About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Linux Pro - Advanced Server Admin & Automation (RHCE Focused)

Course Objective

To train learners in enterprise-level Linux system administration, focusing on automating tasks, managing services, securing networks, configuring servers, and preparing for RHCE certification and real-world job roles.

This course is hands-on, practical, and project-focused — meant to simulate real Linux infrastructure environments.

Duration: 60 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

Level: Intermediate to Advanced

Certifications Aligned: RHCE (EX294), optional Ansible integration

Who Can Join

- RHCSA certified learners or equivalent experience
- Linux users looking to level up into sysadmin roles
- DevOps/cloud engineers seeking stronger server knowledge
- Professionals aiming for RHCE, Ansible, or hybrid automation jobs

Course Breakdown

Module 1

System Management & Process Control

- Advanced systemctl, journald logs
- Resource limits & priorities
- Process monitoring (top, htop, ps, nice, kill)
- Hands-on: Analyze & optimize system load

Module 2

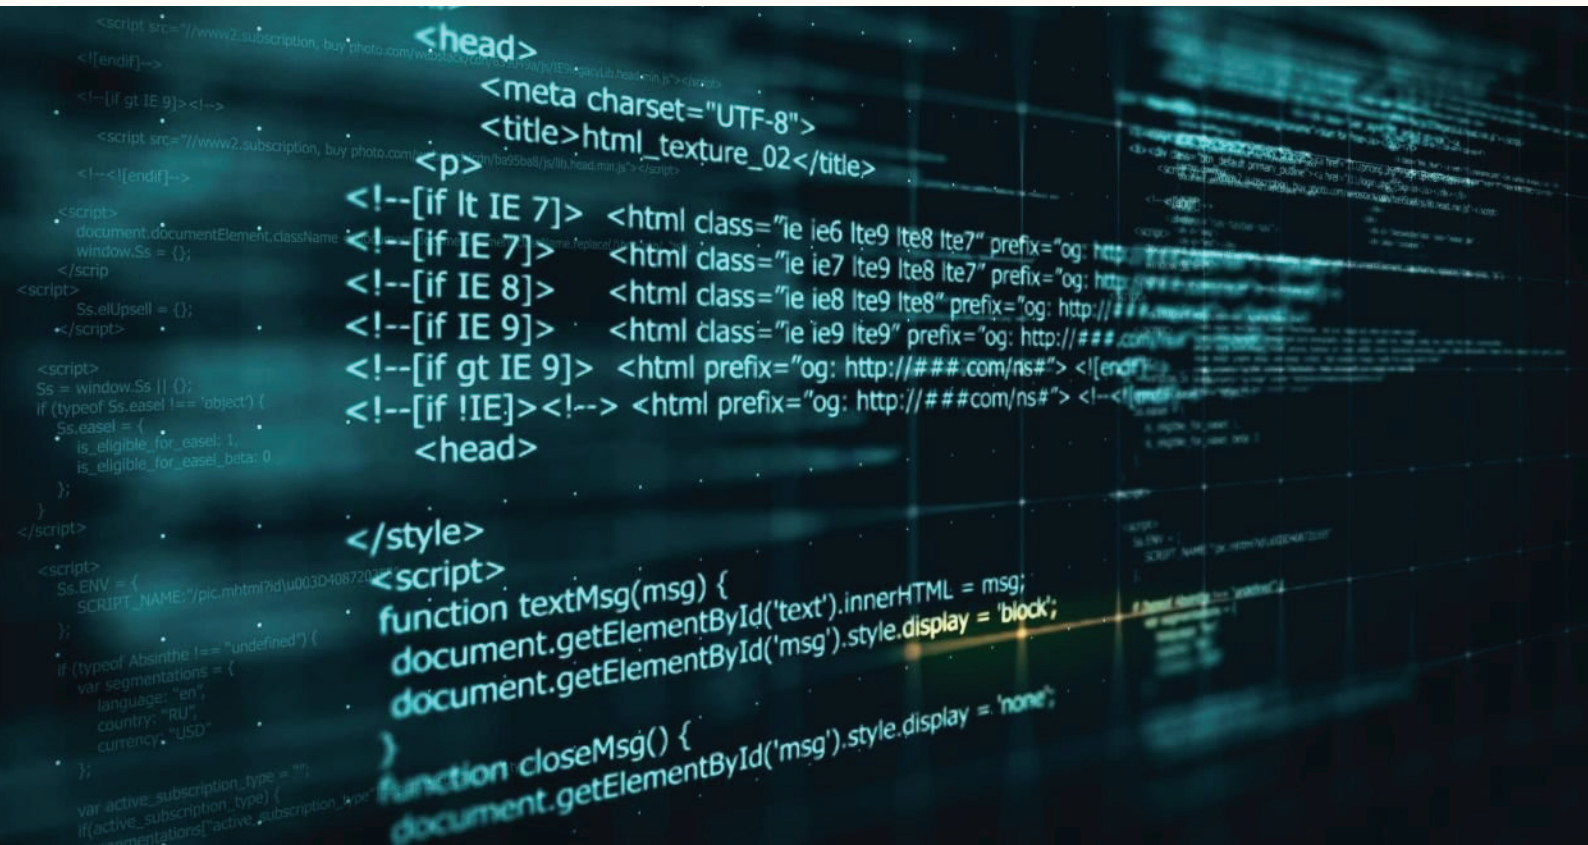

Advanced Users, Groups & Permissions

- sudoers configuration (visudo)
- ACLs, SUID, SGID, Sticky Bits
- SELinux (enforcing, permissive, troubleshooting modes)
- Hands-on: Secure multi-user environments

Module 3

Storage & LVM Management

- Partitioning with fdisk, gdisk
- Logical Volume Manager (LVM): Create, extend, snapshot
- Mounting NFS, CIFS shares
- Hands-on: Create dynamic storage pools with LVM

Module 4

Networking & Firewalls (Advanced)

- Bonding, bridging, static/dynamic IPs
- firewalld zones, rich rules, persistence
- Troubleshooting with ss, tcpdump, netstat
