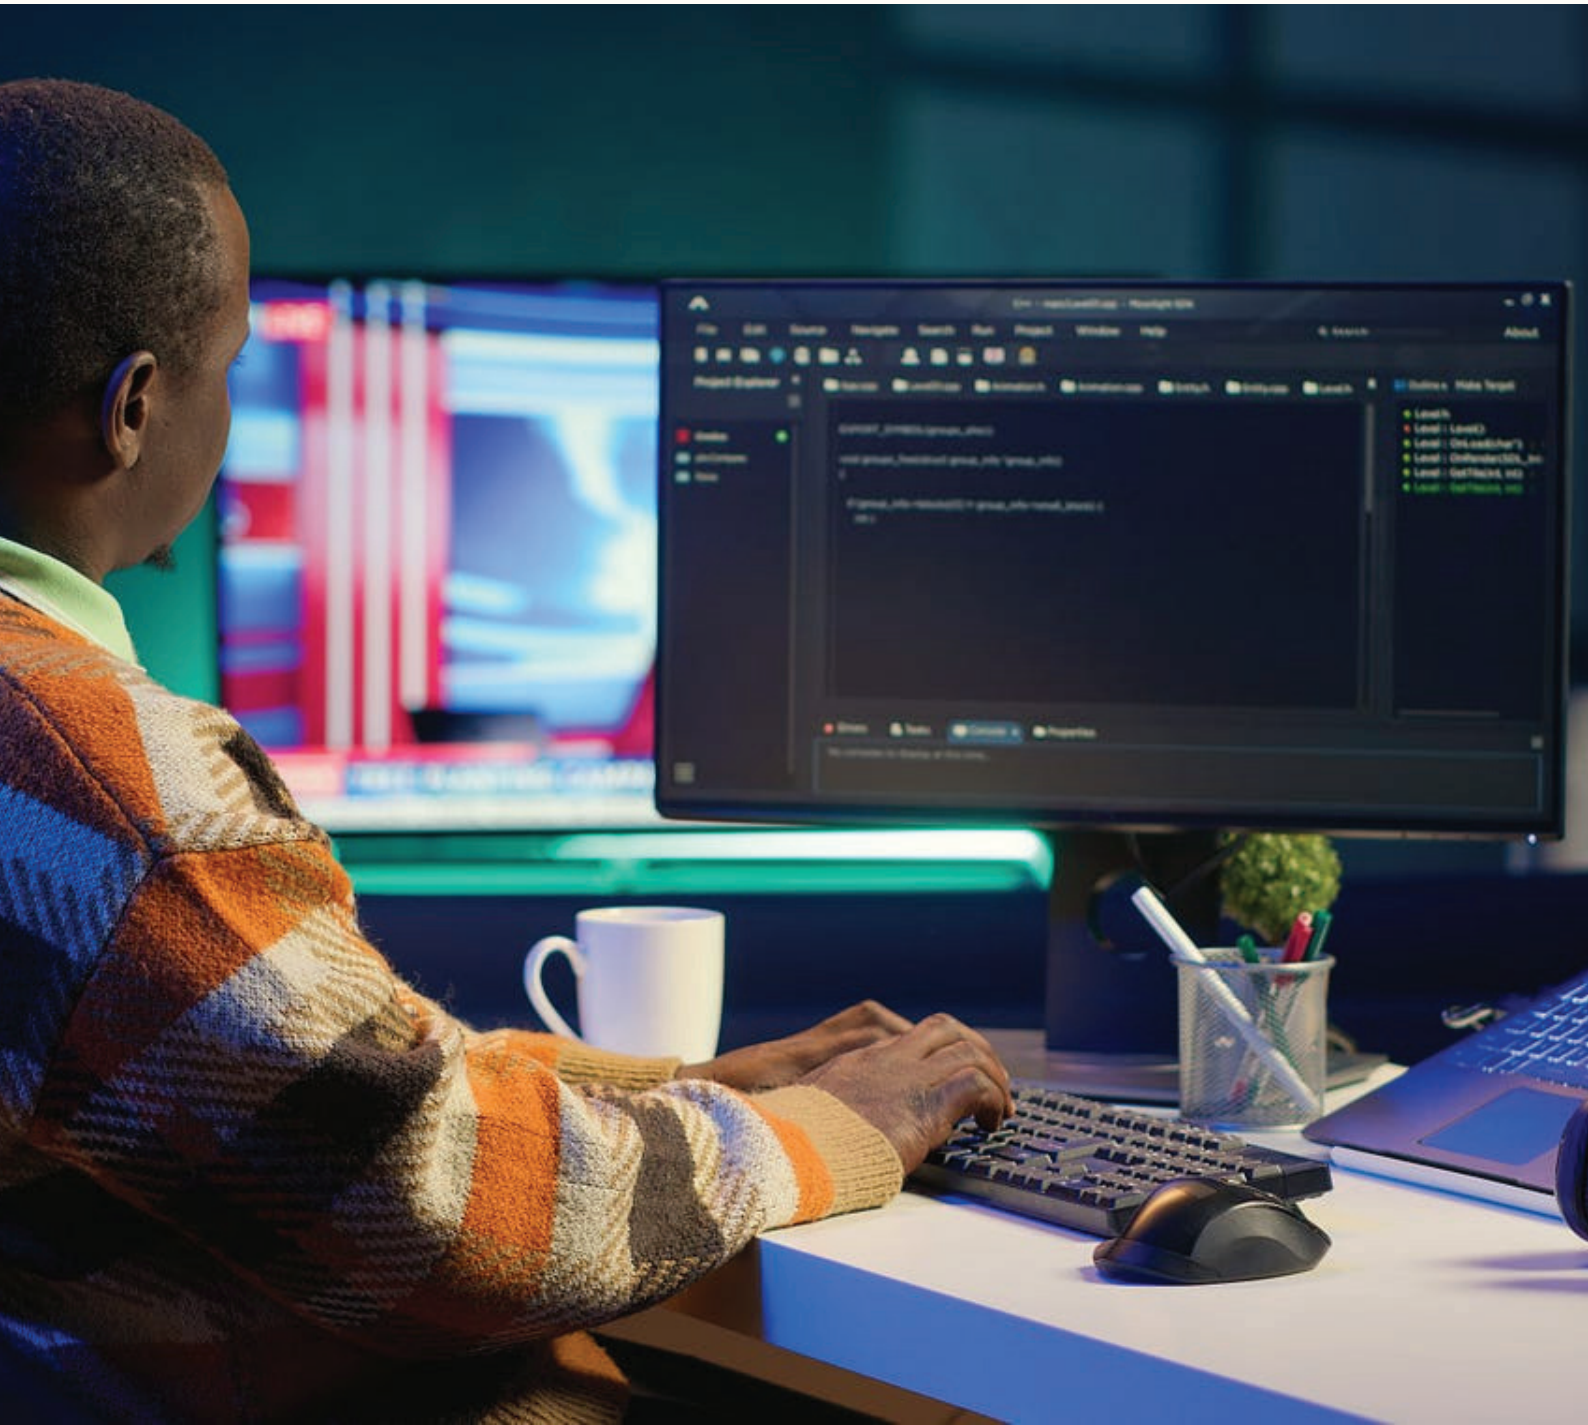

- Viewing and configuring IP addresses
- ping, netstat, nmcli, ss
- Firewall basics using firewalld
- Hands-on: Set up a local web server with firewall rules

Module 6

Shell Scripting Basics + Final Project

- Variables, loops, conditionals
- Writing simple automation scripts
- Scheduling tasks with cron
- Hands-on: Automate log backups with a shell script
- Final Project: Set up a secure user environment with networking, services, and automation scripts

Certification

- Eduden Certificate in Linux Essentials (RHCE Track)
- Prepares students for RHCSA EX200 exam and RHCE roadmap
- GitHub project submission (scripts & system config)

Career Support

- Resume & LinkedIn for Linux/IT support jobs
- Interview prep for roles like:
    1. Linux Support Engineer
    2. Junior Sysadmin
    3. DevOps Trainee
- Career roadmap to Red Hat, AWS, DevOps, and Cybersecurity roles

Course Highlights

- 30 Days of Hands-On Linux Training
- Based on RHCSA & RHCE Certification Standards
- Best Beginner Linux Course in Kolkata & India
- Learn by Doing – Real Command-Line Practice
- Hybrid Format – Attend Online or In-Person at Eduden
- Certificate from Eduden – India's Skill-First IT Institute
- Get DevOps & Cloud-Ready Fast
- Ideal First Step for SysAdmin, DevOps, and Cybersecurity Careers
