Get hired.

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

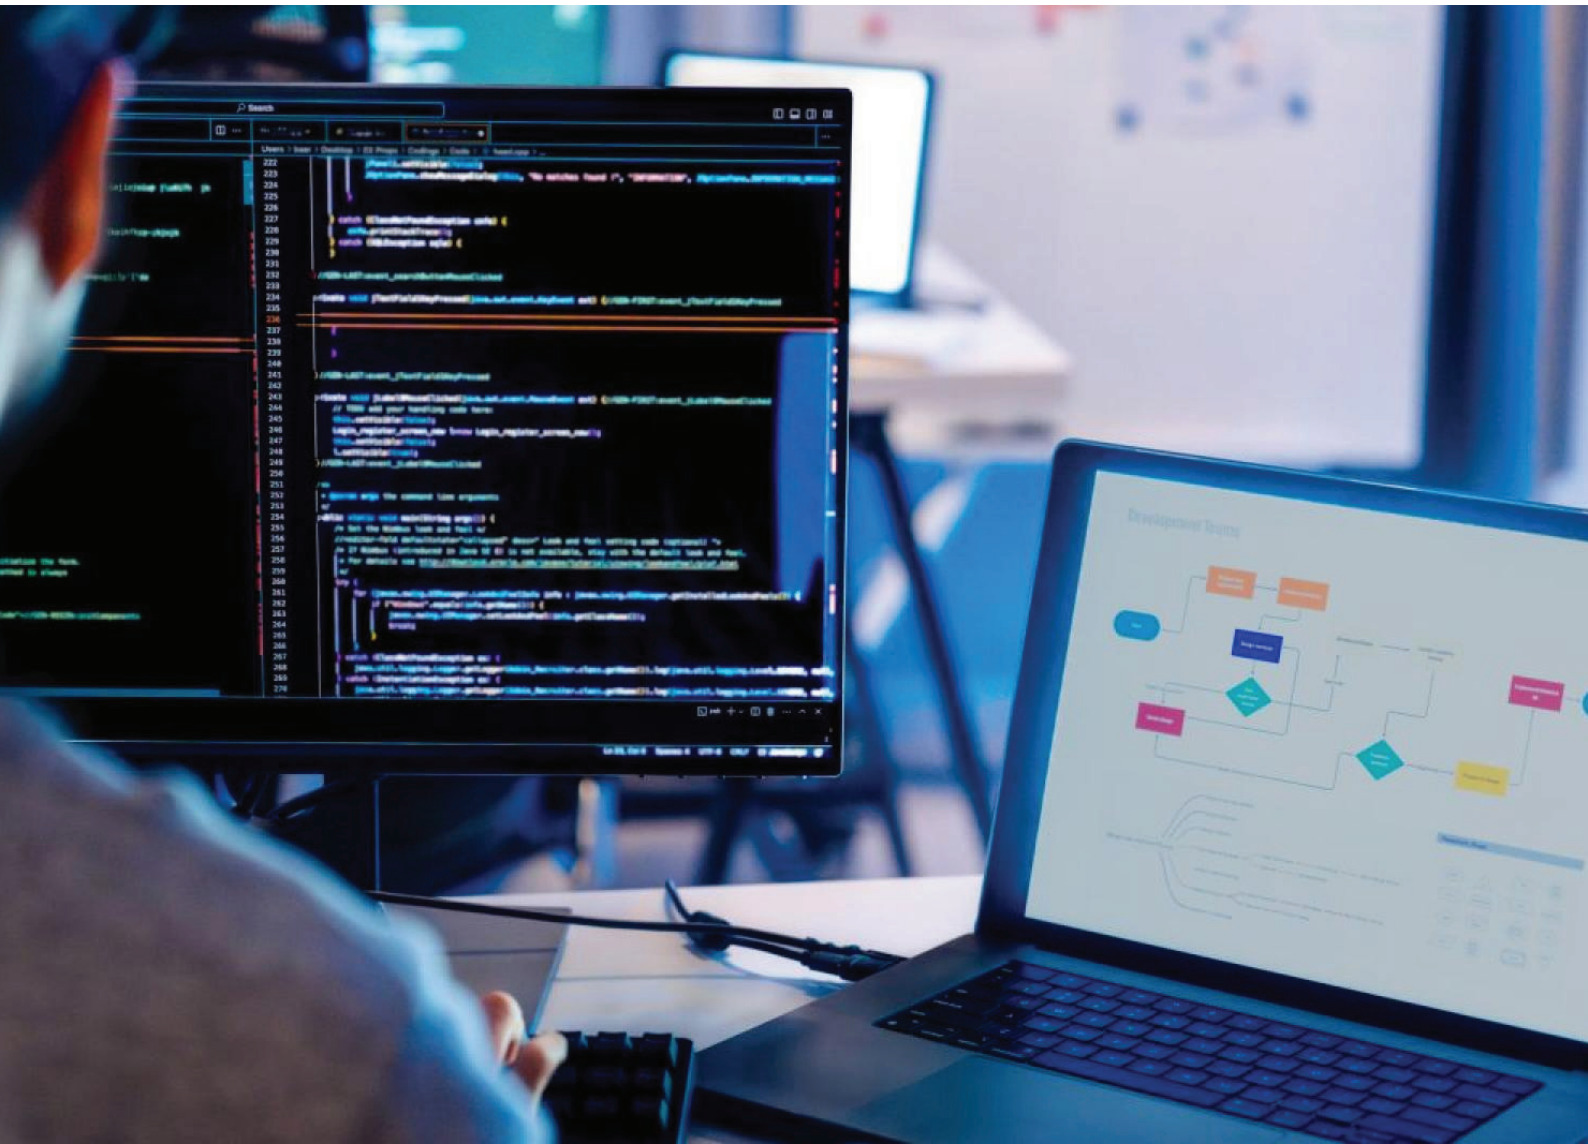

And the best part? We don't just teach you and send you off.

Backend Development with Django – 60 Days Hands-On Training

Build Powerful, Scalable Web Applications with Python & Django

This is perfect for students who've learned frontend or Python and now want to go deeper into backend development, APIs, and full-stack capability. Packed with job-searchable keywords like:

- Backend development with Django course in India
- Django web development training in Kolkata
- learn Django and REST API from scratch
- best backend course with Django in West Bengal
- Python Django developer training in India
- hands-on Django certification course India
- Eduden Django backend development course
- job-ready Django backend course for beginners

Course Objective

Frontend is fun — but backend is where the magic happens.

In this 60-day backend development course with Django by Eduden, you'll learn how to build dynamic web apps, create APIs, manage databases, handle user authentication, and launch secure backends — all with the power of Python and Django.

Whether you're aiming to become a full-stack developer, build your own SaaS product, or land a backend development role, this course will make you job-ready, project-ready, and API-smart.

Looking for the best Django backend training in Kolkata, West Bengal, or anywhere in India? This is where real backend devs are built.

Duration 60 Days	Lectures 40+	Projects 4

Eligibility

- Basic Python knowledge required (functions, loops, conditionals)
- Familiarity with HTML/CSS helpful, but not mandatory
- Perfect for students, developers, and career switchers who want to go full-stack

Want to build the backend for your own startup idea?

- Join our free Django demo session to see how fast you can go from idea to working backend.

Course Overview

This course teaches you everything you need to know to build robust, scalable backends using Django — one of the most powerful and popular web frameworks in the world.

You'll go from setting up your first project to building real-world APIs, working with relational databases, handling user auth, and deploying to the cloud. You'll even explore Django Rest Framework (DRF) to make your apps mobile and frontend-ready.

By the end of the course, you'll have 4 portfolio-ready apps, a fully functioning API, and the skills to work as a Django backend developer or build your own product.

Assignments

Query building, model relationships, user auth flows, API creation, deployment walkthroughs — all hands-on and guided.

Quizzes

Mini assessments after each module to test your grasp on views, models, routes, auth logic, and database queries.

