Get hands-on,
Get hired.

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Backend Development with Node.js – 60 Days Hands-On Training

Course Objective

Think JavaScript is just for the browser?
Think again. It runs the backend too.

This Node.js course by Eduden is a 60-day practical ride into the world of backend development — where you'll learn to build fast, scalable RESTful APIs, handle user authentication, work with MongoDB, and deploy full backend systems for real-world applications.

Whether you're coming from frontend or just getting started with JavaScript, this course gives you the tools, mindset, and portfolio to break into the world of backend engineering.

Looking for the best Node.js backend course in Kolkata, West Bengal, or online across India? This one is built for you.

Duration 60 Days	Lectures 40+	Projects 4

Eligibility

- Basic JavaScript knowledge (variables, functions, arrays)
- Familiarity with any frontend tech (React, HTML, CSS) is helpful but not required
- Perfect for aspiring full-stack devs, freelancers, or backend beginners

Want to go from client-side to server-side with JavaScript?

- Join our free Node.js demo session and build your first API endpoint in 30 minutes.

Course Overview

In 60 days, you'll learn to build powerful backend applications using Node.js + Express.js + MongoDB. You'll start with creating basic server logic, then advance into building full authentication systems, CRUD APIs, middleware logic, and real-world API endpoints used in modern web and mobile apps.

We'll even show you how to secure, document, and deploy your apps to production.

By the end of this course, you'll have multiple backend projects, a resume-worthy REST API, and the confidence to call yourself a JavaScript backend developer.

Assignments

Request/response cycle practice, database modeling, API routing, token-based auth flows, and deployment tasks.

Quizzes

Assess your skills on topics like Node.js core modules, Express routing, MongoDB schemas, and REST standards.

Live Sessions

Weekly live coding walkthroughs, debugging sessions, API design reviews, and architectural breakdowns.

Projects

You'll build 4 backend projects using Node.js:

- Task Manager REST API
- Authentication System with JWT
- Blogging API with CRUD & User Roles
- E-Commerce Backend with Cart & Checkout

Final Project: Complete API backend for a React or mobile app, fully documented & hosted

Course Curriculum & Tools

Tech Stack You'll Master:

Curriculum Breakdown

✳ Introduction to Node.js

- What is Node and why use it for backend
- Setting up a Node server
- Working with core modules: fs, path, http
- Hands-on: Create your first API endpoint

✳ Express.js for Routing & Middleware

- Express setup and basic routes
- Middleware logic (custom, built-in, third-party)
- Route params, query strings, error handling
- Hands-on: Task Manager API with custom routes

✳ MongoDB & Mongoose

- NoSQL database structure
- Connecting to MongoDB Atlas
- Defining schemas, models, and relationships
- CRUD operations (Create, Read, Update, Delete)
- Hands-on: Blog API with categories and user authors

