Get hands-on,
Get hired.

2026 Machine Learning Course With Eduden

Start Your Career in Machine Learning

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

AI & Machine Learning with Python – 90 Days Job-Ready Career Track

Learn Machine Learning From the Ground Up Using Python – Build Real-World Models, Analyze Data, and Prepare for AI Jobs in 2026

This flagship course is designed for aspiring AI engineers, data scientists, and software developers who want to learn machine learning hands-on, solve real-world problems, and prepare for high-paying jobs in AI-driven industries.

Whether you're starting from scratch or switching careers, this course gives you the perfect blend of theory, tools, and projects – without the fluff.

Duration: 90 Days

Format: Hybrid (Online & Offline at Eduden, Kolkata)

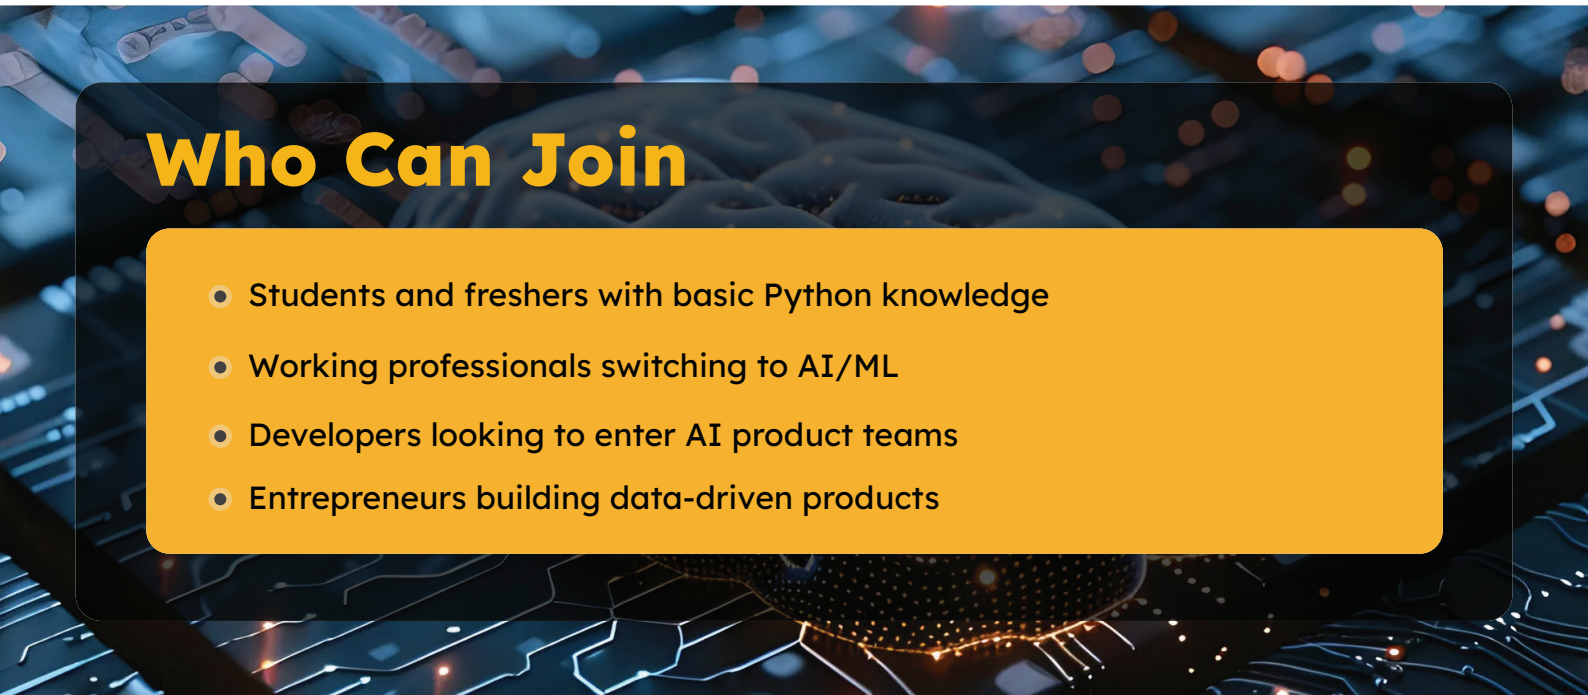

Level: Beginner to Intermediate

Track: Machine Learning, AI Fundamentals, Data Science

Course Objective

To help learners build a strong foundation in AI & ML using Python, understand how to apply machine learning to real problems, and gain practical experience with data preprocessing, model building, evaluation, and deployment.