Live Sessions

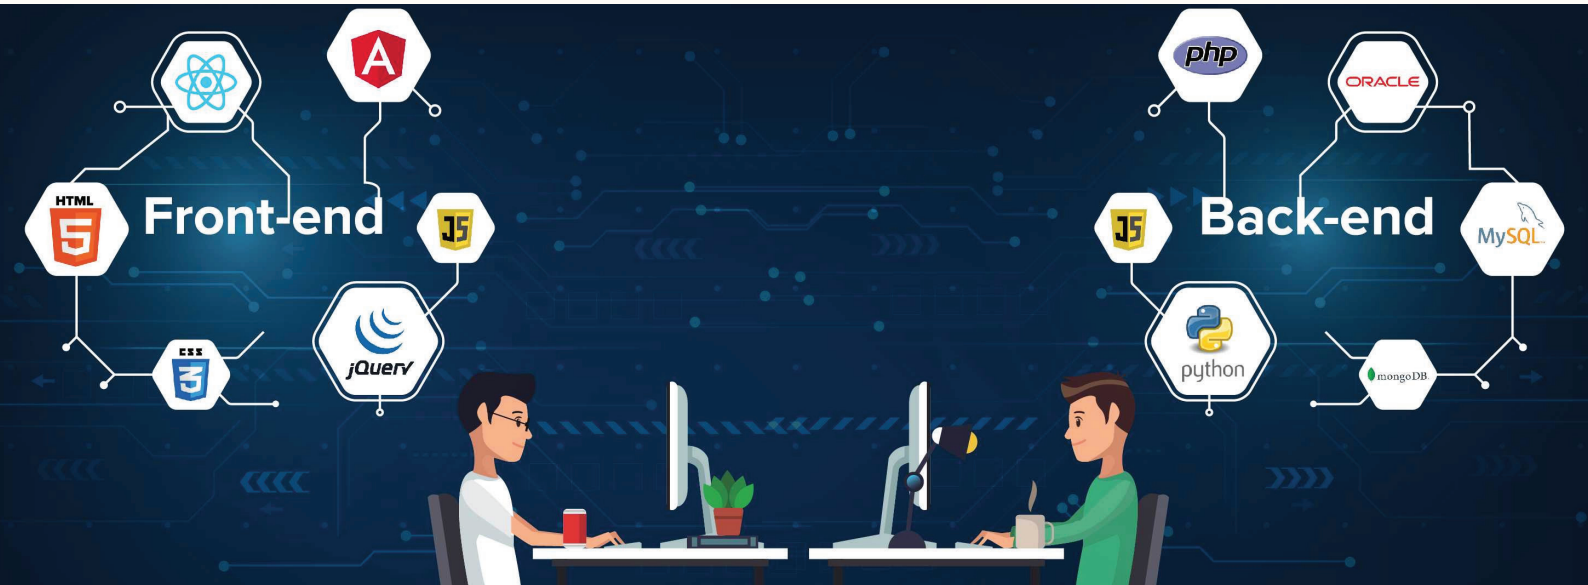

Weekly backend architecture walkthroughs, model design planning, DRF lab sessions, and code optimization support.

Projects

You'll build 4 full backend applications:

- Blog Backend with User Registration
- Job Board App with CRUD Admin Panel
- Notes App with User Auth & Media Upload
- E-commerce Backend (Cart, Orders, Checkout)

Final Project: Complete Django REST API for a mobile or React frontend

Course Curriculum & Tools

Languages, Frameworks & Tools Covered:

Curriculum Breakdown

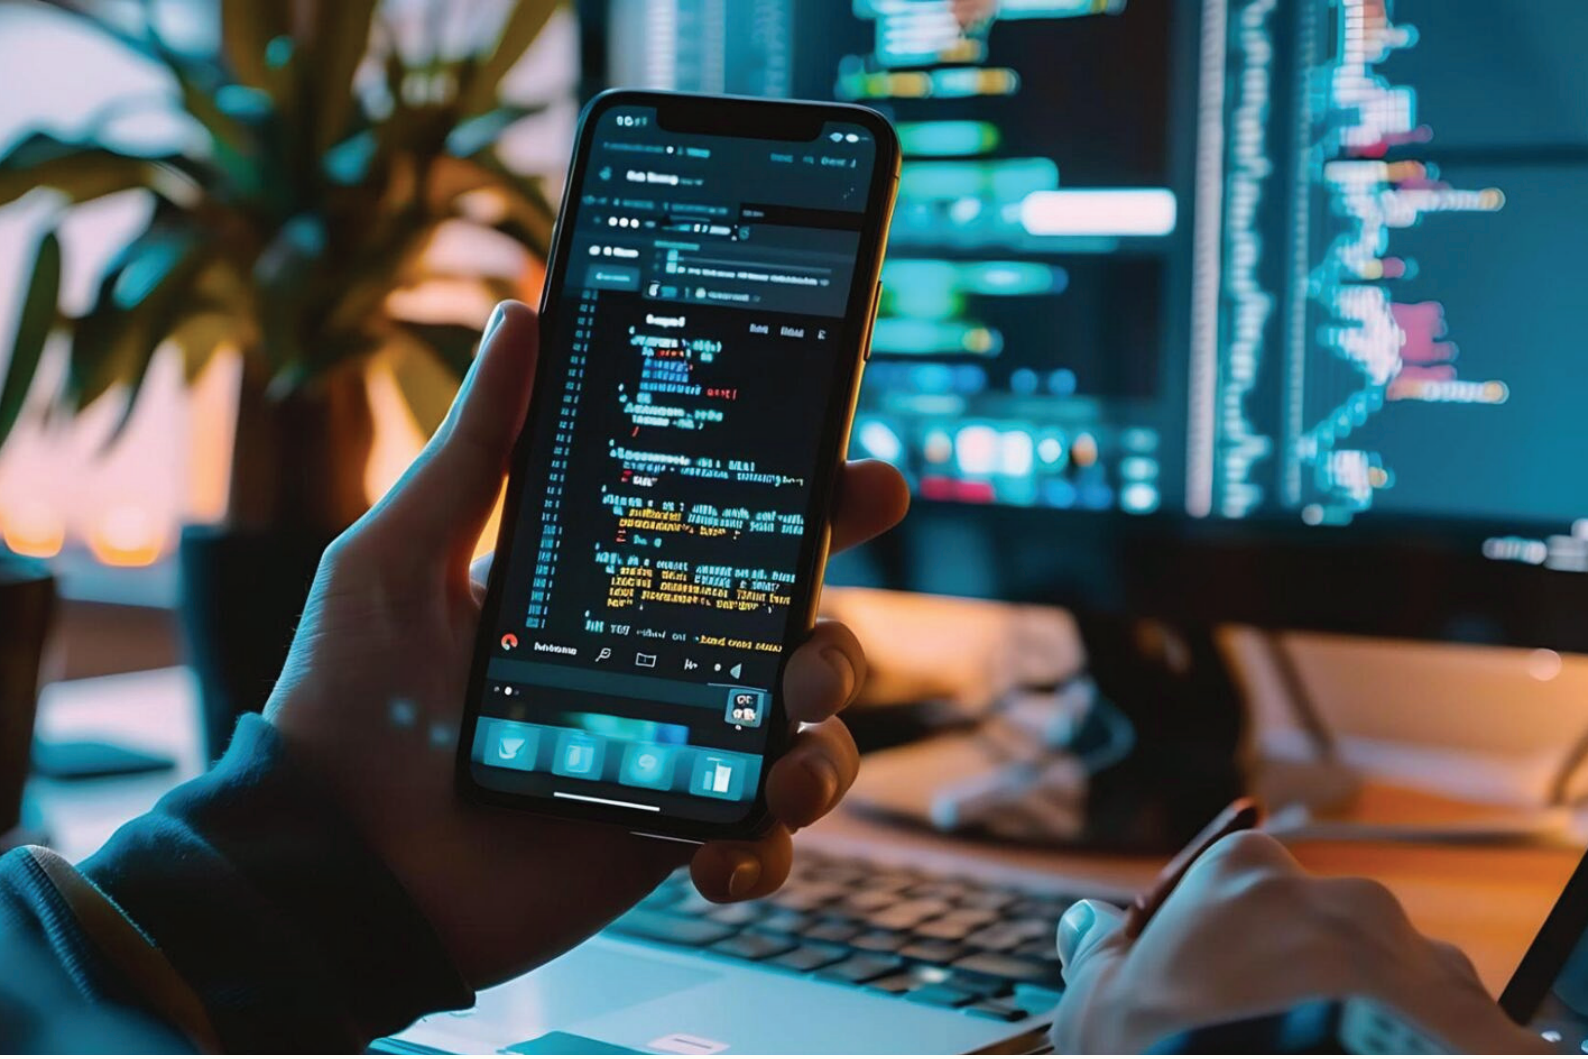

✳ Django Basics

- What is Django and why it matters
- Installing Django & setting up a project
- Creating apps, views, URLs, and templates
- Hands-on: Launch your first “Hello World” backend

✳ Models & Databases

- Defining models & migrations
- Creating one-to-one, one-to-many, and many-to-many relationships
- Admin panel customization
- Hands-on: Build a blog model with categories and tags

✳ Views, Forms & Templates

- Writing views: function-based & class-based
- Handling POST/GET requests
- Working with Django forms
- Hands-on: Create a custom user input form

✳ Authentication & Permissions

- Login, logout, registration flows
- Password hashing, sessions, and CSRF
- User roles and access controls
- Hands-on: Add login and dashboard for a private app

✳ Django REST Framework

- Serializers & API views
- API authentication (Token/JWT)
- Testing APIs with Postman
- Filtering, searching, and pagination
- Hands-on: Build your first RESTful API with DRF

✳ Deployment & Project Launch

- GitHub workflows
- Deploying to Heroku / Railway
- Environment variables & secret management
- Final Project: Complete backend with REST API + Admin Panel

What You'll Get After Completing the Course

Certificate of Completion

Earn your Django Backend Certification from Eduden, India's most practical tech learning hub.

Full Access for 60 Days

Revisit all recordings, code samples, projects, and walkthroughs — no hidden locks.

Ready for Real Dev Roles

This course preps you for roles such as:

- Python Django Developer
- Backend Developer
- API Developer
- Full-Stack Developer (with frontend add-on)
- Junior DevOps Engineer (with deployment track)

Course Highlights

- 60 Days of Practical Django Training from Scratch
- Learn to Build Full Web Apps + REST APIs
- Best Django Backend Development Course in India
- 4 Live Projects + 1 Final REST API Capstone
- Certificate from Eduden – Top Tech Institute in Kolkata
- Built for Freelancing, Jobs, and Startups
- Hybrid Format – Attend Online or Offline
- Portfolio & Resume Support
- Covers Models, Auth, APIs, Deployment & More