✳ Authentication & Security

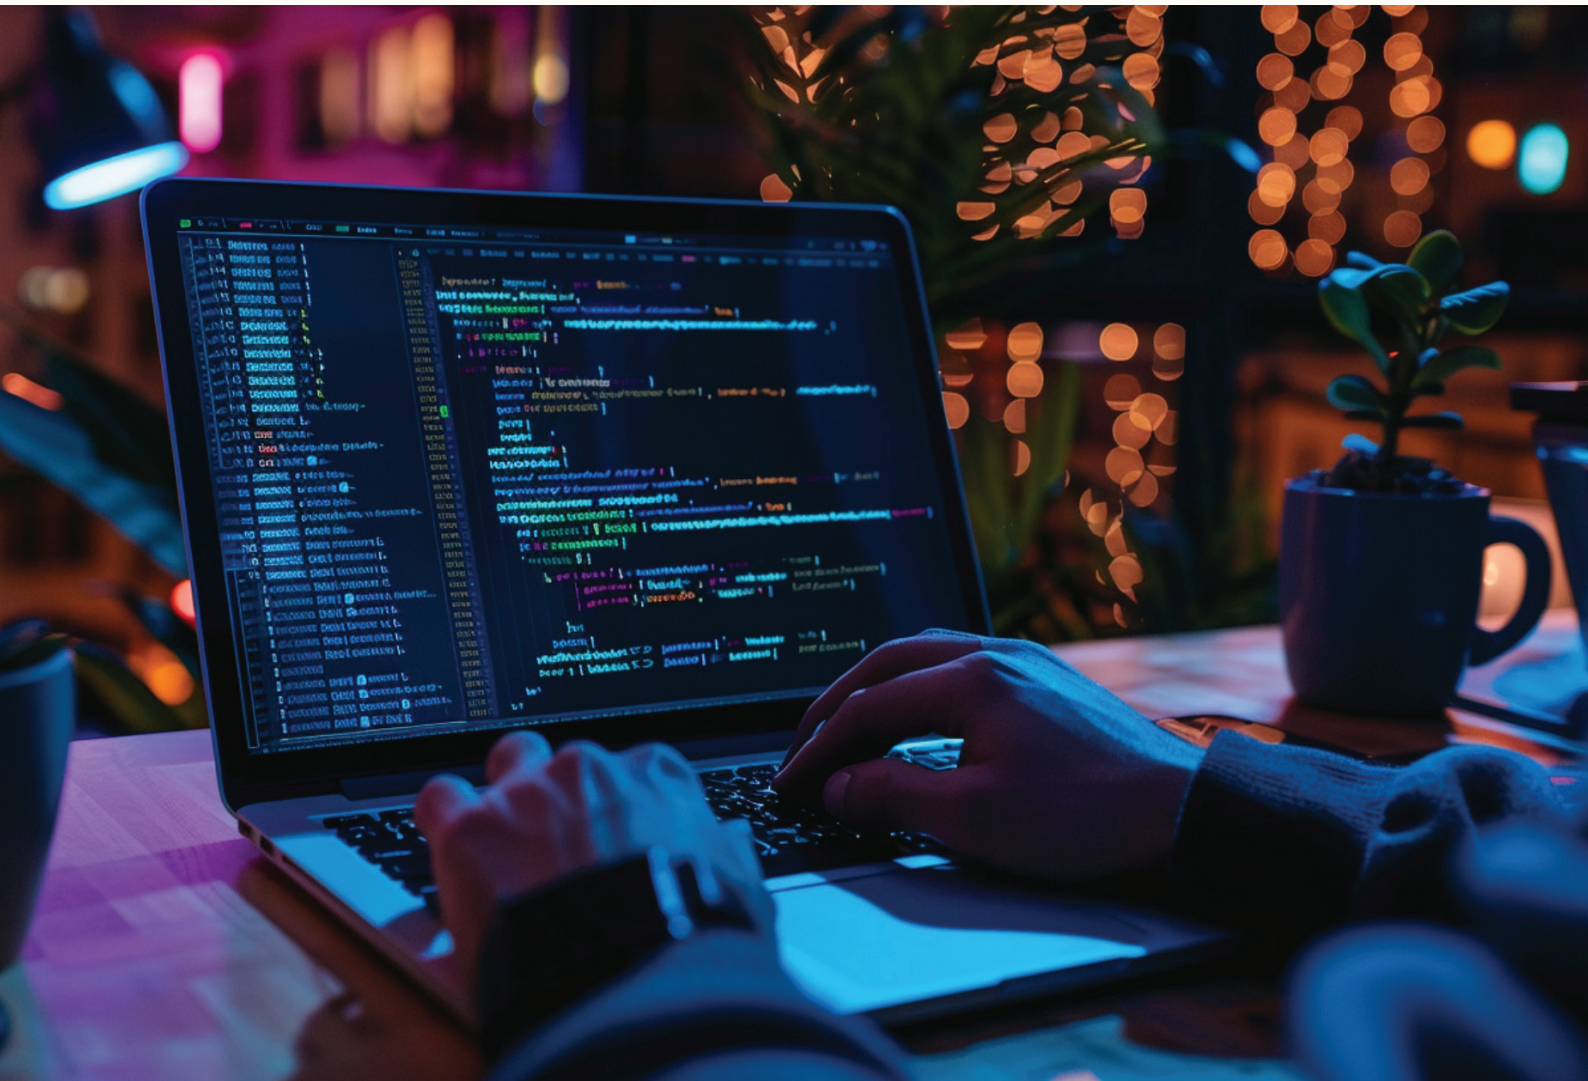

- User registration and login
- Password hashing with Bcrypt
- Session vs JWT token-based auth
- Protecting routes, roles & permissions
- Hands-on: Create a secure user system

✳ API Standards & Testing

- RESTful best practices
- Validating input with Joi/express-validator
- Using Postman for API testing
- Hands-on: Build a production-ready API with documentation

✳ Deployment & Final Project

- Environment variables
- Hosting with Render/Railway/Vercel
- Connecting backend to frontend
- Final Project: Complete RESTful backend for a frontend/mobile app

What You'll Get After Completing the Course

Certificate of Completion

Earn your Node.js Backend Certification from Eduden, one of India's most practical tech institutes.

Full Course Access

Enjoy 60 days of access to all videos, labs, codebases, templates, and project walk-throughs.

Job-Ready for Backend Dev Roles

Perfect prep for:

- Node.js Backend Developer
- MERN Stack Developer
- API Developer
- Full Stack Developer (Frontend + Backend with React)
- Junior DevOps & Platform Engineer

Course Highlights

- 60 Days of Hands-On JavaScript Backend Development
- Build Real REST APIs with Node.js + Express
- Best Node.js Course in Kolkata, India for Beginners & Freelancers
- MongoDB Integration, Auth, and Deployment Included
- 4 Major Projects + Final Capstone REST API
- Certificate from Eduden – India's Most Practical Tech School
- Weekly Mentorship & GitHub Portfolio Building
- Hybrid Format – Learn Online or In-Person
- Built for Job-Seekers, Freelancers, and Builders
