About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Networking Advanced – Routing Mastery (CCNP + CCIE Syllabus Based)

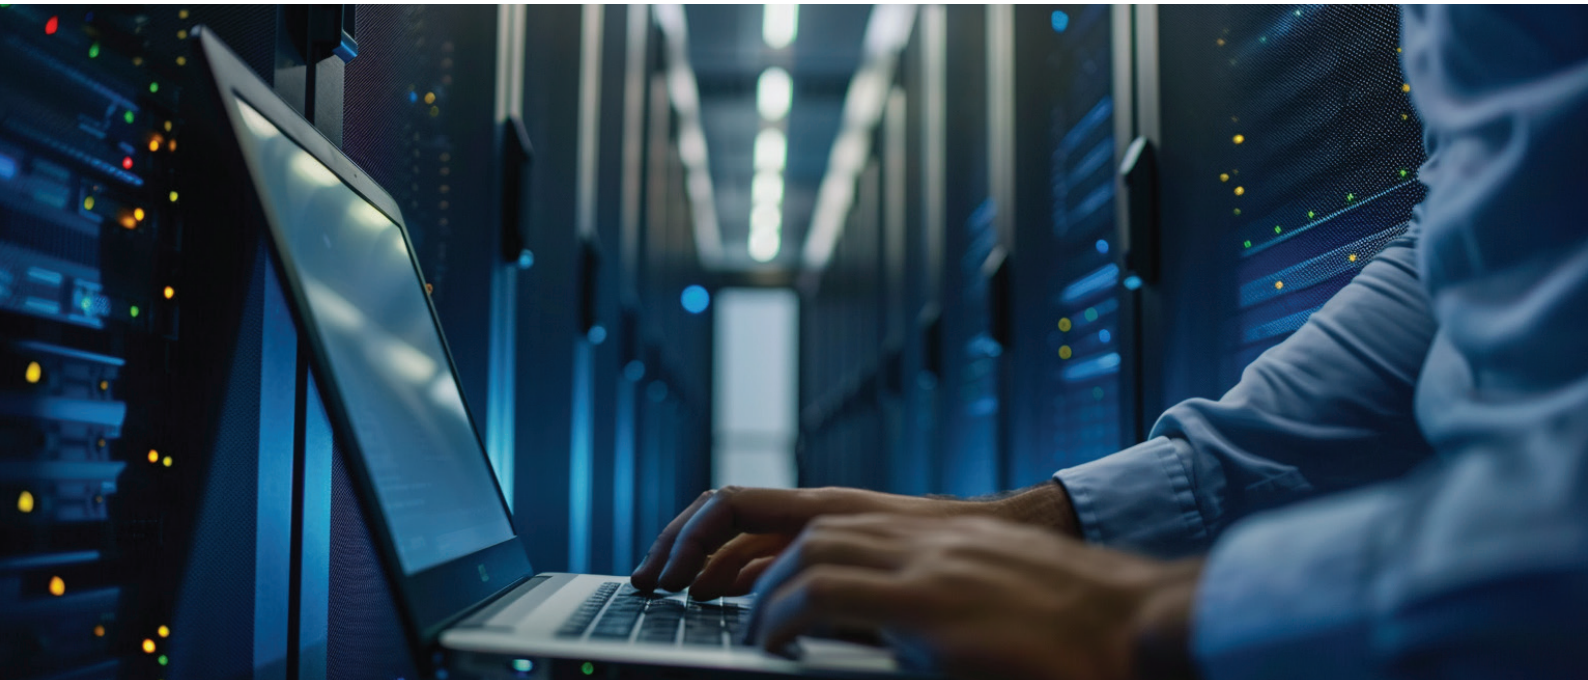

Course Objective

To equip you with the skills, configs, and real-world logic to master advanced routing concepts used in large-scale enterprise and service provider environments following the official CCNP ENCOR + CCIE Routing & Services syllabus. This course is practical, exam relevant, and field-proven.

DURATION		LEVEL
90 Days	Hybrid (Online & Offline at Eduden, Kolkata)	Intermediate to Advanced (CCNA Recommended)

Who Can Join

- CCNA-certified professionals or those with equivalent knowledge
- Network support engineers ready to level up
- IT professionals targeting CCNP / CCIE R&S certification
- Freelancers or consultants managing large networks

Course Modules Overview

Module 1

Advanced IP Routing Concepts

- Layer 3 packet forwarding deep dive
- Routing table logic, route selection rules
- Administrative distance & prefix preference
- Static & dynamic routing design
- Hands-on: Route selection simulation lab

