Get hired.

About Eduden

Welcome to Eduden — where we've thrown boring education out the window and replaced it with hands-on learning, real-world skills, and a vibe that actually makes sense in 2026.

We're not your grandma's school (unless she's into coding, design, and memes). At Eduden, we're flipping the traditional classroom upside down. No whiteboards full of buzzwords. No endless theory. Just solid skills, taught by international trainers, that get you job-ready fast.

Whether you want to be a freelance graphic designer, a Python wizard, a networking pro, or a UI/UX boss, we've got your back. Our hybrid courses (online + offline) are packed with real projects, 100+ practical tasks, and mentorship that doesn't feel robotic. You'll be creating, building, and earning while still laughing at our bad jokes.

And the best part? We don't just teach you and send you off.

Web Development Basics – 45 Days Hands-On Course

Course Objective

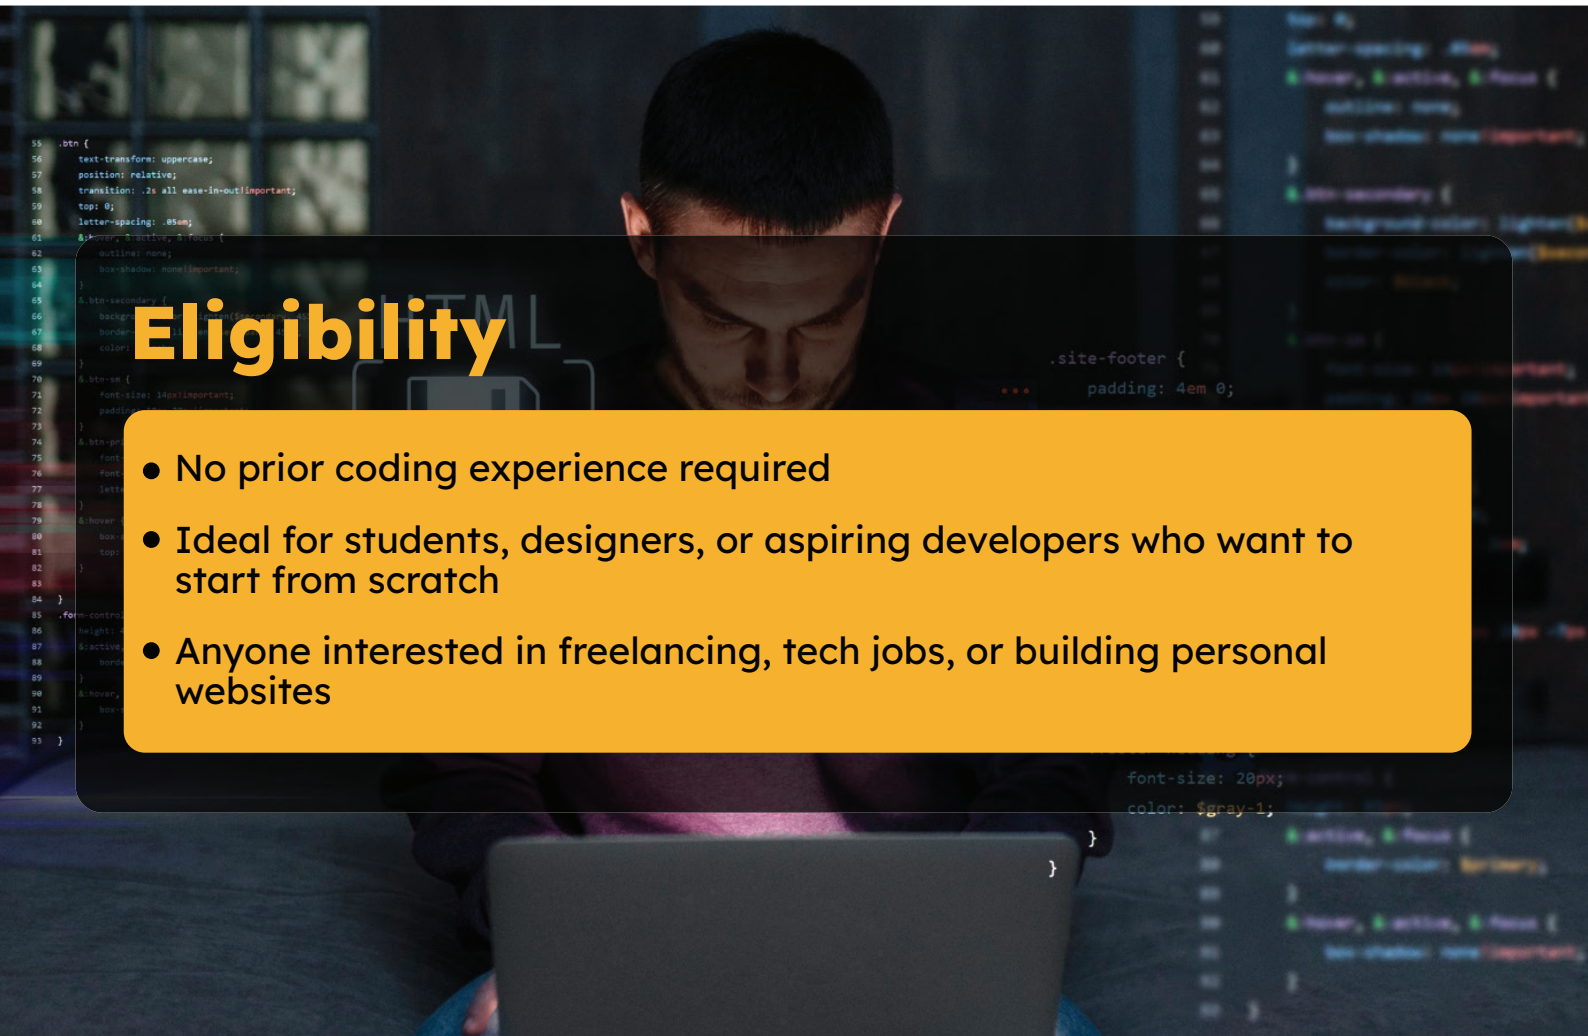

Let’s build something people can actually see and click.

Welcome to Eduden’s Web Development Basics course — a fully hands-on, zero-to-hero style program that teaches you how to build modern, responsive websites using HTML, CSS, and JavaScript.

Whether you’re planning to start freelancing, launch your own project, or take your first step toward becoming a full-stack developer, this course gives you the skills, tools, and confidence to bring your ideas to life on the web.