You'll build a job-ready portfolio while learning the tools and algorithms used by AI engineers worldwide.

Who Can Join

- Students and freshers with basic Python knowledge
- Working professionals switching to AI/ML
- Developers looking to enter AI product teams
- Entrepreneurs building data-driven products

Course Curriculum

Module 1

Python for AI & Data Science

- Python syntax refresh
- NumPy & Pandas for data manipulation
- Data visualization with Matplotlib & Seaborn
- Hands-on: Analyze and visualize a real-world dataset

Module 2

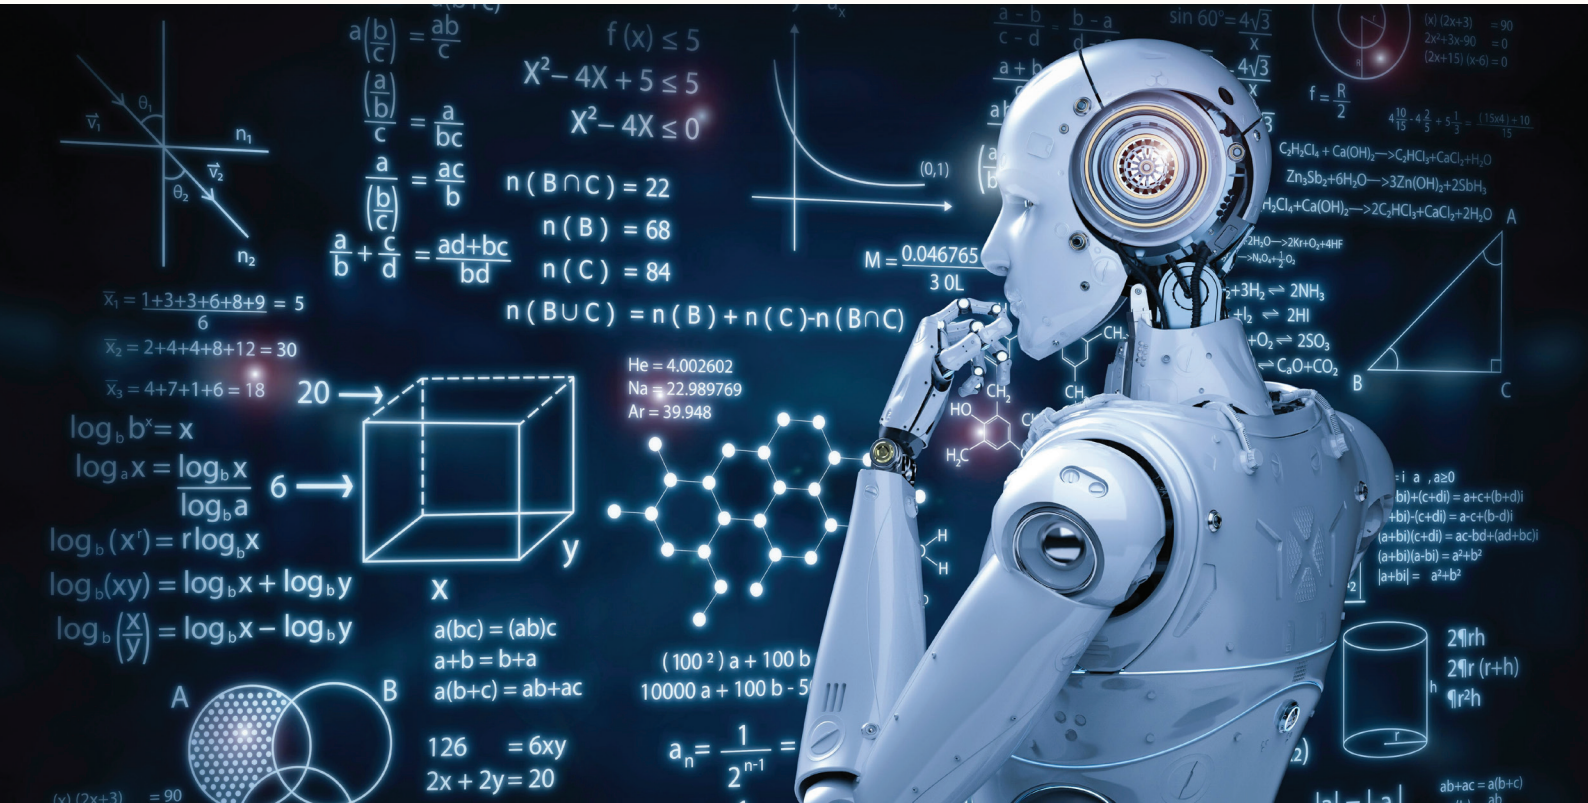

Statistics & Math for Machine Learning

- Probability, distributions, hypothesis testing
- Linear algebra for ML (vectors, matrices, dot product)
- Correlation, covariance, p-values
- Hands-on: Data insights & feature selection with stats

Module 3

Data Preprocessing & Feature Engineering

- Handling missing data, outliers, imbalances
- Label encoding, one-hot encoding
- Normalization vs Standardization
- Hands-on: Prepare messy real data for modeling

Module 4

Supervised Machine Learning

- Linear regression, logistic regression
- Decision trees, Random Forest, SVM
- Model accuracy, precision, recall, ROC AUC
- Hands-on: Build a fraud detection/classifier model

Module 5

Unsupervised Learning & Clustering

- K-means, DBSCAN, hierarchical clustering
- Dimensionality reduction (PCA, t-SNE)
- Hands-on: Segment customer data from e-commerce

Module 6

Model Optimization & Evaluation

- Cross-validation, GridSearchCV
- Bias-variance tradeoff, overfitting/underfitting
- Confusion matrix, learning curves