Module 2

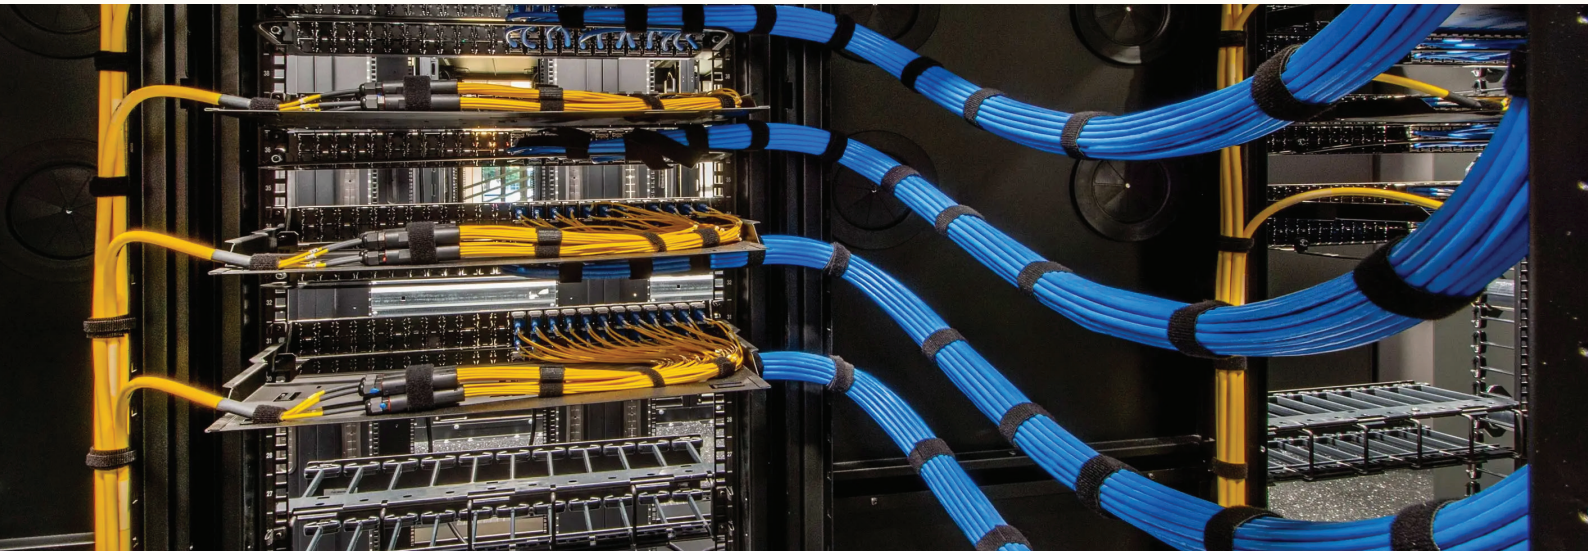

EIGRP – Enhanced Interior Gateway Routing Protocol

- EIGRP theory & metric calculation
- DUAL algorithm deep dive
- Feasible successors, topology tables
- Route summarization, redistribution
- Hands-on: Full EIGRP topology configuration + troubleshooting

Module 3

OSPFv2 & OSPFv3 (Single & Multi Area)

- OSPF LSA types, DR/BDR election
- Single area, multi-area, stub, NSSA
- Route filtering, summarization, virtual links
- IPv6 OSPFv3 basics
- Hands-on: Complex multi-area OSPF lab

Module 4

BGP – Border Gateway Protocol (Intro to Advanced)

- BGP theory: Path attributes, IBGP vs EBGP
- Peer groups, route reflectors, confederations
- Route maps, prefix lists, policy control
- MPLS pre-requirements (overview only)
- Hands-on: EBGP + IBGP lab with filtering & failover simulation

Module 5

Route Redistribution & Policy Control

- Redistributing EIGRP into OSPF, vice versa
- Tagging, filtering, metrics in redistribution
- Route-maps, prefix-lists, access-lists
- Hands-on: Multi-protocol lab with filters

Module 6

High Availability & Enterprise Design

- HSRP, VRRP, GLBP
- First hop redundancy in enterprise networks
- Load balancing & convergence planning
- Hands-on: HA topology design & failover test lab

Module 7

Exam & Interview Prep (Optional Add-On)

- CCNP/CCIE lab format & best practices
- Routing-focused interview questions
- Mock whiteboard challenge + config debug
- Documentation tips (Visio / network diagrams)

Projects You'll Build

- EIGRP + OSPF Integrated Network
- Multi-Area OSPF with Route Summarization
- Full BGP Enterprise + ISP Simulation
- Full BGP Enterprise + ISP Simulation
- Final Project: Enterprise-Scale Routing Architecture (with written design plan)

Career & Certification Support

- Job guidance for roles like:
  - Network Engineer (Level 2 & 3)
  - NOC Engineer
  - Network Architect (Junior level)
- Mock interviews with CCNP-level tech rounds
- Exam support for CCNP ENCOR 350-401 and CCIE EI (Written + Lab)

Certification

- Eduden Certificate in Advanced Routing (CCNP/CCIE-Oriented)
- Project showcase & diagram submission
- Optional pathway to Cisco certification (external)

Course Highlights

- 90 Days of Hardcore Routing Practice
- Best Advanced Routing Course in India (Kolkata & Online)
- Based on CCNP ENCOR & CCIE Enterprise Infrastructure
- Real Configs, Labs, and Failover Scenarios
- Built for IT Infrastructure Roles & Certification Prep
- Hybrid Format – Lab-Enabled In-Person or Online
- Certificate from Eduden – India's Top Network Training Institute
