Get hired.

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Networking Zero – Foundation Course (Based on CCNA Syllabus)

Course Objective

To give students a strong foundation in computer networking, aligned with the CCNA syllabus, while focusing on hands-on configuration, troubleshooting, and network design. From routers and IP addresses to VLANs and security this course turns complete beginners into confident network technicians or support engineers.

DURATION		LEVEL
90 Days	Hybrid (Online & Offline at Eduden, Kolkata)	Beginner to Intermediate

Who Can Join

- Beginners with no prior networking experience
- Students in tech, computer science, or BCA/MCA programs
- Professionals looking to get into IT infrastructure roles
- Anyone preparing for Cisco certifications (CCNA 200-301)

Course Modules Overview

Module 1

Introduction to Networking & Network Devices

- What is networking?
- Types: LAN, WAN, MAN, PAN
- OSI & TCP/IP Models
- Devices: Router, Switch, Hub, Bridge, Modem
- Hands-on: Identifying and connecting real devices

Module 2

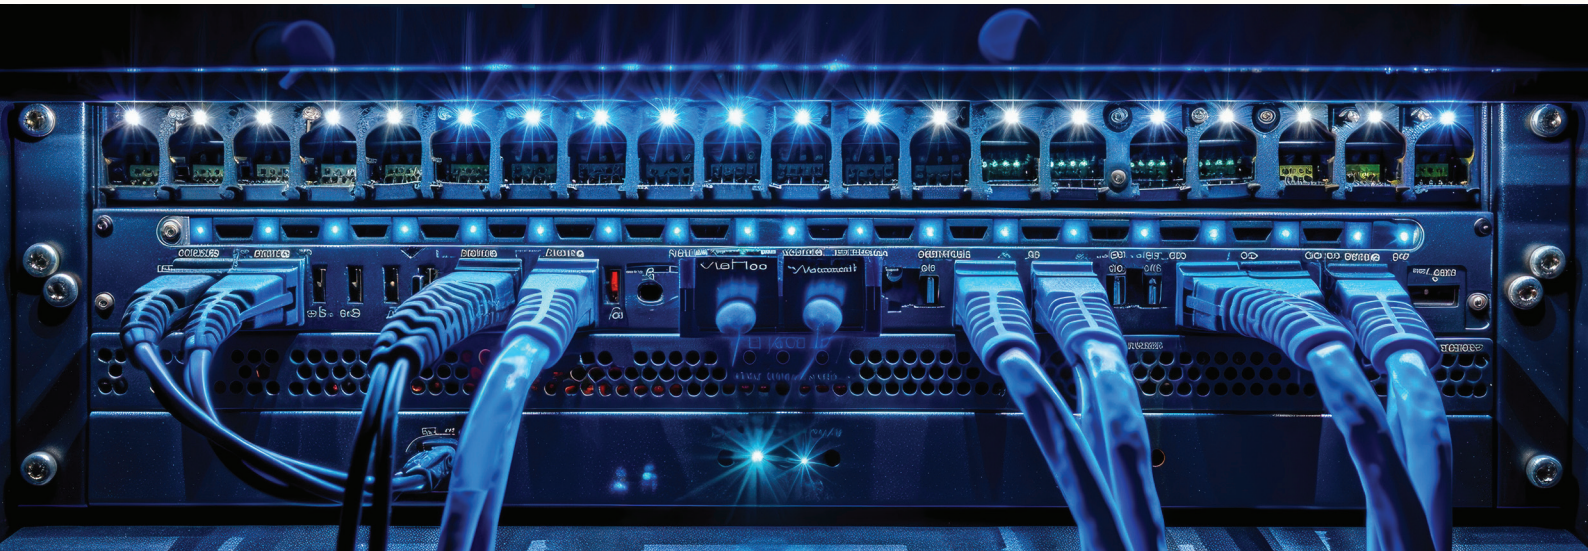

IP Addressing & Subnetting

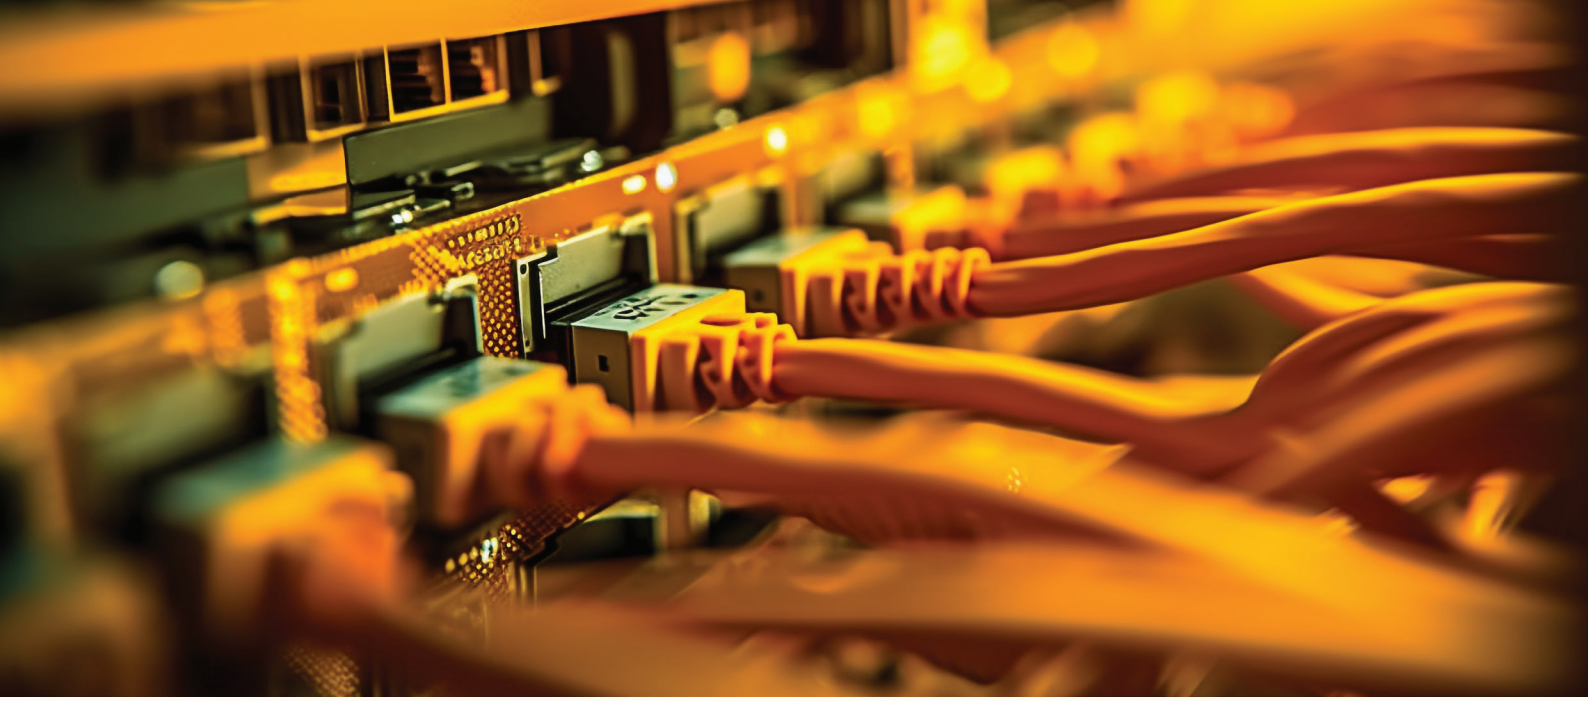

- IPv4 & IPv6 Addressing
- Public vs Private IPs
- Subnet masks, CIDR notation
- Binary conversion & subnetting logic
- Hands-on: Subnet calculation lab + addressing scheme design

Module 3

Routing & Switching Basics

- Static vs Dynamic Routing
- Routing Protocols: RIP, OSPF, EIGRP
- Switching fundamentals: MAC tables, VLANs
- Trunking, Inter-VLAN Routing
- Hands-on: Configure routing & VLANs in Packet Tracer

Module 4

Network Configuration & CLI Skills

- Introduction to Cisco IOS
- Basic configuration commands (hostname, IP, password)
- Interfaces, NAT, DHCP, DNS
- Troubleshooting using CLI tools
- Hands-on: CLI-based switch & router setup lab

Module 5

Network Security & Troubleshooting

- Firewalls, Access Control Lists (ACLs)
- Network attacks: DoS, MAC Spoofing, Sniffing (theory)
- Security best practices
- Ping, Traceroute, Telnet, SSH
- Hands-on: Simulate attacks and secure networks in lab