- Hands-on: Tune your ML models for max performance

Module 7

Intro to Deep Learning & Neural Networks

- What is deep learning?
- Introduction to TensorFlow & Keras
- ANN architecture & training
- Hands-on: Build a neural net for image classification

Module 8

ML Model Deployment (Optional Add-On)

- Pickle, joblib, streamlit
- Deploying ML models to the web
- Hosting projects on GitHub & cloud
- Hands-on: Deploy a trained model via Flask or Streamlit

Final Capstone Project

- Choose your domain: Healthcare, Finance, Retail, EdTech
- End-to-end project with documentation
- Present with dashboards, GitHub code, and model insights
- GitHub/Notion link + PDF for recruiter-ready submission

Certification

- Eduden Certificate in AI & Machine Learning with Python
- GitHub project portfolio submission required
- Roadmap for certification prep:
    1. IBM AI & ML Certification
    2. Google Data/Machine Learning
    3. Microsoft AI Fundamentals (AI-900)

Career Roles You'll Be Ready For

- Machine Learning Engineer (Junior/Mid)
- AI Developer / AI Analyst
- Data Scientist (entry-level)
- ML Research Assistant
- Python Data Analyst
- Freelance AI/ML Project Developer

Course Highlights

- 90 Days of Project-Based AI & ML Training
- Best ML Career Course in India – Designed for 2026 Market
- Focused on Practical Projects, Not Just Theory
- Built by Working AI Engineers, Delivered at Eduden
- Hybrid Format – Online or Offline (Kolkata HQ)
- Real Portfolio Projects + GitHub Setup Support
- Resume + Interview Prep for ML Roles
- Access to Eduden's AI Community & Mentorship