If you’re looking for the best beginner web development course in Kolkata, West Bengal, or anywhere in India, this is it. No coding background needed. Just your curiosity and 45 days of creative energy.

Duration 45 Days	Lectures 30	Projects 3

Eligibility

- No prior coding experience required
- Ideal for students, designers, or aspiring developers who want to start from scratch
- Anyone interested in freelancing, tech jobs, or building personal websites

Course Overview

This 45-day course takes you through the core concepts of frontend development, teaching you to build, style, and make websites interactive using HTML, CSS, and JavaScript. You'll also learn how to structure pages, work with layout systems like Flexbox and Grid, add animations, and even make your site mobile-responsive.

You'll walk away not just knowing code — but knowing how to build real websites that are clean, professional, and ready to go online.

Assignments

10+ practical tasks including form design, responsive layout building, navbar creation, and image sliders.

Quizzes

Quick quizzes after each module to strengthen syntax, logic, and web architecture understanding.

Live Sessions

Weekly live code-alongs, troubleshooting sessions, and project reviews with mentors.

Projects

You'll build 3 fully functional websites:

- Personal Portfolio Page (Intro Project)
- Landing Page for a Local Business
- Multi-Page Responsive Blog or Portfolio

Final Project: Launch a polished website with HTML, CSS & JavaScript on GitHub Pages or Netlify

Course Curriculum & Tools

Languages & Tech You'll Learn:

CSS

HTML

JS