- Hands-on: Set up a secure web server + firewall

Module 5

Shell Scripting & Automation

- Advanced bash scripting
- Conditionals, arrays, functions, arguments
- Input validation, logging, cron automation
- Hands-on: Build a full system health checker script

Module 6

System Services & Server Configuration

- Web server (Apache/Nginx)
- DNS, DHCP, FTP, NTP configuration
- mail services (Postfix, Sendmail basics)
- Hands-on: Configure a mini-LAN with working services

Module 6

Introduction to Ansible for RHCE

- Inventory files, modules, YAML basics
- Playbooks, roles, variables
- Remote automation of user/server configuration
- Hands-on: Write a playbook to deploy a complete LAMP stack

Final Project

- Deploy and configure a Linux-based secure multi-service server
- Automate it with shell scripts & Ansible
- Submit GitHub repo + network diagram + automation scripts

Certification

- Eduden Certificate: Linux Pro – RHCE Aligned Advanced Admin
- Performance-based assessment
- Roadmap for RHCE EX294 + Ansible certification
- GitHub-ready script portfolio

Career Roles You'll Be Ready For

- Linux System Administrator (L2/L3)
- DevOps Engineer with Linux focus
- Cloud Support Specialist (AWS/GCP/Linux)
- Automation Engineer / Infrastructure Lead
- Technical Support & SysOps Roles

Course Highlights

- 60 Days of Real, Hands-On Linux Server Administration
- Best RHCE-Based Linux Course in India
- Shell Scripting, SELinux, Firewalls, LVM, Ansible – All Covered
- Designed for Job Roles + RHCE Prep
- Hybrid Format – Attend Online or In-Person at Eduden, Kolkata
- GitHub + Resume + Interview Support
- Real Capstone Project with Ansible Automation
- Built for Real Infrastructure Scenarios