Module 6

Real-World Scenarios & Final Simulation

- Designing a small office/home network
- IP planning, device setup, VLAN creation
- Troubleshooting broken networks
- Final Simulation Project: Configure a 3-site network (HQ + 2 branches)

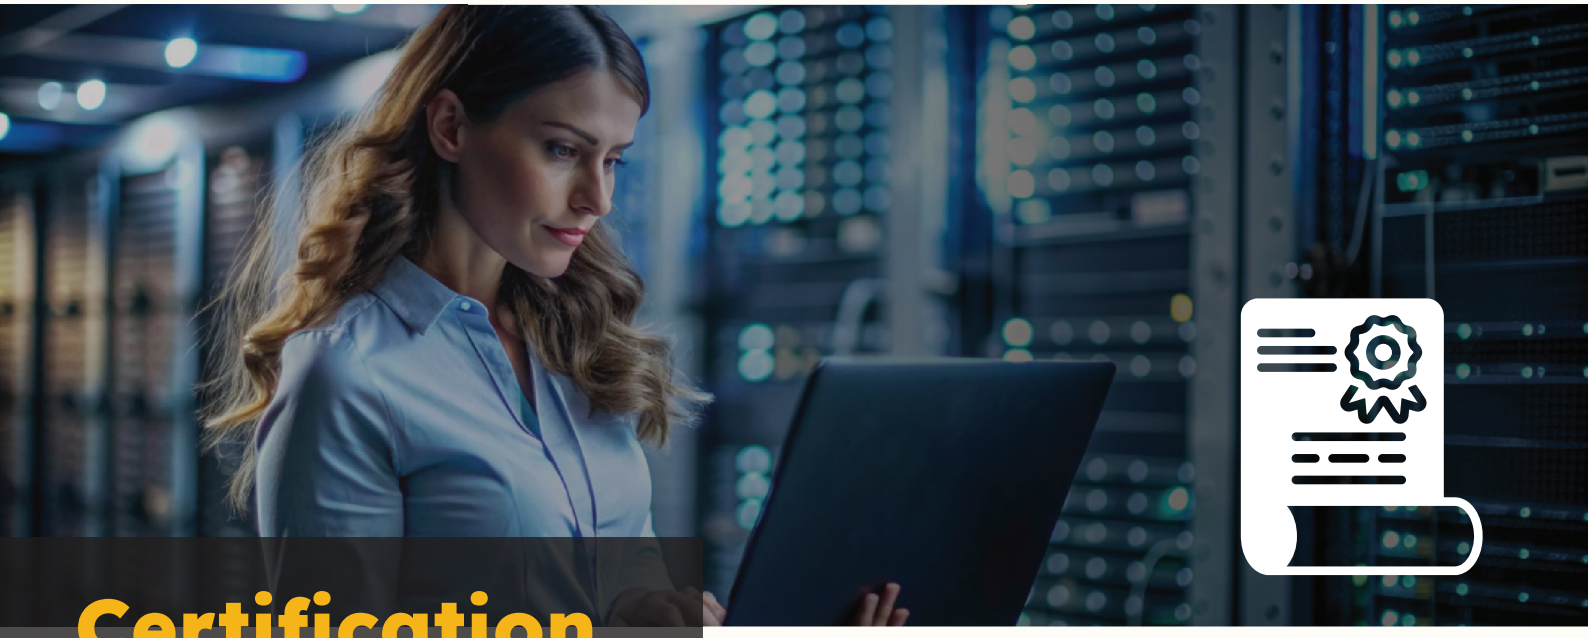

Career Support

- Resume + LinkedIn for Network Engineers
- Internship & Job Interview Preparation
- Real-world ticket handling intro
- Freelance/home lab consulting options

Projects You'll Build

- IP Addressing & Subnetting Plan
- VLAN + Routing Setup Lab
- ACL + DHCP Configuration
- Full Network Design Project (Office Simulation)

Certification

- Eduden Networking Zero Certificate (CCNA Syllabus-Based)
- Final lab-based assessment & GitHub documentation (optional)
- Support for preparing CCNA 200-301 certification

Course Highlights

- 90 Days of Practical Networking Fundamentals
- Based on CCNA 200-301 Syllabus
- Best Beginner Networking Course in Kolkata & India
- Real Labs with Packet Tracer & Optional Live Hardware
- Certificate from Eduden – India's Skill-Based IT Institute
- Hybrid Format – Online & Offline with Lab Support
- Resume & Career Support
- Ideal for Students, Support Engineers, and CCNA Prep
